# A taste for tradition

Traditions like school mascots have gone the way of beauty queens and rumble seats on most college campuses, but K-State defies the trend. Always a tradition-oriented school, the campus has held on to customs considered stale by some. Practices such as Homecoming, Greek living or just plain school pride were stronger at K-State than perhaps they've ever been before. ♦

Jeff Taylor

## ROYAL PURPLE 1982

Kansas State University

Volume 73

Manhattan, Kansas 66506

*Traditional path* — Fall colors add to the college scenery on the southeast end of campus as a student heads toward class.

## Tradition

Because of its eagerness to cling to traditional values, K-State's stability and maturity has often been confused with being unprogressive or even reactionary.

It is a paradox that K-State's conservative image actually feeds off the dynamic individualism of its students and staff. Tradition survives unhampered on the campus because of the inner strength of the individuals on campus. What appears to be a sea of homogeneity from the outside is really a collection of individuals who have the inner confidence to operate in a group without losing their own dynamic outlook.

Dynamic. Long known for outstanding colleges of engineering, agriculture, veterinary medicine and home economics, some newly discovered programs also brought the University recognition, such as the Division of Biology's cancer research laboratory. ♦

*Bugging out* — Tim Verbanic, senior in management, and Lemuel Moore, senior in computer science, attempt to debug a computer program at the computer room in Fairchild Hall.

*No strings attached* — David Viestenz, senior in finance, displays his throwing form in a contest for accuracy. The Union recreation center sponsored the frisbee contest.

Hurriyet Aydogan

Jeff Taylor

*Right on cue* — Wilhelm Lohmar, freshman in agricultural engineering, shoots as Anne Gulbransen, freshman in animal science and industry, and Helen Reynolds, senior in interior design, await their turn during a break in the basement of the Union.

Hurriyet Aydogan

# Tradition

The dynamic spirit of a changing campus was evidenced by the opening of the new academic buildings, Bluemont and Throckmorton halls. And despite tightened federal and state budgets, K-State actually recorded funding increases from both sources. The KSU Foundation received a record \$4.4 million in private donations on behalf of the University to help ensure the school's progress in an era of uncertain finances.

Individualism marked the record-sized student body of 19,982 which hailed from all 50 states and over 60 foreign countries. Controversy continued because of individual convictions about Iran, Maranatha Christian Ministry and whether to allocate student money toward a new \$20 million coliseum.

Individual motivation was the key for a mother and housewife to commute from Junction City to complete her degree requirements. It also compelled a marketing major with a part-time job to volunteer his time at the Fone Crisis Center. The individualistic spirit was even seen on a rainy Halloween night in Aggieville. ♦

Scott Williams

*Without the big tent* — The Royal Lichtenstein Circus drew a large crowd during a noon hour performance in the fall. The group performed under the open sky between the Union and Seaton Hall.

Rob Clark

*Thumbs up* — Randy McCoy, senior in predesign professions, watches the K-State — KU football game in Lawrence. The hill south of the stadium provides a good spot for watching and socializing during the intrastate match.

*Facing the campus* — Ralph Nader answers questions during a news conference at K-State. Nader was a Landon lecturer in October.

Scott Williams

Rob Clark

*Purple music* — The marching band provides the opportunity for individual talents to mold into one performance during halftime of the Nebraska football game.

*Shooting marbles* — Aggieville has more to offer students than bars. Movie theatres attract large numbers who go to view the latest in box office productions.

Allen Eyestone

# Tradition

Symbolizing the unique combination of dynamic individuality and a taste for tradition is a student artist's drawing of the Wildcat mascot on the front cover of the 1982 Royal Purple.

Dynamic. Individualistic. The terms describe a Wildcat in its natural surroundings, just as they describe K-State students in their surroundings. **RP**

*Rooster* — Keith Banks, sophomore in physical therapy, leads the crowd in a cheer while he sits on the shoulders of Kevin Karst, senior in architecture.

Allen Eyestone

STU

Nothing is laced with more tradition than the social life at K-State. Life just wouldn't be the same without midnight food-runs, floor parties, road trips and, of course, Aggieville. There is something magical about spring break, parents' weekend or the long awaited graduation day.

Traditions were adjusted for fads and fashion, though. Electronic games nudged out mechanical bulls for entertainment, and bandanas topped more outfits than tennis visors. But the changes in taste for fun and clothes didn't rock any traditions about good old-fashioned college life. **RP**

## STUDENT LIFE

### *The seven-week itch*

Students barely settle in before the urge to get away for a few days hits ..... 10

### *Asteroids and empty pockets*

Saving quarters is next to impossible for addicts ..... 14

### *Pure Prairie League*

Concerts return to K-State, but McCain misses the sellout mark in ticket sales ..... 58

### *News*

For some glimpses of events that affected you ..... 74

*Point, counterpoint* — Vicki Quarles, junior in social work at the University of Kansas, trades points with Kevin Kisner, K-State senior in business. The two met during the K-State-KU football game on Campanile Hill overlooking the stadium.

Goodbye K-State . . . for awhile

*The long and winding road* — The Bright Angel Trail proposes a challenge for hikers Drew Westcott, senior in industrial engineering, and Bruce Loyd, senior in mechanical engineering.

*Rocky trail* — The obstacles along the way lead Bruce Loyd and John Dillon, senior in natural resource management, along the Grand Canyon floor.

Skiing down a blanket of freshly fallen snow to the bottom of the slope greeted by a cup of hot, buttered rum; laying on a white sandy beach, basking in the sun's rays while the ocean waves peacefully lull you to sleep; backpacking down a narrow trail in the most amazing canyon Mother Nature has ever carved.

Do these phrases seem like a homework assignment in descriptive writing? Or are they ways students elude homework, projects and tests?

If you guessed the latter, you have probably felt the pressures of the everyday college routine. Every student experiences the desire to "Get away from it all."

The urge to pack up usually occurs after everything gets moved into the room, class schedules are worked out after countless trips to the drop/add line, and the first round of tests are over.

Escapes vary from the spontaneous weekend trips home to week-long vacations planned by the Union Programming Council.

Trips to the Grand Canyon, Padre Island, Colorado, the Ozarks and other places are sponsored by UPC's Outdoor Recreation Committee or Travel Committee.

Wherever the destination, students use trips to get away from the pressures of classes. But taking trips will not solve all of the problems. The homework, projects and tests will all be there when he returns, but at least the trip can postpone the routine for a period of time.

"Getting away from it all" may need to be amended to read "Getting away from it all — for awhile." **REP**

Another round of threes — "Threefers," a popular Aggie Station feature, keeps Trish Wietecter, sophomore in sociology, busy delivering drinks.

# 'After all, a job's a job, right?'

Dear Linda,  
Sorry I haven't written in a while, but I have been busy with my new job. Since I know you're standing there, mouth gaping, I'll tell you how it all came about.

On a crazy whim, I decided to balance my checkbook. To my surprise I discovered that an emergency student loan can only be stretched so far. So in a desperate attempt to earn some pocket money, I applied for a barmaid job in Aggieville.

Don't laugh; the work does have its good points. You get to see a lot of your friends (so what if they're all laughing and drinking while you wipe up a table covered with remains of someone's dinner) and the pay isn't too bad. After all, a job's a job, right?

I think that I'm getting the hang of it though. At least I can spot the pinchers pretty well. They're usually sitting on

the edge of the booth, arms dangling with a glazed look in their eyes. I would like to know where my contract states that once I become a waitress, I am suddenly public property. I've learned fast how to maneuver just out of reach while simultaneously carrying two full pitchers and praying that the six-foot fellow in front of me stops swinging his arms in an ape-like fashion.

The boss is a pretty nice guy too. He even allows drinking on the job. That is as long as we can still "perform our duties."

Even that little incident last week has been forgotten and I think the boss is glad he's given me another chance. Well it's only fair - the floor does get pretty slippery towards the end of the night and it's not as if I spilled that pitcher on his girlfriend purposely.

Am I painting a pretty dismal picture of all this? If so, I don't mean to.

Honestly, I think this job is a great learning experience. Maybe its just the old "tell the bartender syndrome," but I've heard enough stories to even make Abbey's ears burn.

Then there's the jokes. Some of them are even funny the twenty-fifth or twenty-sixth time. Naturally some are rather risqué (there's always the excuse that liquor loosens the tongue) and I have no doubt that my terminal blush will soon be cured.

At times though I can't help but feel as if I am losing my identity. I used to be flattered when guys asked my name, but now I know better. In the future I hope to avoid having it screamed at the top of someone's lungs in the middle of a slow song. Last week I was Susan, Tammy, Donna and Flo just to play it safe.

While I realize I'm no great authority, having only worked a couple of weeks, I've come up with a few "words of wisdom for the working waitress." This is just some advice for those beginning a bar job or even contemplating the idea.

1. Never offer a cute fellow a free beer until you check to see if his girlfriend is standing right behind him.
2. Don't dangle the bar rag out of your back pocket; hold it in your hand. You'd be surprised at the guys that major in "towel-whipping" at K-State.
3. Always keep your eyes open. Besides hearing juicy gossip, you can actually become proficient at translating slurred speech. "Two mugs" and "two Buds" can sound very similar when the speaker is under a table with someone else's foot in his mouth.
4. When taking checks at the bar, just be sure that they've signed it. A current address isn't as important, since most can't remember it when asked anyway. Don't even attempt a phone number.
5. Be sure there is always plenty of popcorn made. Gnawed tables do not go over well with the management.
6. Never tell co-workers your birthday unless you enjoy seeing crude remarks about yourself on the marquis outside the bar.

Who knows Linda, if I'd seen a copy of these beforehand I might not be where I am today, but I doubt it. I'm just a sucker for excitement.

Love, Sharon  by Sharon Riley

*Socializing customers* — Trish Wietecter listens to Brian Stack, senior in hospital management, while Doug Rasmussen, senior in finance, pays for the scotch and waters.

*I needed a rum and coke* — An incorrect drink order brings Angela Schnieder, sophomore in pre-professional elementary, back to the bar so Glenn Parker can remedy the problem.

photos by Scott Williams

# Video addiction leaves empty pockets

I am an addict. My symptoms include the urge to spend numerous quarters on something from which I receive nothing in return, and stopping for a few minutes anywhere imaginable to test my luck against invading Martians, dot-eating yellow mouths, asteroids in space or missiles from an enemy craft.

Yes, I am a video-aholic. Medical science has not found a cure, except possibly a shortage of quarters or a complete power failure.

Unfortunately, my addiction has not been completely analyzed. Maybe it is my competitive instinct to beat the high score and get my initials on the screen. Maybe I have the desire to save the world from enemy attackers. Or could it be that everyone else is doing it and I hate to be left out?

I believe the surgeon general should label electronic games with a warning that playing the device could be hazardous to one's health.

Side effects include losing the ability to blink (you may miss an oncoming attacker), finger and wrist cramps from pushing buttons and moving control sticks and an empty

pocket (which previously housed several dollars of quarters).

The game inventors must be making a fortune. Seriously, how much overhead is needed for a game that just sits there, lights up and makes strange noises? It's getting harder for us addicts because everywhere we turn, there is a video game haunting us for another quarter.

Most of them can be found in bars, which lead to the consumption of alcohol, which leads to the attitude of "what's another quarter?"

Bars are not the only place these machines can be found. Laundromats, bowling alleys, shopping malls, the Union recreation center and even restaurants include them as interior decorations.

Videomania will probably remain as long as there are people who will spend their last quarter on a few minutes of fun.

I am really trying to quit because I cannot afford the extra expenses each time I walk out the front door.

But until then, "Does anyone have four quarters for a dollar?" 

by Jerry Katlin

photos by Allen Eyestone

*Quarter here, quarter there* — A wide variety of video games await potential players who will spend numerous quarters for a few minutes of intense action.

*Electronic maze* — Leroy Boker, senior in accounting, attempts to win a free game while others concentrate on the many devices in the area. Electronic game parlors are opening up in the Manhattan area for students and residents to challenge their reflexes and empty their pockets.

# Rockin' to country

**T**wistin' my body in every position imaginable, sweat rollin' down my back, breathin' heavily, I wonder how I learned these moves so fast. Swing dancin' (well, what did you think I was doing?) I decided is the best.

Yes, Miss Rock Concert herself, lover of Journey, Kansas, and Pat Benatar, is in her white Nikes and Calvin Klein's struttin' to Willie Nelson. Just a couple years ago I wouldn't be caught listening to Country 107.

Sparked by movies that said country is "cool" and disco is "dull," I have again been brought into line by a fad. Although I can't bring myself to wear pointy-toed cowboy boots or a big-buckled belt, I've always admired people who have perfected the art of swing dancing.

There is something about complementing your partner's dancing, moving as a single unit, as compared to "doing your own thing" to rock and roll. It makes dancing more enjoyable when you dance with someone rather than by someone. Besides, I always seemed to get the guys who were trees with no trunk action or the American Bandstand dance contest rejects. After years of scorning proper touchdancing, I found out that two-steppin' is fun.

I still recall when my equally inexperienced dance partner and I ventured down to the Rocker for our first Monday lesson.

I was surprised to see couples as non-country as my partner and me in a bar that surely had seen many a real tobacco chewing cowboy. A pony-tailed sorority girl in shorts, a tall lanky guy who had trouble coordinating his walk much less his dancing, and some "preppies" were all part of the same group.

Our instructor told us not to get frustrated — it's easier than it looks. Within 5 minutes I was frustrated, and I thought it was harder than it looked! My head was dizzy from going around in circles, my sweaty palms couldn't hold on to his, I had stepped on his feet a hundred times and he had returned the favor. Because I'm lefthanded I confused matters by naturally turning left instead of following his lead to the right.

Just when I was about ready to sit down and cry, we made a back pass without any effort. Then other turns started to work and soon we could do a slide, a window, and a sweetheart hold.

Four weeks later we were doing pretzels, double windows, sweetheart figure 8's and Texas two-steppin' — Kansas style. To anyone who thinks he can't learn swing dancing, I say, as they do in the Cotton Eyed Joe, "Bull —!"

Yes, swing dancing is really a blast and you can bet I'll get right back to it as soon as I recover from my dislocated shoulder. **RP** by Susan Arnoldy

*Swing assignment* — Dennis Wells, senior in feed science, and Linda Brown, Manhattan resident, practice moves during their swing dance class in Aggieville.

# Frisbee and Hacky Sack 'ultimate' games

Recreation: it means different things to different people. While some may find the wrist action of tipping a cold Coors stimulating enough, others devote leisure time to developing skills in games of challenge and finesse.

Games that became popular on the campus are Hacky Sack, Frisbee Golf and Ultimate.

Hacky Sack is played with a small leathery sack filled with beans and became popular in many residence halls. The object is simple in theory. All that is required is to keep the sack in the air by using any part of the body but the hands. In practice the game looks like a twisting torture for flying arms and legs.

"The game does not require any special talent, just limber people," Charlie Ray, sophomore in computer science, said. ♦

*Kickin' —* Dave McNaghten, junior in architecture shows his skill with the Hacky Sack ball. The game makes for limber limbs, as players attempt to defy gravity to keep the ball in flight.

Scott Williams

*Looking for an out —* Brad Loucks, senior in milling science, searches for a teammate, then sneaks the Frisbee past guard John Steeves, junior in pre-veterinary medicine during a game of Ultimate.

According to Ray, the game calls for agility and coordination and is now being used in other sports as a warm-up exercise.

"We like to warm-up with a game of Hacky Sack before we play Ultimate," David Zentz, senior in marketing, said. It loosens up the muscles and puts you in better condition to play."

Developed in 1968 by Joel Silver and Buzzy Hellring, of New Jersey, Ultimate is a Frisbee sport that requires running as well as catching and throwing skills.

At K-State students get together for a "friendly" game only to discover that the pain of twisting limbs is overlooked in the midst of competition.

"The game can get pretty intense at times," laughed Mark Styles, senior in biology. "It's a lot like soccer or basketball in that it can be real hard on the body."

Members of the K-State Flying Disc Liberation Army are well acquainted with sore joints and even occasional knee surgery, but despite these, they continue to support their sport.

According to Zentz, the club started informally with friends calling each other to start a game when they had free time. After being kicked off their playing field at the Old Stadium, however, they decided to become affiliated with the University.

"We used to play on the field where the band practiced, but we got kicked off that too," Zentz said. Now that the

club is registered with the University, it is allowed to play by checking out the stadium for a certain amount of time.

"We don't get to play that often, so when we manage to find time when all of us aren't busy we go for a game," he said.

In a typical game of Ultimate, the object is to gain points by scoring goals. It is similar to football because it is played on a field that is approximately the same size, but no contact is allowed. The frisbee may only be passed, and a goal is scored when a player successfully passes the disc to a teammate in the end zone which that team is attacking.

With seven members on each team all scrambling to gain control of the same object, play becomes fast and furious.

"It's like any other game, how good you are depends on how much you play. It takes practice," Zentz said. While the K-State members play primarily for enjoyment, they also enter tournaments and competitions with teams from other areas.

"It's a lot more involved than you would think," Styles said. "The half dozen teams that qualify for nationals are very serious about their game." Each team tries to psych out the opposing team by developing interesting defensive and offensive strategies, he said.

Styles played Ultimate when he lived in California and found enthusiasts to be

even more zealous there.

"It's amazing, for some guys it's like a job. People get to the point where they really devote a lot of time and energy to it," he said.

When members of the K-State club travel to tournaments the money must come from their own pockets. Entry fees for each team can be anywhere from \$30 to \$50 and if many teams are represented, incentive increases accordingly, Styles said.

"We recently went to Springfield, Mo., for an Invitational," Styles said. "We weren't taking things seriously — just going mainly to have some fun but we made \$225."

For Frisbee enthusiasts more interested in developing the individual aspect of the sport, there is Frisbee golf. According to Styles this is one of the highest paying Frisbee sports because there is a professional disc golf association.

A 14-hole golf course is located on the K-State campus but players are careful to play when it isn't crowded with students going to class.

"We made a map of the course for Rec service to distribute so that people would know where we were playing," Styles said. "We try to stay on the edges of the campus because not too many people appreciate getting a frisbee thrown in their face." **RP** by Sharon Riley

Rob Clark

*The eyes have it*

# From clutzy frames to sexy eyes

You've noticed us before. We can't venture into Kansas wind without becoming teary-eyed and we often have blinking fits of 10,000 blinks per minute. Our eyes are always bloodshot by 10 p.m. and we can often be seen swirling our eyes in outlandish directions. We are the contact lens wearers on campus.

We're so cool! No more covering our youthful faces with repulsive, unalluring glasses. No more flirting and "making eyes" through thick, clutzy lenses. Never again will we need miniature windshield wipers for our glasses in the rain. With contact lenses, the poor-sighted college student has it made.

Well, almost. After initially purchasing contacts, deciding what color, type and size, and going through training sessions to learn to use them, new contact wearers are all set — except for a few minor difficulties that are never mentioned by the eye doctor.

It's important for wearers to train themselves not to blink excessively. Over-blinking is a dead giveaway for new contacts and women will find themselves attracting unwanted attention in bars. Wearers should always be able to recall how to remove their contacts, whether it's after pulling an all-nighter at Seaton or returning from the two-for-one special at Kite's.

Once the minor difficulties have been mastered, the new contact lens wearer still cannot be considered a professional wearer. He can only become a true pro if he learns to handle the dilemmas that even longtime wearers unfortunately but inevitably face. Jane, typical lens wearer, fell prey to such a situation. There she was, on her first date with Rick, the fraternity man of her dreams. The dark movie theater was the idealistic setting to let her imagination run wild with fantasies about the gorgeous guy sitting beside her.

The evening was progressing the way Jane wanted when halfway through the movie, disaster struck. A speck of dust plopped into her left eye and scooted under her green-tinted contact lens. Jane tried to remain calm, determined not to annoy Rick with her excruciating pain. She tried to get rid of the speck by blinking lightly, but it was persistent. She blinked harder. Soon she was sniffing, dribbling and drooling. By this time, Rick, a non lens wearer who had no idea that Jane wore contacts,

couldn't decide if she was some sort of weirdo or if she was drooling over him.

Finally, the speck was out. Jane desperately tried to regain her composure, but it was difficult. She was left with a flushed face, bright red eyes, matted eyelashes, dripping mascara and a runny nose. For some reason when Jane bumped into Rick in Aggieville the next night, he couldn't seem to remember who she was.

Ernie also suffered through a situation only a pro could handle. He was sprawled out in his chair in psychology lecture, his last class on Monday afternoon. Totally bummed out after a wild weekend, Ernie was having trouble staying awake. When he closed his eyes Ernie felt an itchy sensation from his contacts, but he was too tired to worry about it and fell sleep.

He was awakened by the sound of moving students. He assumed they were leaving class. He couldn't tell for sure because his eyes were dried up and his eyelids stuck together. Ernie managed to wrench his eyelids apart but normal sight was still impossible since there was a hazy film covering each contact. With eyes burning, Ernie stumbled out into a stinging Kansas wind. His ten minute walk back to the dorm seemed like an eternity.

Jane and Ernie are not alone. I've had

my own share of experiences with contacts. I made my Art History class a lot more interesting one afternoon. We were in the middle of an exam when I took time out to whip my head around and give the cute guy behind me the eye and my contact popped out. I whispered urgently to everyone in my surrounding area not to move. I was crouched down, frantically searching, when a guy two rows down whispered too loudly that he found my contact. What could I do when I, along with three hundred other students, heard him scraping my contact along the floor as he tried to dig his nails under it to pick it up?

Despite never-ending predicaments, most wearers wouldn't give up their contact lenses. Look for us on campus. Whether on hands and knees in the Union looking for another lost contact or walking through campus with tears streaming down our faces from a strong wind, we'll brighten up your day with a good laugh. **RE** by Beth Bowen

*Right on target* — Doug Allen, senior in milling science, puts in his contact lens. Contacts are purchased to improve eyesight, but also for social reasons.

*Complicated accessories* — Part of wearing contact lenses is learning to use solutions and machines for both hard and soft lenses.

photos by Rob Clark

---

There is a devastating plague descending upon college campuses across the country. Here at K-State it is responsible for such afflictions as malnutrition, nausea, and in some of the more extreme cases, trips to local restaurants. This article wishes to take an in-depth look at the third largest killer of young males: student cooking.

Although it afflicts both male and female alike, the majority of student cooking fatalities occur in males. In reviewing past case studies it has been found that male college students living in isolated areas with access to cooking utensils are highly susceptible to the student cooking syndrome (SCS). Female students, although demonstrating a much lower affliction rate, are also susceptible to SCS.

Why has there been such a rapid expansion in SCS related illnesses? The primary reason has been a lack of knowledge on the part of the student toward preventive measures. In a landmark study conducted here at Kansas State University by the Committee for Student Sickness Prevention (CSSP), guidelines have been established for the novice student cook. The following is a brief summary of the CSSP's recommendations.

---

# Guidelines set for student cooks

Student cooking has been one of our largest concerns since the establishment of the Committee for Student Sickness Prevention. Although many attempts have been made to alleviate this problem, the rate of student cooking illnesses has continued to increase.

It is therefore the decision of this committee to release general guidelines for the prevention of cooking illnesses. We hope that by making the average student more aware of the dangers involved in cooking, a reduction in uncontrolled cooking will soon follow.

Male students have the most limited information and experience in regard to cooking. This is not surprising due to the large number of barriers faced by the male student. Many cultural taboos exist for the male student cook. One of the most severely emotional trials experienced by the male student is having to shove his hand into a turkey to reach the giblets inside. However, this report does not wish to limit itself to the male student. Therefore, the following guidelines are universal in application.

When cooking on overhead burners the following should be kept in mind. On a gas range it is not necessary to have flames extending up the sides of a saucepan or kettle. Although this is a common practice in many Tarzan reruns, it is not necessary in domestic application. On an electric range it is more difficult to judge the heat being applied. However, when lighting in the

apartment begins to flicker and dim, it is generally a good indication that the burners may be set too high. When using the oven on your cooking unit, it is recommended that the controls not be turned beyond their numbered heat range. If pans become welded to racks inside the oven, or if clothing bursts into flame when the oven door is opened the controls are also probably set too high.

In cooking over a charcoal brazier, one should avoid wearing shorts or low-cut blouses. Getting a drunk guest to feel the charcoal in an attempt to find out if they are lit, is not considered responsible or socially acceptable behavior. Starter fluid should not be used in an attempt to get the food to brown evenly.

Leaving steak to thaw on a counter for several days is not recommended as a tenderization process. If a tenderizing utensil is not available, it is not recommended to slam the cut of meat on exposed counter edges or uncooperative roommates. Not even in extreme cases should the meat be tenderized by holding it in the hinge of a refrigerator and slamming the door repeatedly.

Stuffing a turkey does not involve the use of cotton packing, glass eyes or nailing the bird to a wooden base.

When opening canned goods an attempt should always be made to remove any metal filings that have fallen inside. If canned goods explode when the can-opener is first applied, it is usually a good indication that spoilage may have

occurred. No canned food product should be eaten unless it is at least the same color or remotely resembles the product on the label.

When eating cereal and encountering a particularly crunchy item, it may be in the student's best interest to simply swallow rather than look to see what the object was. When looking into a cereal box and finding that the contents are moving, it is recommended that the cereal be discarded.

The use of hallucinogenic mushrooms as a pizza topping is a dangerous practice, and should not be used in an attempt to get mom and dad to loosen up on Parents Day.

In conclusion we would like to quote Dr. Thomas L. Rankin, director of the Clinic for Cooking Rehabilitation (CCR). Dr. Rankin has developed three axioms of self-preservation for the novice student cook.

- Never eat anything your roommate has prepared, unless you have assisted in the preparation.
- Dispose of all cooking catastrophes at government designated landfills.
- Never try to cook anything that is bigger than you are.

It is hoped that this article will make the average K-State student more aware of the dangers involved in cooking. Through scientific research and proper control, SCS related illnesses can become a thing of the past. **by Larry Meysing**

# Looking closer: K-State has its fads

Mick Jagger never did have a stop-over in Ahearn, and Brooke Shield never modeled Calvin Kleins in Justin Hall, but K-State wasn't oblivious to national fads. There were plenty of marketed crazes to tide students over for entertainment. Picking all of the new fads and fashions out of the picture, as well as some traditional K-State stereotypes, like GDI's, preppies, and the ever-present cowboy, should be easy for the experienced K-State watcher. Look again though, because just like the campus itself, there are always more aspects involved than first observed. 

*Character list* — Thanks to Sarah Neustrom, Kelly Presta, Rhonda Williams, Merilee McCaustland, Layton Smith, Liz Lawless, Chris Kelly, Barb Glenn, Doug Winter, Max Eulert, Tony Firmer, Andrea Baldauf, Cleion Whitebread, Fritz Edmunds, Jill Hummels, Everett Gardner, and Joyce Kracht for being in the photograph. Special thanks to Dave Jacobs for helping set up the lighting.

staff photograph

## International friendships help

# Visitors find transition difficult

Many international students in American schools return to their homelands thinking Americans are "apathetic, racist, and unfriendly."

This is what Bob Taussig, professor of surgery and medicine, learned during the time that he and his wife, Mary, were missionaries in Africa. They talked to countless Africans who had returned home after two to six years in American schools, and what they heard disturbed them.

"They didn't like it here," Taussig said. "In their countries, foreigners are welcomed, invited into homes and visited. They come to America expecting the same treatment. When they don't get it, they withdraw from American society."

Americans often ignore international students. "Americans don't know what to do. They're shy," Taussig said. Additionally, Americans have their own friends, and are generally "ignorant of the rest of the world," Taussig said.

Many international students who arrive during the summer have a tough time finding an apartment and getting started.

Leila Lobo, a graduate student in foods and nutrition from Bombay, India, is one such student. "There was no one to help me the first ten days. I'd just been left to fend for myself."

Elvira Dumayas, a graduate student in agricultural economics from the Philippines, had similar experiences. Other Philippine students helped her much more than Americans so they are the first people she goes to when she needs help, Dumayas said.

To combat some of the problems international students have, and to develop cross-cultural communication, the Taussigs began inviting Africans into their home in 1976.

"We tried to do things for them. Most of them were feeling isolated," Taussig said.

Soon, more Africans were coming over to their home than the Taussigs had time to visit with or help. They began to appeal to local churches for help in 1977 and then to Campus Christian Fellowships in 1980 for volunteers to create friendships with international students.

In 1978 a program was started called Helping International Students, or HIS.

Currently, 230 Americans are paired with 280 international students. The pairs are divided into smaller groups of 10 to 15 pairs, each with a unit coordinator.

"The unit coordinator reminds Americans to contact their international friends, and finds out how each relationship is developing," said Janet Maxwell, a former unit coordinator. Each unit functions separately, with a variety of activities for the group to do together. Potlucks, holiday parties, and picnics are popular.

The success of HIS "depends upon the attitude of each American involved and what their commitment is to the program," said Susan Denzon, graduate student in agricultural education from the Philippines.

Amy Malone, junior in business, said about the program, "They really need to screen Americans to make sure they're willing to give time and effort to the relationship. HIS needs to be sure people don't have 'the poor little international student' attitude. Foreign students are just as good as we are. They can sense when we're looking down on them."

David Riffel, senior in architecture, said that some Americans are not putting their whole heart into the program. "HIS is serving a purpose, but it could be doing more."

Another important factor to the success of HIS is that each American take the initiative in developing the relationship. But many international students have never been contacted by the person who signed up to be their friend.

Leila Lobo had not been contacted by her American friend as late as Thanksgiving. "The first thing I did was go to the International Student Center," she said. "I signed up Aug. 10 (for an American friend). I was the first to sign up I think. I was really disappointed."

In some situations, Americans have trouble contacting their international student because of housing changes the students make. To avoid this, international students are asked to contact the ISC after they have moved, so a Taussig can inform the American.

Although housing changes are a reason for lack of communication, Taussig said, most of the failures in

communication are usually on the part of the American.

When commitment occurs, however, there are often positive results. "Mary Taussig, Dr. Taussig, Sally Coltrain, and Dr. Shaver, who to me represent the HIS program, were the very people who encouraged, inspired and gladdened me up during my first days at K-State," Denzon said. "I was depressed, confused, lonely and I almost sank. But there they were, calling me up, comforting me, and encouraging me. They even invited me to their places. I surely can't forget them."

Communication is necessary, but sometimes difficult to achieve between international students and Americans involved in HIS. A student who wished to remain anonymous said he found Midwesterners to be superficial in their conversations with him. He feels Kansans keep their distance from foreigners, pointing out that he never sees Americans and international students mixing in the Union.

"It's really hard sometimes to get past the superficial level," Malone said. But she has successfully crossed the cultural barrier in her relationships with two friends from Malaysia. "I've been blessed with two really outgoing friends. They're willing to communicate. We're willing to accept each other as we are and we aren't trying to change each other."

Both international students and Americans see the HIS program as a success.

Denzon changed her attitude towards Americans because of HIS. "I expected Americans to have superiority complexes and to be snooty, but I have found them to be helpful, open, friendly and independent."

Maxwell also believes the program is a success in giving international students a positive reaction to Americans.

"There is so much you can learn," Maxwell said. "Americans almost can get more out of HIS than the international students if they are willing to spend the time."

"HIS is great," according to Dumayas. "It's a good way of helping international students and helpful if you have a language problem. If we have a question or a problem, we always have someone to go to." **RD by Heidi Bright**

*Friends* — Wan Asma Ibrahim, sophomore in chemistry, Amy Malone, junior in business, and Hing Chong Pheng, freshman in food and science industry, enjoy the accompaniment of one another. The trio met through the Helping International Students Program. Ibrahim and Chong are from Malaysia.

Al-Anon, Alcohol Abuse Prevent Center offer help

# Drinking takes toll on some students

Mike, a K-State student, one day woke up to find that he was failing in school, his wife and child were gone, and that he had lost all his friends. Even then he wouldn't admit to himself that alcohol was causing his problems. Mike eventually dropped out of school. After finally realizing he needed help, Mike turned to Alcoholics Anonymous.

"I went to an open meeting ('open' means that the public may attend) and found nobody was there to judge me. It was just people sharing their personal experiences with alcohol, giving strength and hope to each other. I found out I wasn't alone."

Mike admitted that he was powerless over alcohol — that his life had become unmanageable. He had taken the first step of the twelve steps to recovery of AA.

"The alcoholic has not learned to cope with life. His mind basically self-destructs. A normal person gets a hangover and stays away from it (alcohol) for awhile, but not the alcoholic."

"The chains of alcohol are too strong to be felt until it is too late," Mike said. "Many (alcoholics) pursue the idea that they can handle their drinking. In reality it just doesn't work. One drink is one too many for the alcoholic."

After not drinking for awhile, Mike drank a beer. He went through this episode more than once. Each time he went through the same personal hell:

lack of control.

"I am a recovered alcoholic, but that does not mean I am cured. I take one day at a time."

According to the National Institute on Alcohol Abuse and Alcoholism, two-thirds of the adult population in the United States drink at least occasionally. Among the youth of this country, a survey found that most American adolescents have had experience with alcoholic beverages. Almost 80 percent have had at least one drink; about 74 percent have had at least two drinks; and over one-half of all adolescents drink at least once a month.

Even after months of treatment, alcoholics do not find it easy to stay sober, according to experts. They are forced to revise their whole life style to exclude alcohol. Some turn to religion, while others rely upon a close-knit family relationship or membership in Alcoholics Anonymous.

In 1978, an alcohol-related behavior survey taken at K-State showed freshmen as the most frequent alcohol users on campus. The same survey taken in spring 1981 showed two improvements in behavior. There was a 13.2 percent decrease in driving after drinking along with 17.2 percent more persons suggesting that a friend should decrease his drinking.

Another survey at K-State showed a 70-80 percent correlation between misconduct cases in residence halls and

alcohol abuse.

The surveys were taken by the Alcohol Abuse Prevention Program at K-State. The program is not a professional counseling agency, although it works closely with professional counselors, said Laura King, director of the program. Counselors from the Pawnee Comprehensive Mental Health Center are available at Lafene Student Health Center free of charge.

Alcohol Abuse Prevention sponsored a media campaign in the Collegian and Manhattan Mercury about alcohol use and abuse. They also held a Second Annual Alcohol Awareness Day in October. Some of the topics in the information-sharing activity were drinking and driving, alcohol violence, alternate activities to drinking, women and alcohol, coping skills and counseling. Also available were free samples of non-alcoholic beverages.

The program focused on having an "uncocktail" party. It also provided tips for a party serving alcohol.

There will always be alcohol at K-State, but the Alcohol Abuse Prevention Program hopes to encourage responsible use only.

"There is nothing wrong with alcohol if it is used in moderation," King said. **By Susan Arnoldy**

**It all "ads" up** — The Alcoholic Abuse Prevention Center ran a series of advertisements in the Collegian encouraging responsibility towards drinking. Pat Honors, senior in fine arts, designed the ads for the Center.

## You are about to enter a world of darkness, danger, and intrigue. You are about to

So, you think you know a lot about K-State. Think again. Oh, you may have finally unraveled the mystery of registration, and perhaps you've even been through drop-add and are still living to tell about it.

Yet, even if you're one of the few who found Seaton 63 on the first try, you may not know about one of K-State's most intriguing features.

Used by the University for mechanical purposes, the tunnels that run beneath ground all over campus have become a secretive amusement for students. "Going down" into the tunnels can be highly charged with adventure and more frightening than a haunted house.

After your feet meet each rung of the ladder with caution, and finally touch solid ground, your anticipation of the journey ahead mounts. Immediately to the right is a stagnant pool of water of indeterminate depth. The heat of the small room you are in is overpowering, and the smell that accompanies it is revolting.

Turning to the left, there is a decision to be made: which tunnel to explore? It is decided that the adventure will begin with the brick and concrete tunnel on the right. A necessary flashlight cuts through the dark and reveals a shoulder level pipe along the left wall that carries steam heat from Seaton to points south. Bundles of bare wires accompany the pipe.

For some distance the ceiling runs about six feet high, but it decreases and suddenly it is necessary to crouch.

artwork by Ken Young

Because of a large steam pipe, the width of the tunnel is now only about three feet.

The heat in the tunnels is extremely dry and may reach 150° F, according to Fred Ferguson, director of building utilities for University Facilities. Indeed, after 15 or 20 minutes in the tunnel, the heat begins to smother you and the fear of suffocation invades your thoughts. The imagination takes over and breathing becomes laborious.

A seam in the steam pipe emits a rush of scorching steam that is definitely to be avoided. Dick Lewis, assistant supervisor of the pipe shop in the power plant, said these leaks are strong enough and hot enough to sever a broom handle.

Because of an overabundance of pipes, the tunnel becomes almost impassable after about 15 minutes of exploring. The best plan appears to be retracing steps back to the starting point, and getting back to the cool air of campus.

Fourteen separate tunnels wind beneath the K-State campus, leading from one building to the next, and eventually to the power plant that provides steam for most buildings on campus. They are utility tunnels, used for protecting steam pipes and returning condensed steam back to the power plant for re-use.

Ferguson expressed concern about the number of students going down in the tunnels for amusement. Although he knew of no disciplinary policy for those

caught in the tunnel, he agreed with Lewis that the safety hazard needs to be taken seriously.

Lewis warned that if a leak had enough pressure behind it, it could seriously injure someone who walked through it.

A common rumor among students that the tunnels could be used as protection in case of military or nuclear attack was disputed by Ferguson. He said that if the steam were turned off people could go down, but the tunnels do not have room to accommodate all the students.

A more fantastic story among veteran tunnel explorers is that a congregation of devil worshipers at K-State performs rites in the tunnels near Farrell Library. Although Ferguson and Lewis were both vague about this point, they agreed that the tunnel near the library is blocked off at both ends by large fences.

Some students are convinced that the devil's followers hold meetings in the tunnels. Tom Adamson, junior in construction science, claimed that in an excursion with his older brother, they encountered two men wearing black capes.

"We saw 'em and we took off," Adamson said.

Even with the risk involved in tunneling, students continue to go down and to share their newfound amusement with friends. Perhaps it is the risk that makes the adventure so exciting, and the accounts so dramatic. **RP** by Lisa Hooker

# GO TUNNELING

*Better than a diving board* — Manhattan residents enjoy the fun Tuttle Creek has to offer. Whether boating, fishing, swimming, basking in the sun or diving off trees, Tuttle is the place to be in the middle of a scorching Kansas summer.

*Lunch with Mozart* — Ronald Grun, Dan Kelley and Richard Goldfarb, forming the group Mozart on Fifth, serenade the lunchtime crowd in front of Burger King on Poyntz Avenue. The trio of two clarinets and a basson was on tour from New York.

Scott Liebler

# Students bite into the 'little apple'

**M**anhattan: the little apple. And yet somehow the apple doesn't seem so small as 20,000 students from all over the country pour into Manhattan for the start of fall classes.

The town swells, ripening with the additional commerce. Stores shout their specials from display windows and tavern owners breathe a sigh of relief. The campus is once again buzzing with activity.

For a handful of students this scene is a little overwhelming. Those that see it after spending the summer in Manhattan find it a definite contrast to the relaxing months they may have spent as simply a "Manhattan resident".

"The pace is much slower. Everything is more relaxed," Marty Athey, junior in arts and sciences, said. As Athey explains, living in the town for the summer makes one realize that Manhattan and K-State are not necessarily synonymous.

"The town just seemed friendlier to me, more personal. The bars were less crowded and it was easier to meet people. It wasn't such a big place where you get swallowed up by the masses," she said.

Like other K-State students, Athey found the relaxing atmosphere of the

summer a refreshing break from the frenzied college lifestyle.

"I didn't go to school so I had the chance to do some different things. I got to know Manhattan better. Also, all my friends weren't up here so I got closer to the ones that were."

While Manhattan does settle into a peacefulness in the summer that many students never witness, it is not without recreational activities to keep residents occupied.

"There's usually always something going on here in the summer," Ann Link, senior in home economics, said. "I especially liked the Arts in the Park because it's free and there's a lot of people that go to it."

Arts in the Park is a program sponsored by the Manhattan Recreation Commission that involved 52 performances consisting of children's theater, national tours, and local bands.

"It's a nice thing to do on a summer evening," Link said.

Greg Johnson, senior in accounting agreed. "They had some terrific concerts and there were always a lot of people standing around, getting together, or playing frisbee. Every night of the week there was something going on," he said.

Though Johnson was a full-time

summer school student, he said he still found time to do the things he enjoyed, like waterskiing, playing tennis and watching softball games.

"I feel like I learned more from the summer school classes than from the classes I took over a semester," he said. Johnson said the main reason was that so much material was condensed in so short a time he was able to retain more.

"I went to school five days a week and at tests it seemed like I'd just studied the stuff the other day."

Johnson also said he enjoyed Aggieville more since it was less crowded. "It was more laid back. There were no tremendous crowds. Some friends and I would go for three-fers at Aggie Station and we didn't have to fight our way through."

Working at a local pizza parlor also gave Johnson the interaction with different age groups that he missed during the school year.

"Right before all the students come back, a lot of the stores had specials. Kind of a break for Manhattan residents and I got into that. I got to meet a lot of people outside of the University, older and middle aged couples too," he said. **RP** by Sharon Riley

Allen Eyestone

Manhattan twinkles — The view from K-Hill overlooks Manhattan.

*Sharing is the key*

## Roommates: male, female or both

“ . . . I’ll give you shelter from the storm.” Shelter. One of the most basic of human needs. Sometimes it’s simply a tent in the forest. It could be a mansion in Beverly Hills. But it probably is neither of those extremes.

In a college town like Manhattan, not only is the question one of shelter, but who to shelter with. Roommates can make a year, even a semester, seem interminable. But good roommates can make a six-year college career whiz by like four.

Twenty-five years ago most college students lived either in what were then called dormitories or other organized living groups like fraternities and sororities. Today, the range of choices is greater, and living arrangements are more varied. In fact, in recent years, more students have chosen to live off campus than on.

Off-campus housing can take many forms. One of the most common of which is the two-man “bachelor pad” of singles-set fame. More often than not, this “pad” becomes simply a haven for dirty dishes, full-to-overflowing trash bags crammed with beer cans, assorted issues of *Playboy*, *Penthouse*, *Sports Illustrated* and tons of old newspapers.

Another common arrangement is two women living together. This type is typified by various issues of *Vogue*, *Glamour* and — for the truly cosmopolitan and risqué — *Playgirl*, displayed in an orderly fashion among a jungle of plants that would make any botanist swoon.

Following closely behind in popularity is cohabitation. New views of sexual morality have increased the acceptance of this new arrangement. Living with a member of the opposite sex has always held a certain charm, and now has little or no social stigma attached to it. Unless of course you talk to Mom and Dad.

But some off-campus living arrangements are extraordinary. Some intrepid souls are willing to try almost anything during their college years. Think of having a big family, with no time to get used to your brothers or sisters. No break in period of five years or so to get your bearings. No parents to mediate the inevitable squabbles. Right here, in Manhattan, Kansas, Heartland USA, there are some strange cohabitational arrangements. There are houses full of five or six men,

or the same number of women, or a combination of both. Add to this the omnipresent pets and other hangers-on, and some of these accommodations become almost comic.

Imagine a stately old house in Manhattan occupied by two men, four women, a cat, some goldfish and an Irish wolfhound. Collecting for bills from all these different people creates problems. Who will wash the dishes? Who takes out the trash? In these situations, the most carefully planned schedules tend to blur into a jumble of statements like, “It’s not my turn, I did it last week,” or “It’s not my dog, so I’m not cleaning that mess up.”

Of course, many of these arrangements involve a certain amount of sexual interaction. Inevitably, there is some attraction between people who have lived together for a while. Romances develop, and some even last a lifetime.

But because of the rising costs of everything from rent to food to utility bills, not all male-female living accommodations are of the carnal nature. It is not unusual to find two compatible people of the opposite sexes who are sharing room and board — and nothing else — as a cost-cutting measure. Separate bedrooms, separate lives, the same house. These places look much like an amalgam of the male-male and the female-female arrangements. The *Sporting News* is carelessly tossed atop a copy of *Cosmopolitan*. The plants are there, but not quite as many. And her cat and his dog stay out of each other’s way. Not surprisingly, these arrangements tend to work out. The pressure is off, there are no commitments (other than bills, of course), and the relationship is relaxed.

This is not to say there are no problems. In any situation involving two people, there is bound to be friction. Who uses the bathroom when, and for how long, can sometimes be a problem. In fact, in a recent scientifically conducted study, five women who live platonically with men have said that men spend too much time preening, and the women are unable to get into the bathroom themselves. But there is one major advantage to living with a person of the opposite sex. It is very easy to get rid of a date who turned out to be a dud. **RP** by *Jim Laurencig*

*It all fits — Part of living together, whether a male-male, female-female, or male-female arrangement, is sharing. From kitchen cabinets to dresser drawers to the bathroom medicine cabinet, organization of belongings is necessary.*

# Gift givers 'gram' it up, using balloons

Sending flowers isn't always the best answer anymore when wishing to send a special message to a friend. K-State students discovered bellygrams and balloon-o-grams, both begun in August, to be unique, personalized gifts fitting many occasions.

Bellygrams are specifically intended to entertain males. "Rasha" and "Marisha," professional bellydancers, started their own bellygramming service in Manhattan. They did bellygrams anywhere from hospitals and campus offices, to bars, fraternity houses and residence halls.

Rasha, who preferred not to use her real name, said she always has an escort go ahead of her and single out the intended recipient. Then, in bellydancing costume complete with harem pants, Rasha makes her entrance. She clicks her finger symbols to the Middle Eastern

music she brings and dances around the usually startled recipient. She proceeds to take off her scarf and make a turban out of it on the receivers head.

"This always goes over big," Rasha said. "If the person can stand up (sometimes they're too drunk), then I try and get them to dance with me. Some are shy, but others try and dance a little. Sometimes the crowd gets enthusiastic and claps along to the music. It's fun to get a large audience response."

It seems that the audience might get a bigger kick out of the bellygram than the receiver does. "Some people just look at me as though they want me to go away," Rasha said. She always brings a message along to the receiver telling him who sent the bellygram.

Mitch Lee, freshman in accounting, was in the middle of his fraternity's (Phi

Kappa Tau) formal dinner when Rasha danced for him as a birthday surprise. "She danced for (what seemed like) hours," Lee said. "I was embarrassed and really red. She put this turban on my head and I just got redder."

To let Brian Herbel, junior in business administration, know he was appreciated, a floor of girls from West Hall sent him a bellygram before Christmas break. Rasha danced in the lobby of Haymaker Hall for him. "I didn't know whether to look at her or not," Herbel said. "I felt like I was alone in the middle of a football stadium and everyone was watching me. There were about 70 guys there."

Bellygrams were complimented by balloon-o-grams, which were started by a local business. Six brightly colored, helium-filled balloons tied with satin ribbons and strung to a container filled

# and bellies

with caramels, cinnamon, butterscotch, and peppermint candies, balloon-o-grams were about \$12, about half the price of a bellygram.

Almost resembling a miniature hot air balloon, it carries a message card naming the sender. A care and maintenance card, also attached to the balloon-o-gram, said that the balloons are filled just prior to delivery, and float for 12-14 hours.

Sheryl Setter, sophomore in fashion marketing, received a balloon-o-gram as a surprise from friends. "We were all sitting in the Union eating lunch, when the deliverer brought in the balloon-o-gram," said one of the senders, Connie Kolch, sophomore in fashion marketing. "She started singing Happy Birthday. I think Sheryl wanted to hide, but the attention we got was all part of the fun." **REP** by **Beth Bowen**

**Tongue tied** — Tom Patterson, part-owner of Import Car Parts in Manhattan, enjoys his 55th birthday surprise; a bellygram from Marisha. Although many of Rasha's and Marisha's bellygrams are performed for college students, some of their business takes them into Manhattan, and as far as Wamego and Ft. Riley.

John Zidek

**Birthday surprise** — Barbara Ott, junior in accounting, picks up her balloon-o-gram from Karen VanMeter, sophomore in business administration, at the front desk of Goodnow Hall. Balloon-o-grams were delivered many places on campus from residence halls to the Union Stateroom.

Jeff Taylor

*Shout* — Kevin Hensley, fifth year student in architecture, and Ginny Fortmeyer, senior in agronomy, let out a yell during the first day of the 64 hour event.

*Final hours* — Bump-A-Thon dancer Kathy Garrison, junior in journalism and mass communications, and 11-year-old Kevin Mesloh from Silverlake, dance to raise funds for Muscular Dystrophy research.

## The 64 hour dance

# Bumping for Jerry's Kids

**T**hey could have danced all night! Anyone who has tried dancing "all night" knows how tiring it can get. Add two nights and three days to that and there is quite a challenge. Nevertheless, eleven couples took that challenge in the form of the 8th Annual Muscular Dystrophy Bump-A-Thon. Mother's Worry was the site of the 64 hour marathon dance in January. Of the 22 dancers that began, all but one danced the whole marathon.

Kathy Garrison, junior in arts and sciences, said that the encouragement she received from the other dancers, as well as those who came to watch, kept her spirits up and her feet moving. "Just having other people there to talk to was excellent. They kept my mind off the 64 hours," she said. "The people who gave foot rubs were really good."

Garrison also said that the friendships formed were the best part of the dance. "I've seen the friends I made since then and it's like we know each other well," she said. "We just spent so much time together. I met a lot of new people and got closer to the ones I already knew."

Terry Schroff, senior in journalism and mass communications, echoed those sentiments. He noted the "camaraderie of everyone there" as the best memory of the dance. "Everyone kept each other going," he said.

The Bump-a-Thon raised about \$10,000, according to Mike Mueller, president of the Bump-A-Thon executive council. The proceeds went to the Muscular Dystrophy Association. Mueller, senior in biology, said that the total was half of what was raised in the past two years.

"We got more people to come down to Mother's and support it," Mueller said. "It's just that people weren't giving money. We also didn't have as many couples dancing. We usually have about 20. Everything else went well and ran smoother than in previous years."

Schroff also noted the lack of dancers. "It's underrated by a lot of people. People get a slanted view when they look at the time element of the dance," he said. "I used to think that way, but now I encourage everyone to give it a try."

The money raised came from pledges to the dancers and other money-making events. There was an auction at Mother's Worry, a KMKF radio auction, a jail that students paid to put friends in, and a goldfish swallow.

"Yeah, they were real goldfish," Mueller said. "I swallowed a couple of them. It wasn't that hard. Once you swallow one you can't feel it at all. Then you chug the fish down. It's just the thought of it, watching those things swimming around."

Garrison urged others to participate in the Bump-A-Thon next year. "After you do something like that, you feel like you can do almost anything," she said. "It was so great to finish. I feel so much better about myself." **RE** by Brad Gillispie

# Mixture of

Snow white, snow bright is a complaint of Barbara Mulligan, freshman in pre-design professions. "The snow hurts my eyes." She offers the idea of making the snow psychedelic.

And yet, Kendall McFall, sophomore in grain science, likes the snow for its whiteness, but adds, "if only it would stay nice and white."

As first semester drew to a close and Christmas break approached, the upcoming vacation brought to K-State an abundance of cold weather and, naturally, snow.

Snow brought a mixture of feelings from K-State students. "I hate snow," J. Hooper, junior in computer science, said. Hooper, along with other students, has a multitude of complaints about snow: "It's a mess to drive in," "You can't go anywhere," "It turns black and gushy after a few days." ♦

*Wipe-out* — Jo Lynn Cody, freshman in pre-nursing, and Carolyn Koca, sophomore in office administration, skim the snow on the Manhattan country club lawn, during a bumpy "tube" ride.

# feelings fall with snow flakes

But put most students outside after a freshly fallen snow, and their complaints diminish. It seems almost everyone likes at least one thing about snow.

Even Hooper has a favorite snow sport: tubing. "Tubing is better than sledding because the innertube bounces and the snow doesn't have to be packed," he said.

Hooper also likes to pull someone on an innertube behind his car. This isn't always a leisure ride. Hooper sets two goals: (1) to see how much snow he can get to land on the rider, and (2) to see how quickly he can dump the rider.

After Manhattan's first big flurry, students were out writing messages in the powdery snow. Hooper said this is not as easy as it looks. It's hard to make your letters look good and it's especially difficult to get from one letter to the next without leaving a trail between your letters. "It's easy to fall flat on your face if you're not careful," he said. Hooper thinks the tragic part is

that despite strenuous trudging through snow, when the message is completed, the letters always look out of proportion.

Snowball fights are always popular. Judy Whetzel, freshman in animal science, said she loves to have snowball fights. She shows no favoritism for friends or foes, "I'll have a snowball fight with anyone I can beat."

Whetzel doesn't stop at winning snowball fights either. After beating her roommate, she proceeded to bury her roommate's head in the snow. "She was quite upset," Whetzel said.

Kristen Bosnak, freshman in horticulture, likes snow because it provides the special ingredient for making snow ice cream. She likes the

special taste and "Snow ice cream makes a fun treat after playing in the snow."

Jeff Bowers, freshman in computer science, was in for a surprise when he went home for a weekend to find his mother had been playing in the snow and making snow angels.

"I think playing in the snow is for kids from one to 92," Mulligan said.

Mulligan may be right. K-State students, despite grumbling complaints, seem to have discovered the opportunities for fun that snow offers. And if being "big college students" hasn't stopped them from enjoying snow, then why should it when they're 92? **RP** by Linda Mines

Rob Clark

Hurriyet Aydogan

*Glistening beauty*— As snow envelops the campus in February, Nichols Gymnasium becomes part of a winter wonderland.

*You can't have it* — The weather doesn't hinder Doug Walker, freshman in arts and sciences, and other friends from Moore Hall second floor from enjoying a rowdy game of football in the snow.

# Shooting Star illuminates

If something is only done once, then it should be done right.

Shooting Star's performance in McCain Auditorium in December illustrated that statement. The group's dynamic, high energy rock-n-roll left no doubt in the audience's mind that not only does Shooting Star put on a hard-driving concert, but that a K-State crowd can reciprocate the same energy, creating a combustible, unforgettable atmosphere.

"The crowd was crazy. We really had fun performing," Van McLain, lead singer and guitarist, said.

Shooting Star landed in Manhattan after four months on the road. Denver, San Francisco, Oklahoma and Texas were a few of the places they toured, and, according to Steve Thomas, drummer, "we didn't think we were that well-liked; it was a surprise to sell out shows in San Francisco and Denver."

Although Shooting Star's concert in McCain wasn't sold out before their performance, the auditorium was packed by the time they took the stage. A local band, Plain Jane, warmed up the crowd with a variety of energetic numbers, including the popular song, "Jessica."

After Plain Jane's performance, Shooting Star took the stage, and after a

few numbers it was obvious they had taken the crowd also. They opened their act in a traditional, high-excitement approach with the spirited song, "You've Got What I Need." The group never slowed its relentless pace until the second encore, ending the show with one of their latest songs, "She's Got Money."

Shooting Star's climb to success had been marked by many concert performances, but the K-State show was "exceptional," according to McLain. "It was a great way to finish our tour. We're ready for a vacation now," he said.

McLain's summarization of the show did justice to explaining the scene that night. The crowd remained on its feet from the moment Shooting Star took the stage until the houselights were raised, signaling the end of the show.

Songs such as "Break-out," "Flesh and Blood," and "Bring It On" sparked the crowd's enthusiasm to enormous heights while the older, classic Shooting Star tunes, "Tonight" and "Last Chance" satisfied the group's hard-core fans.

Encouraging yells, foot-stomping and applause from the audience accompanied Charles Waltz, violinist, ♦

Scott Williams

# McCain

and McLain as they performed a class rock-n-roll jam. First the electric guitar screamed out. Then Waltz's violin "talked back." The echoing rhythms grew and grew until the final explosion of a powerful drum solo by Thomas.

Gary West showed his musical talents by moving from guitar to keyboards while singing lead vocals throughout the show.

The overall group effort and the intense response to Shooting Star's performance contributed to a hard-driving rock-n-roll concert that won't soon be forgotten.

"Sure we'll be back," McLain said, "and we'll definitely perform in this type of location."

To the people in the crowd, those promising words should let them believe that, indeed, rock-n-roll never forgets. And if McClain can no longer host musical displays like the one Shooting Star exhibited, with its exuberant burst of a good-times another building somewhere will open its doors to that special magic. **REP** by Dana Neal

*Showman* — Van McLain, lead guitarist and vocalist, hot dogs with the guitar as the show comes to an end.

Scott Williams

*High energy* — A concert-starved K-State crowd shows enthusiasm. McLain, member of Shooting Star, said the show in McCain was exceptional because of the receptive audience.

*Sticks* — Steve Thomas, drummer for Shooting Star, gave a powerful performance in a classic rock-n-roll jam

*Hit or miss?* — At the Phi Delta Theta fraternity casino party, dealer Bret Scoville, sophomore in sociology, challenges the players at his table during a game of Black Jack.

## THEMES

Punked out, prepped out, decked out, bummed out . . . Whatever the attire, the various themes of parties at K-State allowed students to be creative. Imaginations excelled when party goers got together to invent costumes and activities to coincide with each theme.

"Having a theme gets more people involved in the party, more into the spirit of it," Darla Keener, senior in home economics, said. Goodnow Hall, floors five and six, held a Mardis Gras party in February. Keener said there was a large, colorful dragon decorating one wall of the sixth floor lobby. "Girls wore mini-skirts and high heels. People were throwing confetti everywhere."

Students seem to agree that having a specific theme adds to a party.

Terry Cordova, sophomore in engineering technology, donned dark blue pajama bottoms and a blue and white striped PJ top to his fraternity's (Pi Kappa Alpha) pajama party. "People went totally off. Everyone was relaxed," he said, "Some couple wore matching pajamas and girls were carrying around Teddy Bears." ♦

*Ready smiles* — Mike Dougan, sophomore in business administration, and Nina Knoche, sophomore in arts and sciences, show off their Hawaiian attire during a luau party, held in Marlatt Hall.

# ENHANCE PARTIES

"Parties with crazy themes are more fun." Cordova said he enjoyed crazy themes more than semi-formals and formals. People feel tight when they're all dressed up, he said.

Themes often have a special dress code intermingled with a special activity planned for the party. Suitcase parties are popular among fraternities. The men of a house pool their money and plan a trip to send one winning couple at the party anywhere from Las Vegas to New Orleans for the weekend.

Gina Ross, sophomore in arts and sciences, didn't know who her date to the Alpha Delta Pi "Cowboy Crush" party was going to be until she walked down the stairs to leave. Gina said the idea of the party was for each ADPi to make a list of three guys they'd like to go with, and their roommates would set them up with one. Which date the roommates had picked was a kept secret until the last minute. "Not knowing who my date was continued to build up excitement all week," Ross said. "People wore western clothes — bandannas, cowboy hats and boots. The

dress kept everyone relaxed and comfortable."

Relaxed and comfortable . . . essential conditions to starting off a fun party. Themes seemed to put people at ease and get them psyched for a good time. **REP** by *Beth Bowen*

*Happy parties* — Deb Storey, junior in business administration, and Karen Johnson, junior in recreation, both members of the Kappa Alpha Theta sorority, goof off during an "American Bandstand" theme party.

*Predominantly punk* — Kappa Alpha Theta sorority members and their dates enjoy a mellow moment during their "American Bandstand" party. Outfits included punk to anything imaginations could put together.

## Separating the individual from the crowd

The Union Stateroom, Ahearn Fieldhouse, chemistry lecture, the football stadium, and Aggie on a Friday night. At first it may seem to the K-State freshman that everywhere he goes there is an immense K-State crowd, a crowd waiting to swallow him up with its massiveness, so that he is unrecognizable among everyone else. It's not uncommon for the freshman to be overwhelmed by the "strength" that K-State crowds radiate.

Crowds are a major contributing factor to the spirit, excitement and friendliness of the K-State campus. They certainly don't exist to squelch the individualism of students. The K-State freshman will soon realize that the ambition and desire to "stand out" — prevalent in everyone — are very attainable at K-State. And it is the crowd, both students and faculty, that communicates support and incentive to each individual.

Whether the engineering student runs for senator for the College of Engineering, the journalism major spends his nights in the Collegian room, or the art major volunteers her spare time to the UPC Arts Committee, each student has the opportunity to prove and display their uniqueness.

Yes, crowds are characteristic of K-State. From the multitude of basketball enthusiasts, to the sun-hungry mobs who populate Tuttle Creek at the first sign of warm weather, to standing-room-only audiences at Landon Lectures in McCain, the crowds will always be an impressive part of K-State. But it is the individual, contributing original qualities and ideas, who performs with other individuals to create such notable crowds. At K-State, each student is distinguishable. **EW** by **Beth Bowen**

*Close up* — Jacque Horlick, freshman in marketing, enjoys the company of friends in the Union Stateroom. A popular meeting place for lunch and socializing, the stateroom is often packed with students. But a closer look reveals the make-up of these crowds — each individual.

*By unanimous vote*

## Alpha Kappa Alpha joins Panhellenic

**P**anhellenic Council voted unanimously in January to accept Alpha Kappa Alpha, the first primarily black sorority to be admitted into the council.

Susie Hines, senior in accounting and Panhellenic president, said letters were sent to Delta Sigma Theta, another black sorority and AKA during the fall semester asking them to join the council.

Members of AKA decided to join, and once the Panhellenic Council received notice of their decision, a vote of admittance was immediately made, according to Mona Lucas, junior in social work and AKA vice-president.

Delta Sigma Theta was unable to become a member of the Panhellenic Council due to its financial situation, Teresa Switzer, senior in biochemistry and Member of Delta Sigma Theta, said.

"We don't want to be separate and have nothing against Panhellenic, but our financial situation is that we have to look at things realistically," Switzer said.

Panhellenic membership requires that constitutional bylaws are followed, according to Barb Robel, greek affairs adviser. One of the council's requirements is that those participating in rush must have a 2.5 grade point average.

AKA's required grade point average for those participating in rush was 2.0, Lucas said.

Barbara Phillips, AKA national president explained that the sorority has a rush system which differs from other sororities.

Since the council requires a higher GPA for those active in rush, she said AKA "could raise its standards to comply with school regulations."

Although AKA is presently an all-black

sorority, Anne Butler, director of Educational Supportive Services and AKA adviser, said that is not always the case.

"There have been several non-minority members in the chapter," she said. "As long as the person in question is in sync with the goals and purposes of our organization, they will be pledged."

---

**"I don't think there will be any problems. You don't learn anything by being in the same little group of people. We could learn to work with people different than us, not just people in black organizations."**

---

Lucas expressed no apprehension about AKA being the only black sorority among a group of white sororities.

"I don't think there will be any problems. You don't learn anything by being in the same little group of people. We could learn to work with people different than us, not just people in black organizations," she said.

Greater communication is one advantage that the Panhellenic Council provides for its members, Robel said.

"A house would gain increased communication and coordination of greek activities," Hines said.

"AKA (the national chapter) doesn't encourage houses for undergraduate chapters," Phillips said. "We're different from traditional sororities and fraternities in that we have alumni chapters, some which also don't have houses. On those campuses where housing is required, we provide as much assistance as possible."

Alpha Kappa Alpha is smaller than

the other 11 K-State sororities with only 10 members, Hines said.

"It (AKA) being much smaller than the other 11 sororities, I think we (the council) could gain more insight into how they work because they don't have a house," Hines said.

AKA, which has existed at K-State since 1976, was strongly encouraged by its national chapter to become a part of the Panhellenic Council, according to Butler.

"A national official visited us in November of 1980 and recommended that we affiliate with the council," Butler said.

Phillips said one reason she wanted AKA to join the Council was because of the activities it provided.

"I feel we should have a choice in their (the council's) activities," she said. "It covers the sororities in an umbrella-like fashion and I feel that we should be a part of that structure."

Lucas said the reason AKA waited until now to join the Panhellenic Council was because they did not think it was worthwhile and that they would get nothing more out of the council than going to a meeting twice a month.

"No one had a clear definition of where we, as a chapter, wanted to go," Lucas said. "We needed more information to find out the advantages, such as being more visible, attracting new members and having a voice in things."

Hines said she was not aware of why Panhellenic waited until now to have a black sorority as a member.

"We (the council) saw as a semester goal trying to get as many sororities involved in activities as possible," Hines said.  by Chris Moore

Rob Clark

*Home wrecker* — Two fraternity members watch as a bulldozer knocks down the fire-gutted Sigma Chi fraternity house. The fire did not destroy the kitchen and eating areas of the house.

## Sigma Chi house gutted by fire

A large crowd gathered for a flaming spectacle June 2 as a 56-year-old fraternity house was destroyed. The fire left members of Sigma Chi fraternity homeless for the school year.

The house was being renovated over the summer. The fire was believed to have started because of a workman removing paint with a blowtorch. The internal wood structure may have smoldered several hours before the fire broke out and gutted the older part of

the house.

The newer part of the house sustained moderate smoke and water damage and was salvaged. The four-year-old addition included the kitchen and dining areas.

Sigma Chi's returning in the fall stayed in a local hotel until they found shelter in a near-by apartment complex with the help of alumni. The complex had just been completed and was able to house all 60 members. The salvaged part of the house was used as dining

facilities for the fraternity.

The burned structure is expected to be replaced by Aug. 1, 1982. The insurance policy on the old house was about \$350,000. Fund raisers and alumni donations are expected to cover remaining costs of a new structure.

The old house was built in 1925 and was occupied by the Delta Tau Delta fraternity before the Sigma Chi's purchased it in December 1949. **RP**

# Emotions fill rush activities

"I liked it. I didn't think it was horrible at all."

— "Everybody seemed so fake."

— "It was confusing but fun."

— "It was a blast! I made a lot of really neat friends."

The feelings and emotions that linger are varied, but Rush Week-1981 remains a common memory many K-State women won't forget. In August, 461 women left their homes and summer vacations to journey to K-State to join, if they found it to their liking, one of ten sororities.

Decisions whether to join came after five busy days of open houses, skits, progressive luncheons and preference parties. Free time was spent in the dorm talking, laughing, crying and making new friends.

"Rush is aptly named because it's a rushed and hectic week," Barb Robel, Greek Affairs adviser, said. "It's a mutual selection system which allows sororities to add to their membership."

According to Robel, approximately 75 percent of the women going through rush pledged a house. Of these women, 258 were freshmen and 58 were upperclassmen.

Diane Doctor, Alpha Xi Delta membership chairman, loved going through rush, but thinks the whole process is a "tough thing."

"I don't think any rushee can imagine what rush is going to be like. I don't care if her mom, sister or grandmother have all been in houses. Until you ♦

**Welcome** — Chi Omega actives greet their visitors with a hello song. House tours on the first day of rush allow rushees to see the entire house and get information about costs of living in the sorority system.

*Under the sign* — New pledges of Kappa Delta meet actives in the parking lot of Haymaker Hall the morning after receiving invitations to pledge.

*Surprise* — Rush counselors reveal their sorority affiliation during a skit. Affiliations of the counselors are kept secret during the week to provide rushees with unbiased help or advice.

## Sorority rush

experience it, there is no way you can determine what it will be like."

Going through rush is a good idea for those women who aren't exactly sure what they want, Doctor said.

"If they find out they do want to be in a sorority and decide to join one, then they'll be happy. If they do go through rush and decide they don't want to join a house, then they won't be disappointed later because they know basically what they're missing," she said.

Linda Lane, freshman in business administration, and Delta Delta Delta pledge, said that rush was a nervous time for many of the girls.

"I was just looking at it as having fun," Lane said. "With that attitude it was much easier."

Cindy Rietcheck, freshman in general and Kappa Alpha Theta pledge, called rush "exciting but scary."

"It really depends on the person whether they like rush," Rietcheck said. "If I was talking to my sister, I'd tell her how scary it was, but she'd probably go through out of curiosity, just like I did."

"I'm happy now, but I'd never go through it again," she added. "I'd never

Scott Williams

had one whole week of fear in my life."

Lauren Messersmith, senior in psychology and pre-law and member of Kappa Kappa Gamma, said it is much easier to be a "rusher" (active) during rush.

"You don't have the feeling that you are constantly being judged — that you're on the line," she said.

Despite the pressures, Messersmith said the "benefits of being in a house outweigh the uncomfortableness of going through rush."

Lynn Randall, senior in journalism and mass communications and member of Pi Beta Phi sorority, was a rush counselor. Rush counselors are on the best side of rush activities, Randall said.

"We are just trying to get to know the people as friends," she said. "We weren't trying to make an impression or worrying about getting the girls to pledge our houses."

Being an active can be difficult because girls may become "attached to rushees who may end up pledging different houses," Randall said.

"Rush is simply a means to an end," Theresa Korst, freshman in business and pre-law and Alpha Xi Delta pledge, said. "It has its ups and downs."

Korst added that it was sad that so many "neat girls" didn't pledge sororities simply because there wasn't enough room in the sororities.

The problem is eased by the colonization of Sigma Sigma Sigma at K-State in the fall. The sorority did not take part in formal rush, but plans to do so next year, Robel said. Approximately 182 women went through Tri-Sig rush and 115 women pledged.

Robel said the response to the colonization was "fantastic." Panhellenic Council will wait a few years to give Tri-Sigma a chance to get started and build a house, before deciding if another sorority is needed.

"At that time we will see where the interest is and if K-State can accommodate another sorority," she said. **RE** by **Beth Herde**

*Thank God it's over* — The final morning of rush week finds Lorie Jones, sophomore in arts and sciences, holding her invitation to join Alpha Delta Pi and embracing Karen Wright, sophomore in arts and sciences. Jones was one of the upperclassmen participating in rush.

# Homecoming is a winner

Students got a breather from the ragged fall semester in the form of balloons, contests, Halloween and a gridiron upset. Organized by Blue Key student honorary, Homecoming 1981 was packed with traditional events.

Union Day opened Blue Key activities on Wednesday. Living group competitions included Yell Like Hell, Body Building and Balloon Stuffing contests. Spirit Banners were also judged.

Woven between the games were performances by Concert Jazz Ensemble, Kappa Pickers, Larry Weigall and the United Black Voices.

Blue Key created a new facet by designating Friday as K-State Day. The morning was again filled with musical entertainment in the Union Courtyard.

Early afternoon competitions, such as egg tossing and phonebooth stuffing, had administrators face-off against students, football players against cheerleaders and college council leaders against college deans.

Open contests were held throughout the day until Yell Like Hell finals.

"It was great," Fritz Edmunds, sophomore in business administration, said. "The whole idea was to get a fraternity and a sorority working together to promote spirit and crowd enthusiasm. We (Alpha Tau Omega fraternity and Kappa Kappa Gamma sorority) did formations, chants and spelled out words using our bodies to form each letter."

Kappa Alpha Theta sorority and Kappa Sigma fraternity took first place in the competition. They were judged on group participation, generation of spirit, crowd response, originality and creativity.

Capping the day was the traditional bonfire featuring the K-State Marching Band and the cheerleaders in Memorial Stadium. Living group competition winners were announced. Kappa Kappa Gamma and Alpha Tau Omega captured the moving float division points to put them in first place for total points for the week.

The Saturday morning parade from downtown Manhattan to Aggieville was led by the K-State Marching Band and Manhattan High and Marysville High School bands.

A slightly overcast day didn't dampen events for Pam Jorns, senior in early childhood education, and Mike Yowell, junior in pre-dentistry. The two were named K-State Ambassadors in pre-game activity. Ambassadors represent the

*Willie's ready* — Members of Sigma Nu fraternity place the Wildcat mascot on their Homecoming float while members of Alpha Delta Pi sorority make last-minute preparations before the parade.

# PPL ignites volatile

The spirit that engulfed the football stadium after the Wildcats' Homecoming victory spilled into McCain Auditorium for the Pure Prairie League concert. The group performed two shows on Halloween night.

Glowing pumpkins helped set the Halloween mood and the group took the stage with all three vocalists wearing greasepaint in KISS fashion.

A small but concert-hungry crowd enjoyed the opening act performed by Ed McPheeters, senior in psychology, and Joe Stegeman, junior in engineering technology. The duo captured the audience from the opening moments and received a standing ovation.

Pure Prairie League kicked off its show with "Two Lane Highway." Lead vocalist Vince Gill occasionally changed the lyrics to excite the crowd — still elated from the

victory over eleventh ranked Iowa State.

"Since K-State kicked the sh- out of Iowa State, this time I'm really gone," Gill sang.

The group then switched to new material. The title track off its latest album, "Something in the Night," ended with a flying guitar spotlight on Jeff Wilson.

The crowd was enthusiastic but stuck to its seats for the majority of the concert. A few loyal fans in the front row would stand to greet the fiddle and guitar solos by Gill.

The guitar solos, such as the one featured in "Don't Keep Me Hanging," were anthems pledging Pure Prairie League's dedication to rock'n'roll. The rock roots have always existed, according to bass-player Mike Reilly, and several personnel changes have helped bring this to light.

The familiar album cuts were translated

*Local vocals* — The duo of Ed McPheeters, senior in psychology, and Joe Stegeman, junior in engineering technology, open the Halloween show for Pure Prairie League.

*Staged* — Pure Prairie League ends its 1981 concert season with an encore performance. The Homecoming audience gave them a standing ovation for their efforts.

# audience

into rocking concert features ending in the usual jumping crescendos, which the crowd loved.

The concert was a special event for both the musicians and their fans. This was the first Homecoming concert for K-Staters since Billy Joel appeared in 1978, and last engagement for Pure Prairie League in 1981.

Dedications filled the evening. "Let Me Love You Tonight" was dedicated to the Marshall Tucker Band.

The audience was motivated from its seats with the energetic "I'll Be Damned." The clapping and singing initiated in this song was continued in the eagerly awaited "Amie." The road crew joined the act, each costumed in a pair of Groucho Marx glasses and a nose. The road crew also received a gospel song dedicated that displayed the tight harmony among the vocalists.

"It's like a family," Reilly said. "We live on the road 250 days a year, and we have to get along. We see them more than we do our old ladies."

The circle of musical variety was closed in the encore with the energetic bluegrass offering "Picking to Beat The Devil."

"We tour and perform mostly at colleges," Reilly said. "They're better audience, they're hipper to our music." **RP** by Kelly Blair.

**Halloween mask** — Lead guitarist, Vince Gill, sings "Two Lane Highway" as the first song of the evening concert. The audience reacted with enthusiasm as the Homecoming victory over Iowa State lingered in the air.

# Concert welcomes students

photos by Rob Clark

Students ready to return to classes in the fall got the chance to relax to the music of Plain Jane and The Clocks while repressing the thought that the end of school was only 32 weeks away.

A free "Welcome Back" concert was held Sunday, Aug. 30, by the Union Program Council and local radio station KMKF.

"I thought the concert was a great idea," said Connie Cooper, junior in sociology. "I got to see some friends I hadn't seen all summer and it was a good afternoon to relax and listen to good music."

The crowd, estimated at 1,100 by UPC, spent the afternoon tanning on blankets or getting reacquainted with old friends.

"I was really happy with the way things went," Barbara Burke, program adviser for UPC said. "We had a much bigger turnout than last year and from all the positive feedback, I'd say everybody really enjoyed the show."

According to Burke, actual preparations for the concert began six weeks earlier at the end of July after she approached KMKF about joining UPC to do the show.

"I knew that KMKF had helped sponsor a concert last year and they were enthusiastic about the idea of doing it again," she said.

Last year's concert was on a Friday in October, and fewer than 500 students attended. Burke attributed this year's

success to planning it for a day when most students would be in town.

"We wanted to have it on a Sunday rather than a Friday night so we wouldn't have to compete with all the Aggieville bars," Burke said.

Publicity for the concert stressed that University and state rules do not allow liquor in public places on state property.

Since the concert was on Sunday when no liquor can be sold in Kansas, there were very few problems enforcing the ordinance, Burke said.

Martha Chapin, promotion director for KMKF, said communication was the big plus that made the concert so successful. She also felt that the students were especially well-mannered.

"I think campus officials were probably a little nervous about the idea of an outdoor concert with so large a crowd," Chapin said. "But after they saw how smoothly things went, they were super-impressed." Provisions for the concert included extra security, a flatbed truck to transport the band, and advertising to make the students aware that it was a free concert.

Both Plain Jane and The Clocks were popular with the K-State crowd and have made frequent appearances at Brothers Tavern in Aggieville.

"I especially liked the concert because not only was it free, but they managed to get two really good bands," said Pete Lewis, senior in political science. "I didn't think the sound was as good

*Center stage — Jerry Riley, lead singer for the Clocks belts out a number.*

outside as in Brothers though."

Dan McKee, senior in marketing, agreed but felt the concert should have been publicized more. "I heard about the concert from a friend of mine, but I'm glad I went. When you go to Brothers to hear one of these bands, it's usually so packed you can't move around, but in this case, you got to hear both of them and you didn't have to pay a cover."

"I think it all went over fantastically well and I've been hearing a lot of good things about it," said Steve Jack, KMKF announcer. In addition to getting the bands, Jack was also in charge of the radio crew that broadcasted portions of the concert from Weber lawn.

"We always enjoy playing to a Manhattan crowd and everyone seemed really enthusiastic," said Jim Bond, lead vocalist and bass guitarist for Plain Jane. During the concert Plain Jane spurred audience participation by insisting "they can't hear you down at KU" and prompting students to yell a certain obscenity at the band that had become a ritual when the band plays in Aggieville.

Burke said UPC hopes to have a similar concert every year since this one was successful. "It's a good way to start off a semester, and I think the students enjoyed the afternoon." **by Sharon Riley**

*Grand opening* — The subjects are the same, but some class locations changed with the opening of Bluemont Hall, the new general classroom and office building. Jean Palma, freshman in business, and Jill Hummels, sophomore in business administration, listen to a lecture by Patrick Gormely, associate professor of economics.

*Tassel time* — After four or more years of adjusting to class schedules, finals and college nightlife, students are faced with the ultimate collegiate tradition of donning the cap and gown.

## Inside view is different

Getting lost in the crowd is a common freshman fear. They associate K-State with numbers and stereotypes instead of faces and names. But quantity does not reflect quality, and stereotypes only hold when a subject is looked at from a distance. ▀

## Inside view

As the college years draw to a close, seniors realize that they have made a lot of good friends from the large number of people at K-State and are reluctant to leave. Some friendships may even last a lifetime. The inside view really is different. **RP**

## Who to ask?

# Suggestions sought

When the audience sits down in McCain Auditorium to listen to John Block or another notable Landon speaker they are hearing the end result of hours of organization done by the Landon Lecture Series committee.

When deciding who to ask to be a Landon speaker, William L. Richter, professor of political science, and chairman of the Landon Lectures, said the committee will "take suggestions from just about anyone who offers it. I check with representatives of groups on campus to see who they are interested in hearing."

Richter said there are four main people he goes to for opinions on who to ask to be a Landon lecturer: the student body president, the president of Faculty Senate, the chairman of Landon patrons and Phillip Kirmser, professor of electrical engineering, and chairman of All-University Convocations. Richter said that former Governor Alf Landon, the series namesake, is also consulted frequently.

After picking a possible lecturer, Richter then checks that person's credentials.

"Once we decide on a person, I check this person out with two people who actually know the speaker-to-be," Richter said.

If the process follows through, then the proposed speaker is given a formal invitation, usually in the form of a letter, by President Duane Acker.

If the invitation is accepted, the arrangements are made and a date is worked out with McCain Auditorium for the convocation. 

## Landon Lectures

### Paul Volcker

April 15, 1981 — The rate of wage increases has to decline before the American worker can hope to benefit from a lower inflation rate and increased national productivity, according to Federal Reserve Board chairman Paul Volcker.

Volcker delivered the University's 54th Landon Lecture. He spoke on methods of dealing with inflation.

"Wages and salaries account for approximately two-thirds of the national income," he said. "They are the dominant share of business costs. So long as the momentum of high wage settlements continues, there is a clear danger that real activity, as well as prices, will be squeezed and financial restraint is brought to bear.

"On a national level, the result is an excessive level of unemployment and slow growth. On a local or industry level, lay-offs, plant closings and even bankruptcies would be the symptoms."

"If inflation is to be unwound and our industry is to restore full competitiveness and provide high levels of employment, private behavior in wage bargaining and containing costs generally will need to reflect the new realities of the marketplace.

"With restrained monetary and fiscal policies, that will happen," he said.

Volcker defended the Fed's monetarist policies as the only way to attack inflation successfully.

He said present inflation woes began in the '60s when the government began increasing expenditures without raising

taxes. Large federal deficits and increasing demands for private credit further complicated the problem.

Volcker said he is encouraged by the Reagan administration's budget-cutting attempts.

"Moreover, further large budget cuts will be required in future years to make room for the tax reduction that we need, and those additional cuts in federal programs to which we have all become accustomed may be even more difficult to achieve than those currently under consideration.

"The effort is dictated by only one overriding fact: I see no other way to reduce the inexorable pressure that the federal budget places on our financial and economic system."  by **Damien Semanitzky**

## Sir Harold Wilson

Sept. 30, 1981 — The United States should be wary towards the Russians because of the current weakened economic condition of the Soviet Union, according to Harold Wilson, former British prime minister who spoke at the 15th anniversary of the Landon Lectures.

Wilson, who served as British prime minister from 1964-70 and 1974-76, spoke on "The Western World: Economic Crisis."

An inability to produce enough grain to feed its people and livestock, coupled with low coal production, are two major factors causing Soviet economic woes, according to Wilson.

The Russians are diverting attention away from their economic problems by using force and threats, he said.

"When the (Russian) bear is sick, watch out for his claws," Wilson said.

Wilson also discussed world economics, noting the dependence of world economies on oil. The United States might be increasingly self-sufficient due to a "steady and growing supply from the Yukon," he said.

An economic change has occurred in Britain and the U.S. without being noticed, he said. Major companies are becoming "socialized" because workers supply the money for investment in stock and other investments through their pension funds.

In the United States more than 60 percent of the stock of major companies is owned by pension funds, he said.

Public ownership has been blundered into without anyone realizing it, Wilson said.

It's a course the United States is taking "perhaps not by deliberate action but by instinct." **REP** by Leslie Frost

## John Block

Oct. 30, 1981 — The expansion of foreign exports will play a major role in the future of American agriculture, according to Secretary of Agriculture John Block. Block spoke in the 56th Landon Lecture.

"Without a strong and prosperous agriculture, this country will have little hope of recovery. Agriculture is going to make the difference," he said.

Agriculture accounts for 20 percent of the gross national product and 20 million people depend either directly or indirectly on agriculture for their livelihood, he said.

"Agriculture has shown a nearly \$30 billion surplus in world trade while non-agriculture (trade) has suffered over a \$50 billion deficit," Block said. "We can compete in agriculture. The people of the land are depending on us."

However, agriculture is not without its problems, he said. Low farm prices, the effects of the Soviet grain embargo, double-digit interest and inflation rates, estate taxes and pages of legislation that have a direct impact on agriculture are some of the problems it must contend with, Block said.

The government can clear the way for the nation's farmers by increasing exports, he said. Increasing demand and reducing the worldwide supply of U.S. products is important to the future of American agriculture.

"Don't underestimate for a minute what you can do — what the combined will of the American people can achieve," he said. **REP** by Kathleen Pakkebier

## Francis FitzGerald

**March 10, 1981** — Modern history texts have been "cleaned up" to reflect what Americans want to hear, according to Frances FitzGerald, Pulitzer Prize winning author for her 1972 book, "Fire on the Lake."

FitzGerald's most recent book, "America Revised," compares modern American history textbooks to those of the 1950s.

"Mostly why college professors bring me to colleges is to show the students that they, as history teachers, are not crazy or subversive for teaching United States history in a way that's different than the one that's explained in most history texts," FitzGerald said.

According to FitzGerald, today's

textbooks are written with state guidelines and many have political implications.

The onesidedness of the texts in the 1950s illustrates United States as agricultural plenty and technological magnificence. It says nothing about Indians and there is very little about European history in either old or new texts. Lavish adjectives are used to describe the Civil War, according to FitzGerald.

"The plight of the Negroes under the rule of the carpet-baggers and scallywags and then, apart from a paragraph on Booker T. Washington," are all that is said about Negroes in U.S. history according to FitzGerald. **RE** by Teri Groat

Staff photo

## William Winpisinger

**April 12, 1981** — The proposed budget cuts by the Reagan administration are the president's device to revitalize America. William Winpisinger thinks the proposed cuts are benefiting large corporations at the expense of the small business.

Winpisinger is a left-wing labor spokesman and president of the International Association of Machinists and Aerospace Workers (IAMAW).

According to Winpisinger, the Reagan administration's proposed cuts threaten every program valuable to Americans.

"Reagan said he was going to get the government off the backs of the people. But let me tell you that's just a code word for putting the corporations on."

"Reagan says he's going to run this

country like a business. What business? Chrysler, the railroads, or like the big oil companies?"

"I don't believe that very many Americans . . . would rather live in a country run by private corporations than by elected public officials," Winpisinger said.

He criticized Reagan's budget cuts saying that national security involves more than the Pentagon's budget. It involves a vigorous economy, high employment, a sound dollar, a thriving industrial base and strong elements of trade.

Winpisinger said economic recovery policies have been developed by the IAMAW to make government better serve individual citizens. However, he also said that he has no illusions about how difficult it will be to achieve the goals of this program. **RE** by Teri Groat

## William Rusher

**Sept. 21, 1981** — William Rusher, publisher of the National Review, advocated Reagan's policies concerning the minimum wage, MX missiles, social programs cuts and illegal aliens.

Rusher answered questions in a press conference preceding the convocation.

Rusher said Reagan's policies will in turn encourage productivity in the private sector.

"In the past we kept raising the minimum wage to exclude young people and minorities from the job market. We kept getting booted into higher tax brackets. Reagan is changing this."

The Democratic leadership in Congress failed to defeat Reagan's economic policies because they had no

specific alternative, according to Rusher. Any decreases in Reagan's military budget should not include the MX missile program Rusher said. "The MX missile is a necessity. Land based strategic missiles, as a result of Soviet improvements, are vulnerable to first strike regardless of the money spent."

The problem of illegal aliens has been a touchy subject Rusher said.

"Politicians are afraid of the situation and won't handle it. But Reagan has come forth with a plan making it harder (for them) to come in."

During the convocation Rusher spoke on the topic, "What's Right about America?" discussing the differences between the free enterprise system and communication through the years. **RE** by Dorothy Koepsel

Allen Eyestone

**Kansas politician** — Dave Owen, Republican gubernatorial candidate, spoke to the Alpha Kappa Lambda fraternity in October. Owen was one of many speakers sponsored by different groups.

## Ralph Nader

**Oct. 19, 1981** — Society has stereotyped students as persons who "are not expected to be concerned with problems outside of campus — sticking to the books until time to go out into the cold, cold world after graduation."

So said Ralph Nader, consumer advocate, in his address, "The Citizens' Movement in America — The Quest for a Democratic Culture," to a standing-room-only crowd in McCain Auditorium.

Society has a way of keeping young people in their place, Nader said. In the United States, it is a prolonged adolescence until the mid-20s to keep youth from challenging the way things are done.

Students should realize they can contribute to society more now than in later years, he said. Once students enter the employment arena it is not as easy to induce change.

Corporate values are spreading through society. Universities are full of professors doing research for businesses and corporations and there is also a tremendous amount of corporate money going into political campaigns from special interest groups.

These actions, along with increases in communication and advertising, are "basically exploiting young minds so they are more receptive when they have money in their pockets," Nader said.

However, consumers could use check-offs to balance the influences of corporate and political policies, Nader said.

Everybody can do something in his own area, Nader said. But he also pointed out that they must be able to respond to defeat because they will experience rejection. **REP** by Gail Garety

Scott Williams

## Penny Lernoux

**March 8, 1981** — Although the Reagan administration doesn't recognize it, there is an alternative to sending United States troops to El Salvador, according to Penny Lernoux, reporter, who lived in Latin America for 20 years.

Lernoux delivered an All-University Convocation speaking on her book, "Cry of the People: The Struggle for Human Rights in Latin America."

The alternative is to negotiate a

political settlement including all of those involved in the civil war in El Salvador. Lernoux said she sees two advantages if such an alternative were used.

First, the killings would halt, and secondly, it might help insure that the government that emerges in El Salvador is not hard Marxist, according to Lernoux.

Lernoux claimed nothing is ever the black and white it appears to be. By ignoring the complexities and profound changes in Latin America since the 1950's, "the Reagan administration has

painted itself into a corner with tragic results."

Lernoux said coverage of the El Salvador issue is being oversimplified.

"Editors cite lack of space or air as a reason for not explaining these complexities, but I think there is another reason, and that's that we communicators don't listen."

"We have a responsibility to listen to what the Latin Americans are saying, and I mean all Latin Americans, not just their government." **REP** by Sherry Schmidt.

## Landon not the only lectures

The Landon lecture series always has a lineup of prestigious speakers for the campus. However, many groups on campus also sponsored speakers on subjects ranging from religion to nuclear arms to body language.

The Union Programming Council, The Lou Douglas lecture series, Black Student Union, Campus Crusade for Christ and Ichthus were just a few of the many groups who brought speakers to K-State. Living groups, such as Alpha Kappa Lambda sponsoring Dave Owens, Kansas gubernatorial candidate, also sponsored speakers. **REP**

# ENTERTAINMENT

## Nooners

**March 4** - Tim Verschelden, senior in chemistry education, performed contemporary Folk and Christian music.

**March 31** - Joe Schuch played Folk and Rock music along with original tunes.

**April 7** - Mary Wehde, junior in english education, played Folk music.

**April 21** - Mary Bohnenblust, senior in business education, and Juliet Boege, Manhattan, performed contemporary Christian music to piano and guitar.

**April 28** - The group "Gold Rush," consisting of Kurt Knusen, senior in veterinary medicine, Eric Simonson, and Poli and Stess Weidner, played Bluegrass music.

**Sept. 15** - Ed McPheeters, senior in psychology, performed "Livingroom and Dulcimer Tunes." He provided an enjoyable nooner of corny jokes.

**Sept. 22** - An outdoor Nooner, "Country and Old-time Fiddle and Harmonica Music" was performed by Jim Hurlburt, freshman in animal science and industry.

**Sept. 29** - Jason Lopez, junior in journalism and mass communications; Tim Verschelden, senior in secondary education; and Cedric Saunders, senior in engineering technology, played "Earth Music," music about nature's attributes and often, man's ignorance toward them.

**Oct. 6** - David Boyd, graduate student in mechanical engineering, performed Folk and Pop music.

**Oct. 13** - "Original and Popular Mellow Music" brought Greg Gomaz, sophomore in business, to the Catskeller to sing and accompany himself on the guitar. His original songs were the best musical offerings of the Nooner.

**Oct. 20** - A chorus of students, faculty and staff members chose songs that expressed their ideas, particularly feminist ideas, in "Women of the Heartland: Singing Our Lives."

**Oct. 27** - John Works, senior in journalism and mass communications, and Pat Novak, senior in agricultural mechanization, provided "The Good Ole Boys Easy Listening." Their earnest attempt at humor and encouragement of the audience, successfully carried off the hour.

**Nov. 3** - In "Combo Nova," Mike Sweigart, Manhattan; John Bode, sophomore in arts and sciences; and Matt Dollar, freshman in journalism and mass communications, incorporated several elements of rock-n-roll's evolution into a unique Nooner.

**Nov. 10** - Susan Brink, graduate, and Kevin Chase, sophomore in animal science and industry, performed original and popular music.

**Jan. 19** - Jeff Tyler, graduate in entymology, played a combination of bluegrass and country music.

**Feb. 2** - In "The Magic of Mark," Mark Austin, junior in journalism and mass communications, livened the atmosphere of the Catskeller with a comedy magic show.

Nooners were performances by students coordinated by the Union Program Council's Coffeehouse Committee. In their seventh year, Nooners were open to any student who wanted to entertain and had a talent to share, according to Sylvia Scott, Coffeehouse program adviser. "The purpose is to let people play. It's a free program to help them (performers) get experience."

To perform, students filled out an application and were chosen by the committee.

The Union Catskeller, with wooden tables and beamed ceilings, created an intimate atmosphere for Nooners, which usually attracted 70-80 people. Most acts were acoustic musical acts and corresponded well with the Catskeller's mellow atmosphere. **RE by Leslie Frost**

There were only 100 seats available in the Purple Masque Theatre, but the intimacy of the theater called for a different acting technique by the actors, according to Mary Nichols, publicity manager. "It's almost harder to act. The people are closer. Shows put on in the Purple Masque Theatre might become lost if put on in McCain," she said.

With its workshop atmosphere, Purple Masque was like a "training ground." "Very few people can go right out on a stage like McCain. Here, they can act on a smaller scale first," Nichols said. "It's a good control of stage fright."

The K-State Players were the producing organization for Purple Masque productions but the plays were not limited to those who paid dues to the organization. Anyone taking at least one credit hour could participate in play productions.

A combination of acting and directing classes produced the shows. Faculty members selected the productions which were most beneficial to the students, and to the size of the Purple Masque Theatre. "They pick shows that will lend themselves to small groups," Nichols said.

Besides the usual Purple Masque productions, there were other activities in the theater.

The "Lunchbag Theater" performances took place during the day. They were intended to be informal plays so that a lunch time audience could view the shows. Performances were free, and the Lunchbag performers received a good audience without much advertising, according to Nichols.

A summer group performed "On Golden Pond" in July. Although it was difficult to cast a play when most students were gone, by opening tryouts to community members, there were enough actors to do the production, according to Nichols. The play was sold out every night. The K-State Players hope to put on more summer productions, Nichols said.

An improvisational group, a comedy of impromptu skits, also contributed to Theatre productions.

With only 100 seats, the theatre was small. But it offered K-State many plays and performances, put on in an intimate atmosphere, making the Purple Masque Theatre unique. **RE by Beth Bowen**

# UP CLOSE

Feb. 9 — Mark and Monte Selby performed "Folk and Country Rock, Original Tunes," an hour of acoustical music. Mark is a professional musician, while Monte was a sophomore in music and math education.

Feb. 16 — A 12 person Nooner, "Brian Tucker and Friends" put on a musical collage. Tucker, senior in psychology, had friends join him in playing and singing in small groups of two or more.

Feb. 23 — A small sample of "Gianni Schicci," an opera performed in McCain Auditorium in March, was presented by the K-State Players in the Union Courtyard.

## Purple Masque

April 2-4 — "Amen Corner" was a production of K State's ethnic troupe, the Ebony Theater Company. Including gospel singing throughout, the play was about a woman's search for herself.

April 30-May 2 — Part of the Playwright's Workshop program, "Only Good Business" was written by 70-year-old Chloris Killian, graduate in speech. The play was created in the comedy tradition of "Arsenic and Old Lace."

Oct. 22-24 — "The Dust-Storm Wedding," was sponsored by the Playwright's Workshop course which was designed to bring original works to the stage. Writer Chloris Killian and the K State players attempted to accurately portray life in tiny western Kansas communities.

Dec. 3-5 — England's symbolic play about an angry young man, "Look Back in Anger," was directed by David Tompkins, graduate in speech. The intimacy of the Purple Masque Theatre enhanced the production, revealing every twitch of anger to even the back row.

Feb. 18-20 — "Getting Out" was about the struggles of a young woman recently released from prison. The audience watched her juggle her past and present, and witnessed her search for the future.

photos by Allen Eyestone

*A little bluegrass* — Jeff Tyler, graduate in entymology, offers a lively Nooner, with his quick fingering on bluegrass picking songs and low, easy voice.

*Stick 'em up* — Randy Glegg, senior in theater, portrays "Arrow" in the play "Cop-Out" performed by the Lunchbag Theatre in February.

# Scene I

## **Symphonic Wind Ensemble Concert, March 12**

McCain Auditorium was filled with the music conducted by Alfred W. Cochran.

## **Emanuel Ax, March 31**

Ax, internationally famous American piano recitalist, performed pieces from Schoenberg and Chopin. The performance termed by critics as "unfailing elegance," "Poetic instincts" and "sparkling technique" was one of the events offered by the McCain Auditorium Series.

## **My Fair Lady, April 9, 10 and 11**

The K-State Players' production was the first McCain production for Charlotte MacFarland, director. The performance was the last of the four major performances by the Players in spring.

## **K-State Concert Band, April 22**

The band performed under the direction of Alfred W. Cochran.

## **The Kansas City Philharmonic with PDQ Bach, April 24**

The Series production featured the antics of Professor Peter Schickele and starred Kansas City Philharmonic under the direction of Marc Gottlieb, conductor. The performance received six curtain calls as well as a standing ovation.

## **A Celebration of Music and Dance, April 30, May 1, and 3**

The celebration was presented by the Department of Health, Physical Education and Recreation.

## **Dimitri, May 2**

The Swiss clown was brought to McCain as a Series production.

## **Symphonic Wind Ensemble, May 4**

The performance was the last for the Ensemble of the 1980-1981 season.

## **The K-State Singers, May 7, 8 and 9**

The group made up of non-music majors under the direction of Gerald Polich took a contemporary look at music. The performance was the last event in McCain for the 1980-1981 season.

## **Picnic, Sept. 24**

McCain opened its doors in the fall with this performance presented by the Missouri Repertory Theatre.

## **Talley's Folly, Sept. 25**

Also by MRT, the play, as does Picnic, depicts life in the Midwest. MRT members also conducted workshops open to the public in the Purple Masque comparing the two.

## *Begins second decade*

# McCain stages Act 2

**M**cCain Auditorium is now in its second act. Beginning its second decade, the promotional theme for the year was appropriately called Act 2.

Doreen Bauman, auditorium director, provides services for the departments of music and speech. A multi-use facility, McCain houses Landon Lectures, all-University convocations and performances by the K-State Symphony, Marching Band, Symphonic Wind Ensemble, jazz bands, the K-State Singers and other university and community choral groups.

The K-State Players, under the guidance of the Speech and Music Departments, present four major performances each year.

The theme changes each year, the only thing remaining constant being the McCain Auditorium Series.

"The highlights of the year for the Series were the performances of George Shearing Duo — an electrifying performance — the sold-out performance of acclaimed violinist Itzhak Perlman and the Nikolais Dance Theatre," Bauman said.

McCain currently has acts scheduled far in advance because there are no funds available to pick up unscheduled acts. "By educating enough people to want to buy tickets through outreach, it may be possible to build a profit to make a programming reserve fund possible," Bauman said.

Last year was the first time season tickets were made

*Up in arms* — The Knight of the Mirrors portrayed by David Atchison challenges the reality of Quixote's world in the K-State Players' presentation of "Man of La Mancha."

*Illusions* — David Seebach opens his Wonders of Magic show in McCain Auditorium by causing scarves to be transformed into his assistant, June. The beginning act left the audience in awe.

Photo by Allen Eyre, 1974

## Scene II

### **Who's Afraid of Virginia Woolf, Oct. 8, 9 and 10**

Edward Albee's play was presented by the K-State Players and the Department of Speech. The play was preceded by Avant La Piece banquet on Oct. 9 and 10 in the Bluemont Room of the K-State Union.

### **George Shearing, Oct. 12**

Shearing, internationally acclaimed interpreter of jazz classists, performed in duo concert with Brian Toriff, bassist.

### **Nebraska and K-State Glee Clubs, Oct. 16**

"The Great Glee Club Battle" took place preceding the Nebraska football game that weekend.

### **Wichita Symphony, Oct. 18**

The symphony conducted by Michael Palmer with the K-State Bach Choir, K-State Chamber Singers and K-State Concert Choir performed works of Igor Stravinsky, Joseph Haydn and William Walton. Palmer was cited by the Saturday Review magazine as one of the finest outstanding young American conductors. The major musical production combined the efforts of community residents, students and the Wichita symphony orchestra.

### **Itzhak Perlman, Oct. 23**

Perlman, acclaimed violinist and winner of three Grammy awards, performed before a sell-out crowd as part of McCain Series.

### **University Sing, Oct. 25**

More than 750 students from 10 different groups competed, each with at least two different songs to perform. The program was coordinated by Sigma Chi fraternity with the proceeds donated to the Sunset Zoo. Smurthwaite Cooperative House and Haymaker Hall won first with renditions of "Set Down Servant" and "Johnny, I Hardly Knew Ye." The K-State Singers also performed at finals.

### **Chinese Youth, Oct. 26**

The international group performed in a one-night show during a goodwill tour.

### **K-State Symphony, Oct. 29**

McCain houses a variety of events. The Symphony was just one of the musical groups to perform at the auditorium.

### **Concert Jazz Ensemble, Oct. 30**

The free concert was one of the first rate jazz bands to perform at McCain.

## Scene III

### **Nikolais Dance Theatre, Nov. 3 and 4**

"With his wildly beautiful stage effects and compelling multi-media switch-ons, he is, in my opinion, the greatest pure showman in American theatre," a critic said of Alwin Nikolais, artistic director of the theatre group. A lecture demonstration was held in McCain for Theatre Appreciation class with no admission fee.

### **Marching Band, Nov. 5**

The Marching Band in concert publicized by sponsoring a contest to win a free trip on the Love Boat.

### **Jazz Ensemble, Nov. 6**

The Ensemble entertained the public at no charge throughout the year.

### **Groucho, Nov. 7**

Lewis J. Stadlen as Groucho Marx performed the special Parent's Day event. The show also featured Nancy Evers in the role of Emily Schmallsen, Groucho's perennial foil.

### **Man of La Mancha, Nov. 19, 20 and 21**

The musical, presented by the K-State Players, the Speech Department and Music Department, was directed by Charlotte MacFarland, instructor of speech. She chose to highlight the comic portions of the show.

### **A Christmas Carol, Nov. 30**

More than 100 figures sang and danced. Preceding the show, a special Dickens Dinner was held in the Bluemont of the K-State Union. Manhattan youth were treated to the entertainment by volunteers from 28 fraternities and sororities who are part of Manhattan's Big Brothers-Big Sisters program.

### **Christmas Festival, Dec 2**

The entertainment featured the Concert Choir, Chamber Singers, Collegiate Chorale, Bell Ringers and Glee Clubs.

### **Wind Ensemble, Dec. 4**

The Ensemble entertained its audience with a special Christmas performance.

### **Messiah Sing Along, Dec. 7**

All were invited to attend the special sing-in. All singers provided their own score.

### **String Fling, Jan. 15, 16 and 17**

Spring Semester began with a ring as the musical presentation opened the doors of McCain for Spring semester.

### **Danny Embry Jazz Quartet, Jan. 20**

The Quartet was an extra feature to McCain Auditorium from Los Angeles.

Jeff Taylor

## McCain, Act II

available to the public.

"The season tickets provide us a base of operating money. In the field, there is some disagreement as to whether a discount should be offered. While our tickets do offer a discount, there are other advantages to having this type of a ticket. You have the same seat each time and are assured of a seat. Also, you don't have to keep coming back to the box office," Bauman said.

Special features of McCain consist of a movable ceiling, which, according to Bauman, isn't very common to auditoriums. It can be moved into 3 positions for acoustical purposes.

"We need a new stage and move sophisticated lighting. I'd like to have computerized lighting system. The sound also has been worked hard and long for 10 years. I'd like to have changes made in the lobby area, and have a permanent concession stand," Bauman said.

"If I were rebuilding McCain, I'd like to have the front of the house different and not have the continental seating, rather have the traditional seating with a center aisle," Bauman said. **RP** by Susan Somora

*Twister* — The Nikolais Dancers demonstrate a different concept of space using the theory of Alwin Nikolais.

*Rain in Spain* — Henry Higgins. Portrayed by David Ollington, helps Eliza, portrayed by Ida Quick, pronounce her "H's" with the aid of a candle in the K-State Players' presentation of "My Fair Lady".

Scott Williams

## Scene IV

### Gary Karr, Jan. 21

Karr, double bass, performed in duo concert with Harmon Lewis on the keyboard. The event was a joint presentation of McCain's Act 2 and the Chamber Concert Serie.

### Bass Fishing Meeting, Jan. 29, 30 and 31

The many interests of both students and community residents are served by McCain in lectures.

### Greek Follies, Feb. 5

Greek Week culminated in this event. Participating Greek groups were divided into teams. The winning group for Follies consisted of: Alpha Chi Omega, Delta Delta Delta, Kappa Kappa Gamma, Lambda Chi Alpha, Phi Gamma Delta, Phi Kappa Tau, Sigma Alpha Epsilon and Sigma Chi.

### Wonders of Magic, Feb. 9

David Seebac performed the escape act that made Houdini famous 100 years ago. Other acts included levitation, and disappearing bodies.

### Jazz Festival, Feb 12 and 13

The festival featured 34 groups from Illinois, Kansas, Oklahoma and Missouri. Friday's concert featured Mainstreet Palace Jazz Band and Bill Harshbarger Quartet. An awards concert with the winning bands and guest soloists honored took place during Saturday's concert.

### Opera, K-State Players and Department of Music, March 4, 5 and 6

The opera billed as "Two Faces of Puccini" displayed two very different aspects of Giacomo Puccini's style.

### Alan Marks, March 8

Marks is recognized as one of the premiere pianists of his generation. In addition to his annual concert tours, Marks is regularly engaged for campus and community residencies throughout the U.S.

### Symphonic Wind Ensemble, March 9

McCain housed the final performance for the Spring semester.

### Flint Hills Choral Festival, March 10

Eight Kansas high school choirs performed at the festival. The performances were critiqued during the pre-contest.

### TOPS Conference, March 12 and 13

Workshops were held and honors were given out during the Kansas TOPS State Recognition Days.

### Veterinary Medicine Conference, March 18, 19 and 20

The Conference was attended by students from Veterinary Colleges from all over the U.S. and Canada. Speakers from many places in the U.S. held lectures with social activities planned at night.

# Pope, Sadat Shot

On May 13 Pope John Paul II became the target of an assassin's bullet as he conducted an outdoor audience in St. Peter's square. Mehmet Ali Agca, a 23 year-old Turk, shot the Pope in the abdomen and the hand. The Pope was rushed to a nearby hospital where a long operation saved his life. Agca was captured and later told police he was "protesting U.S. and Soviet imperialism" and was sentenced to a life sentence.

Another spokesman for peace, Anwar Sadat, became the victim of assassins' bullets. Sadat, whose peace with Israel changed the course of Mid-East history, was killed on Oct. 6 when six men jumped from a truck in a military parade and fired automatic weapons into the reviewing stand.

*Prayers for Sadat* — Moslem students take part in a special prayer for Anwar Sadat. The ceremony was held on the basketball courts at the Jardine Terrace Apartments.

## Cuts, basis of Reaganomics

More than a year after his sweeping victories in Congress concerning budget cuts and military build-up, high interest rates and a strong recession plagued President Reagan's plans for bolstering the economy. Reagan's first year success in Congress had been achieved in an unlikely coalition of southern Democrats and northern Frost Belt Republicans.

That coalition was expected to face severe strain because of Reagan's 1983 budget calling for further tax cuts, and further budget cuts for social programs, as well as continued real growth in the military budget. The White House's own numbers predicted a \$91.5 billion deficit. The whopping deficit, interest rates in the 16 to 20 percent range, along with unemployment near nine percent, made it doubtful that Reagan's programs would get through Congress literally untouched, as did his 1982 budget. Reagan, however, was maintaining a hard-line posture about compromise budget plans and vowed to hold out for his original plan.

## Wayne Williams Convicted

With the conviction of Wayne B. Williams in the slayings of Nathaniel Cater and Jimmy Ray Payne, police closed the books on 21 other Atlanta area slayings in a 22-month string of killings, according to Atlanta Public Safety commissioner Lee Brown.

The special task force created in July 1980 to investigate the Atlanta murder cases was disbanded in March after Williams, a 23 year-old black freelance photographer was convicted by a jury of eight blacks and four whites.

During the sensational nine-week trial, prosecutors presented witnesses, blood stain and fiber evidence linking Williams to 10 additional deaths in an attempt to prove a pattern to the slayings. Williams was sentenced to two consecutive life terms.

## Glimpses

### *Sandra O'Connor appointed to the Supreme Court*

Ronald Reagan appointed Sandra Day O'Connor as the first woman to the U.S. Supreme Court. Her appointment was objected to by the Right-to-Life proponents suspicious of her views on abortion.

### *Violence continues in El Salvadorian civil war*

Despite military aid and advisement from the United States, the government of El Salvador could not quell guerilla activity by armed leftists. The Reagan Administration charged that the Soviet Union was behind the rebels, creating conflict in the Central American region. Reagan announced a three-year, \$750-million economic aid program in an effort to shore up the regions's faltering economic and political systems.

### *Columbia, first space shuttle*

Columbia, the world's first reusable space shuttle was launched in April 1981 as a nation of eager viewers gathered around televisions to watch. It made a second venture into space in November and another was planned for the spring of 1982.

### *Strikers fired, PATCO decertified*

President Reagan fired approximately 1,700 air traffic controllers after they went on strike for higher pay and better working conditions. PATCO, the air traffic controllers union, was decertified by the federal courts making it ineligible for any further contract negotiations.

### *Baseball strike puts out fans*

Something was missing during the summer when the baseball players walked off the fields June 12. The strike lasted 50 days and negotiations went back and forth from almost being resolved to total breakdowns. The season was reworked to include division champs determined by the two split seasons. The division champions were determined by records before and after the strike. The playoff system was also revised to determine the participants in the World Series.

# Martial law in Poland

Although the threat of Russian military intervention had decreased, Martial law in Poland continued to strain relations between Russia and the United States. Martial law was imposed by the Polish government in December to stem unrest caused by increasing action of the national labor union, Solidarity. The labor union continued to protest government policies through strikes and work slowdowns. Solidarity leader Lech Walesa was held in custody along with more than 5,000 Solidarity organizers after the Martial law was imposed. Offers by the government to provide release to organizers who agreed to leave the country were not taken up in large numbers. Both the United States and Russia accused the other of tampering with the internal affairs of Poland by pushing solidarity and the Polish government toward conflict.

## 737 crashes in icy Potomac

In January, a Florida bound jetliner roared from a snowy takeoff and crashed into a Potomac River bridge, smashing automobiles and plunging beneath the icy water.

The Boeing 737, an Air Florida flight, was bound from Washington National Airport to Tampa and Ft. Lauderdale, Fla., when it crashed into the crowded commuter bridge killing 78 persons.

Salvage operations battled bitter temperatures to pull bodies from the icy water, as debris and victims were scattered over an area almost the size of a football field.

The search for the flight recorders of Flight 90 continued for days before they were retrieved from the week-old wreckage.

The National Transportation Safety Board investigation into the crash centered on whether the Air Florida jet might have had too much ice on its wings when it took off during a steady snowfall.

Investigators interviewed more than 100 witnesses to the crash and made detailed examinations of the recovered pieces of the wreckage.

## Clues sought in Hyatt case

Inadequate design was cited by federal investigators as the reason why hotel walkways collapsed at Kansas City's Hyatt Regency Hotel June 17.

According to the National Bureau of Standards investigation, the walkways were structured to hold less than a third of the weight capacity required by city building codes.

One of the walkways which should have supported 68,000 pounds, including the structure itself, collapsed and fell on the walkway beneath it, killing 113 people and injuring 200 more in the most devastating structural collapse in the history of the United States.

According to the Bureau's report, a decision to change the design during construction added to the stress place on the support beams of the walkways and while the original design would have been far short of city codes, in all probability it would have prevented the July 17 disaster.

The design change allowed for the fourth floor walkway to hang from one set of rods with the second floor walkway hanging directly from it. This caused the fourth floor walkway to bear the weight of both walkways.

**Belushi** — Actor John Belushi, 33, was found dead at a rented bungalow in Los Angeles. At first, there were conflicting reports on the exact cause of his death. An official coroner's report stated Belushi died "due to intravenous injections of heroin and cocaine." Belushi was famous for his roles in *Saturday Night Live*, *Animal House* and *Neighbors*.

## Glimpses

### Saudis purchase AWACS

The U.S. Senate approved a \$8.5 billion package sale of arms to Saudia Arabia. The Saudi's expressed "deep gratitude" while Isreal reacted with restraint. The Soviet's said that the sale would spur a new arms race. Some Congressmen believed that Reagan's support of the controversial sale had lost him support on Capital Hill. Debate centered on the proposed use of the war arms. Supporters stated that the Saudi's would abide to the agreement to use the arms only for defensive reasons. However, adversaries were concerned that the arms would be used in an offensive capability.

### Charles, Lady Diana wed

It was proclaimed the most extravagant wedding ever, as millions of people across the world watched Lady Diana and Prince Charles exchange wedding vows at St. Paul's Cathedral in London. The wedding had Americans up at 4 in the morning viewing a nervous Diana, who transposed two of Charles' four names during the ceremony. The couple rode through the streets to greet the thousands of spectators who had gathered to catch a glimpse of the royal couple. The two announced four months later that they were expecting their first child.

### Libyan squad rumored

Administration officials, having evidence that Libyan strongman Muammar Kaddafi tried to murder two American Ambassadors, reported last December of his plans to assassinate President Ronald Reagan through hit squads. Although none of Kaddafi's hit men materialized, Reagan announced the second phase of his anti-Kaddafi campaign, banning imports of Libyan oil and the sale to Libya of American drilling equipment in March 1982, his first being invalidating all U.S. passports for travel to Libya and asking Americans living in Libya to return home. Although the first wave of U.S. economic actions had little effect on Kaddafi, it was believed that the second phase of Reagan's campaign would have more effect.

# Lansing plagued with problems

An inmate serving a life sentence at the Kansas State Penitentiary was charged with first-degree murder Oct. 12, 1981, in the stabbing death of a prison guard.

According to Robert Atkins, prison director, the state's lack of a death penalty contributed to an atmosphere where prisoners can kill guards and other prisoners with no fear of punishment.

Robert Davis, Leavenworth County attorney, filed

## Tax plan debated

Senate President Ross Doyen referred the bill to two Senate committees. The move made it more difficult to get the bill to the Senate floor for debate and a vote.

House speaker Wendell Lady said that the severance tax would raise \$78 million its first year that is vitally needed for education and highways.

Doyen contended that no additional funds were needed by the state, except for highways. He advocated a gasoline and diesel tax increase to provide these additional funds.

If the bill passed, it was expected to allocate 20 percent of the revenue raised into a state trust fund, and 5 percent to school districts and counties to make up for property tax base erosion that the severance tax would cause.

The tax was estimated to generate \$103.2 million annually. Of that total, \$4.4 million would go to the counties and school districts, \$20.6 million would go to the trust fund and the remaining \$78.2 million would go to the state general fund and be used mainly for school finance and the rebuilding of state highways.

Lady said he supports the severance tax because it's right for the people and the future of Kansas. "I think we need the revenue, and I'm willing to stand up and be counted," Lady said.

a murder charge against Mark Osborne, 25, of Wichita, who started serving a life term in 1977 for aggravated kidnapping, rape and other charges. The charge was the slaying of guard Robert Hurd, 41, of Olathe who was stabbed repeatedly with a dinner knife, Oct. 11.

Governor John Carlin ordered the firing of the director, Atkins, and Robert Nye, deputy director for operations of the Penitentiary. According to Carlin, the institution needed a change in management and new leadership.

Kenneth Oliver replaced Atkins as director. Oliver is a former deputy state secretary of corrections and prison director.

Scott Williams

*Project completed* — Members of Jehovah Witness leave from the first meeting in newly constructed Kingdom Hall on Casement Road. The Hall was completed by volunteers in 48 hours.

## Glimpses

### LSD stamped comics

Lysergic acid diethylamide, LSD, was discovered on stamps bearing cartoon-like characters attractive to children. Unconfirmed reports of the stamps occurred after Wichita undercover detectives purchased stamps from individual sellers.

### Stiffer DWI penalties delayed

A controversial proposal to impose stricter penalties for convictions of driving while intoxicated was sent back to committee after lengthy and heated debate in the Kansas House. The proposal would impose a mandatory 90-day license suspension for a person's first conviction plus a fine ranging from \$100 to \$500. The bill will be considered again during the legislative session.

## NCAA puts WSU on probation

Although Wichita State President Clark Ahlberg emphasized most of the violations occurred under the university's previous coaching administration, the Shocker's basketball team was barred by NCAA from post-season play for two years and one scholarship for each of the two years in connection with recruiting and other violations dating back to 1975.

## Winn enters guilty plea

Rep. Larry Winn (R-Kan.) appeared in court and pleaded guilty to a charge of driving while intoxicated and under the influence of prescription drugs. Winn, 61, appeared in the Douglas County District Court, where he entered the plea and paid a \$175 fine and court costs. He was placed on probation for the term of a 30-day jail sentence.

## Raid nets 15 arrests

Riley County Police arrested 11 persons including 10 students as a result of a four-month-long undercover investigation. Armed with search warrants, the police raided three residencies with three teams of seven officers. Ending at one a.m., the raid resulted in no reported problems or incidents.

According to Alvan Johnson, RCPD director, the people involved were considered "quite significant" in the Manhattan drug scene. Expectations of recovering "large quantities" of several types of drugs were dashed for the raid ended in no large amount of drugs being confiscated.

The raid did result in a total of 15 people including 11 K-State students, 2 soldiers from Fort Riley, a Manhattan resident and a Lawrence resident being arraigned for charges including felony sale of LSD, marijuana, hashish and amphetamines as well as possession and delivery of the drugs.

## Mall plans are made

Downtown business merchants had the opportunity to ask city planners and designers of the downtown redevelopment how the project would affect their businesses. Gary Stith, city planner, gave a brief introduction to the merchants and introduced the basic ideas of the plan during a meeting open to the public. According to Stith, the redevelopment project will be developed in three phases, including streetscaping in an area designed for seating, lighting and landscaping; building facade improvements; and a plaza design which would be located at the entrance of the proposed mall at Third and Poyntz.

"It (the plaza) would be a focal point for downtown public space and would be designed in such a way that would attract people . . . a space that would draw people into the downtown area," Stith said. Tom Keohan, full-time coordinator for the downtown project, gave a presentation which included history of downtown development. He stressed the importance of using available assets, such as existing buildings and designs, to keep the character and integrity of downtown Manhattan.

Stith said there would be a series of workshops available for downtown business merchants to have input into the redevelopment of downtown.

## Senior citizens center approved

A senior citizen's center to be located at Fourth and Leavenworth, Manhattan, was approved by the Manhattan City Commission by unanimous vote. City and county funds will provide the \$27,500 financial shortfall necessary to build the center.

Foster grandchildren of the College Hills Skilled Nursing Home residents collected pledges to sponsor the Second Annual Rock'n'Roll Jamboree at the nursing home to benefit the American Heart Association. Another jamboree was also held at Wharton Manor.

Rob Clark

**Inspection** — Secretary of the Army John Marsh toured Fort Riley during the summer. Marsh called for an increase in the number of military reserves during a local speech.

## Shortage - from bad to worse

In order to increase Fort Riley's division strength, an increase from 19,000 to 21,000 personnel will take place during the next year or two according to Major Jack Horns, public affairs officer at Fort Riley.

The increase will place a further strain on an already tight housing situation. In addition to the limited amount of housing, there has also been an increased K-State enrollment and therefore an increased need for off-campus housing.

## Little Apple made memorable

Although Manhattan hasn't grown to rival "The Big Apple," its trademark, "Little Apple" has been effective in other ways. Manhattan was first registered as the "Little Apple" because other cities use labels and logos and the trademark could not be used by other towns. The Chamber of Commerce, which the trademark is legally registered to, seeks to encourage business and make Manhattan memorable through the label. A large red apple is to be painted on the water tower above Tuttle Creek Boulevard according to Don Harmon, Manhattan city manager.

# CAMPUS OVER

A university already recognized for many areas, K-State continued to build upon its reputation. Long-standing recognition for the academic level in schools of Veterinary Medicine, Agriculture and Engineering was evidenced by a record volume of research grants and continually rising enrollment. Younger but just as respected programs such as the Institute of Environmental Research facility also increased K-State's visibility.

But being a land grant university with its feet firmly planted in traditional values of education did not keep K-State from moving forward in some very non-traditional areas.

Whether using a Telenet system to reach students across the state or intensive English courses to aid foreign students, K-State used its past as a foundation for the present and future.

Increased enrollment and tighter budgets did cause problems for the University, however. Competition with industry to keep qualified faculty had to be contended with, just as rising costs did.

The problems changed as well as the names and faces of the students, but the traditional values about academic goals remained firmly rooted. **RF**

# Skipped education enhances imagination

Serenely, the first orange glow of the sun flickered harmlessly into the room, across the bed, and over the coiled up fetal-positioned body. As the body swayed in the sleepiness of a dream, the soft sound of sheets surrounding the warm flesh of the innocent was barely audible. A dream of laughing, of lovers touching hands, of . . . of . . . going to class? Shattered! The alarm screams, a hand slides out like a switch-blade, and a dying clock drops to the floor, bouncing, to lie quietly. Red eyes open along with a passing thought: "I'm not going." Red eyes close.

Decisions and excuses made, in the wink of an eye, a student can find himself over-sleeping, skipping classes or battling through a blinding blizzard to make it to an English Composition class at 7:30 in the morning. To skip or not to skip, is that the question?

In an instant an excuse can be flung off the cuff by a student who has skipped a class, unlike the attending student who needs no cuffs to fling his excuses off. The attending student needs to spend no time using imaginative thought for finding excuses, but instead will direct his will toward completing assignments and improving grades.

But yet, shouldn't we stop and examine the creativity and originality of the non-attending student. An average student just doesn't have the resources to think of a good explanation as to why he has not been to class for three weeks. Only an experienced class cutter with fresh ideas can think of something that the instructor hasn't heard many times before.

There is a certain amount of courage involved, also. Anyone can skip a 300-person lecture class where no one notices or even cares. What about the small class where attendance is required and it's quite obvious when someone is missing? Now, how many students can

skip that one and show up the next class time with all the confidence in the world.

Many students have justifiable reasons for missing class. For some of them, Mom and Dad made them come to college and they can't seem to remember whether it is to get an education or to party. On the nights they take the partying route it is pretty difficult to get up in the morning and go to whatever that class is at 8:05 on Thursdays. Bad weather is another problem. It seems some people can just never find their umbrella when it's raining and really, is class worth getting wet over?

Of course, attending students will surely argue the benefits of going to class. They claim they learn more by actually hearing the lecture instead of copying someone else's notes. They also think that since they are paying for an education, they should do everything

possible (including going to class) to get the most out of it.

Skippers would regard this as a boring and monotonous lifestyle, but to each his own.

An attending student has discipline, a strong desire to learn and no moral conscience to bother with. The non-attending student shows signs of low motivation, lack of interest in learning, but most important of all, he has the creativity and the guts to face a disappointed teacher and relate an imaginative, epic excuse to retrieve his neck from the noose.

The strong of will always survive, and then again, the weak of will also survive — they just do it with a lower grade point average. A student retains the choice to make his own decision. To skip or not to skip, that is the question. **RP** by Paul Cunnick and Jean Nicholson

**Cultural Concert** — As part of the Hispanic Cultural Awareness Week, Grupe Caribe, a calypso band from Lawrence, visits K-State. The area in front of the Union is a popular spot for noon-time entertainment that may draw students away from their classes.

Cort Anderson

## Reasons for skipping: Are any of them yours?

### Reasons you didn't go to class

- I thought I might get sick later on in the day.
- It looked like rain (or snow, or a tornado.)
- The sweater I wanted to wear was dirty.
- I was out of shampoo.
- I didn't want to see my test.
- I was afraid I had a test.
- I had a hangover.
- I needed to go drink a beer.
- I forgot my assignment.
- I wanted to watch my soap opera.
- I didn't want to see the person I stood up last weekend.
- 12:30 is just too early.
- It was too cold.
- Because it was there.

### Excuses you told your professor

- My 14th aunt or cousin or dog died.
- They forgot my wake-up call.
- I have an incurable disease.
- Personal problems.
- The people next door were noisy all night.
- I forgot to set my clock for daylight savings time.
- I ran out of gas.
- I/my mother-father-brother-sister-grandmother-grandfather-dog was in the hospital.
- I got stuck in a snowdrift.
- The dog used my paper and I had to stay up all night writing another one.
- Someone told me we didn't have class.
- Don't we get off for Columbus Day?
- I thought dead week meant we didn't go to class.
- I'm on the Royal Purple and it's deadline.

Count up how many of these you have used and check below to see where you fit in.

*Above 20* — Quit school (you don't go anyway)

*15 to 20* — Do your parents know they're paying for this?

*10 to 15* — little more experience and you'll have it down pat.

*5 to 10* — Good student, but boring.

*Below 5* — Devoted aren't you? How many honoraries are you in?

*Good view* — Daniel Grubbs, junior in mathematics, spends some time between classes relaxing in a tree. Students are often tempted by a sunny day to skip classes.

# Setting and

If you are compiling a list of Duane Acker's vocabulary, don't forget the word "goals." It is a central element in his philosophy as president of K-State.

"One of my goals is to move our university toward a more goal-oriented leadership."

Acker believes that saying, "Here's our goals, let's mark them off," is a key step in accomplishing them.

"One goal you could say is to have the most effective teaching, research and extension programs. This is good and noble, but hardly measurable. I like to put things down that are measurable."

Defining objectives and how to achieve them requires faculty and student input, Acker said. He cited a meeting with 70 students, faculty and deans in January 1981 as one way to get input. The group discussed a list of 80 goals at Rock Springs retreat camp. The goals ranged from finding research funds to abolishing extra paperwork.

Acker's other lines of communication include daily meetings with the provost and periodic meetings with deans and the student body president.

Acker said he puts a particular emphasis on effective academic advising and increasing the student success rate, which he described as "helping the student achieve the standards for which K-State is known. I do not mean all A's and no failing grades and I don't mean grade inflation."

Establishing a good international posture is another objective Acker hopes to achieve by giving faculty international experiences and exposure for students in an international context in their discipline.

His list of goals is endless and ranges from improving campus appearance to statewide identification. Though goals are set for improvement, Acker is quick to point out what K-State already has going for it. The strongest asset of the university Acker described in one word, faculty.

K-State has made tremendous strides in getting the colleges to function as a single unit instead of individual entities, Acker said. Sometimes this involves sacrificing for the good of the whole University.

It's all a matter of setting goals. **RP** by Jean Nicholson

## Understanding the teacher

# Communication barrier possible problem

Sometimes it is hard enough for students to understand the teacher, let alone the subject material for a class. Such might be the case when students are taught by foreign instructors.

It might help to know that upon employment, all teachers, graduate teaching assistants, as well as new international students entering the graduate school, are required to take English and speech proficiency examinations. The English exam is administered by the English department. Those who fail this written portion are required to enroll in English for Foreign Students. Those who fail the oral portion given by the speech department are required to take Spoken English for International Students. Those applying for GTA positions also take a separate oral screening given by their department

heads.

Pir Maleki, math instructor at K-State for five years, said communication with students is not a problem for him. Maleki teaches college algebra, intermediate algebra and calculus.

"Maybe the format of the recitation class prevents possible problems. Students can feel free to ask questions; that's what a recitation class is for," he said.

J.Y. Lan, a chemistry major and lab GTA, has been teaching at K-State for two years since he graduated from a high school in Taiwan. Lan is fulfilling a curriculum requirement by being a GTA. The only problems he has faced while teaching at K-State seem to be common to all teachers, Lan said.

"They always forget to wear goggles. I'm always reminding them of little

things," Lan said. "I want my students to feel free to ask questions if they can't understand me."

Some students, however, have difficulty adjusting to having a foreign instructor.

"My foreign instructor tried to answer questions, but the language problem was so great, my teacher couldn't understand," said Tammy Tracy, sophomore in computer science.

The communication barrier can be lessened, however.

"Many instructors recognize the problem of communication and go to lengths to overcome it. My teacher accomplished this by speaking slowly and explaining things more fully," said Bob Shuey, sophomore in electrical engineering. **RP** by Susan Somora

## Private industry lures teachers

# Faculty loss a 'continuing problem'

If it takes one teacher for twenty students, then it takes two teachers to teach forty students — right? Wrong. Or at least that has not been the case recently at K-State.

"We need more (instructors). We don't have enough," President Duane Acker said. "We have had a 1,600 student increase with no increase in faculty since the fall of 1978."

The college deans agreed with Acker's assessment of the need for instructors. Many departments are finding their faculty lured away by higher paying industrial positions.

Robert Lynn, dean of the College of Business, called the faculty loss "a continuing problem." The business college loses an average of three faculty a year, he said.

The losses are usually highly qualified people, according to Lynn.

"We replace everyone we lose eventually, but with lower qualifications

and cost."

In some cases industry can double or triple a faculty member's pay, Lynn said. K-State's average faculty salary is "substantially lower than other universities."

The College of Engineering lost three faculty members last year, which is above the average of one, or less, per year, Donald Rathbone, dean, said.

---

**"We replace everyone we lose eventually, but with lower qualifications and cost."**

---

Rathbone said that engineering is hurt more than most colleges by low salaries. There are "unfilled jobs in engineering from coast to coast," he said.

Other colleges are affected less severely. Salaries don't pose too much of a problem for the College of Home

Economics, Dean Ruth Hoeflin said.

Most faculty defections were related to family ties, Hoeflin said. Attraction of new faculty was sometimes a problem because the college could not offer enough pay without exceeding salaries of existing faculty members.

The problem may be eased by a proposed salary hike. Rathbone hopes to receive a larger share of the money for engineering since he feels it is hit hardest by low salaries.

"No matter what, we won't compromise and let quality suffer," Rathbone said.

Acker shared the feeling and said that not all faculty are feeling the pull of higher salaries.

"We've retained some really good ones. They apparently like K-State, feel a pride in K-State, and like what they are doing." **ED by Jean Nicholson**

artwork by Kristi Tankersley

*Slow moving traffic* — The kickoff parade moves toward its finish in front of Seaton Hall during Open House. For the first time the parade featured entries from most of the colleges.

## Open House

# K-State dresses for weekend interview

Like a college graduate interviewing for his first job, K-State, dressed in a suit and tie and put its best image forward to impress students, parents and community at the 1981 All-University Open House.

An all-university parade, kicked off the first day of Open House on March 27.

"Traditionally the parade was all engineering," Natalie Haag, junior in agricultural economics, said. "This is the first year that the other colleges have participated." Haag was the assistant coordinator of Open House.

Just like the graduate who gives his resume to many a company, academic displays were designed to inform future students and their parents of opportunities at K-State. However, Pat Bosco, assistant to the vice president for

student affairs, said Open house is also for the present K-Stater.

"In addition to their appeal to prospective students, the academic displays also allow students already studying at K-State an opportunity to explore their career options," Bosco said.

The College of Engineering gave out its own departmental award. Agricultural engineering won the trophy for the third year in a row for extensive participation and quality in individual displays.

The College of Home Economics sponsored a style show featuring garments designed and constructed by students. Restaurant management students demonstrated ice carving in front of Justin Hall. A cheese sampling display also caught many people's

attention.

Arts and Sciences covered a variety of topics within its college. The modern language department had an international sidewalk cafe complete with belly dancers. A chemistry magic show was performed in Willard Hall. Tours of McCain Auditorium and Music Scholarship auditions were held.

K-State closed Open House by relaxing with entertainment from two sources.

"Asleep at the Wheel," a country rock music group, performed in McCain Auditorium, while the KSU Rodeo gave a second night show in Weber Arena.

Will K-State be hired to house and educate all the students that interviewed it at Open House? Probably not. After all a graduate doesn't get job offers from everybody. **RE** by Susan Arnoldy

Allen Eyestone

# over again'

Dear Little Sis',

Remember when I said "You can always tell a freshman?" They walk around with their campus maps in their shaking hands trying desperately to find Seaton Hall or Cardwell 101 before class starts without them. That's what I used to think. But now, with all the new buildings on campus, I feel like a freshman all over again and I've been here four years!

I didn't worry when my line schedule said I had a class in Bluemont Hall (or the Generic Classroom Building as my friends still call it). Who can miss a building right in the middle of campus? I knew where it was.

But I didn't count on trouble finding my room once I got inside the building. That place is like one of those mazes they have little mice run through in psychology labs. Once you do get it figured out, though, it really is nice. Everything is so new and modern. Too bad my apartment isn't like that.

Throckmorton Hall is easier to find your way around inside. Throckmorton is Plant Science Phase One and the old dairy barn is being remodeled as Phase Two. They go through a lot of phases around here.

The real problem is around Durland Hall, because of the addition of Engineering Phase Two. I get frustrated trying to get from Ackert Hall to the center of campus. I have to go the long way around because the road is fenced off, with big NO TRESPASSING signs all over the place.

The fence is also because of the addition to the chiller plant. The street is going to be blocked off for the next two years. I think I'll cry.

Construction of a third floor on Shellenberger Hall is planned and the road by it may be blocked off at times, also. I may need a helicopter to go to class!

Some of the old buildings on campus are getting remodeled. Holton Hall will house the Center for Student Development and the south wing of Burt Hall will be renovated to hold biochemistry research labs.

I almost jumped for joy when I found out funds had been allocated for planning reconstruction of Nichols Gymnasium. I love that old building. If all goes well, it will house computer science, speech and statistics. I wish I could be here to see it happen. Ten years from now I may not recognize this place.

Bye for now, sis, I've got to go to Bluemont 123 — wherever that is'

EXPERIMENT IN PROGRESS  
INSTITUTE OF ENVIRONMENTAL RESEARCH

AND HOW DO YOU FEEL NOW?

# Hey, do you wanna make 12 bucks?

"Twelve dollars! I could really use that kind of money," I thought to myself as I scrambled through my backpack for another dime for a Coke.

It sounded like easy money to me. The Institute of Environmental Research was conducting another experiment and I decided to find out what I needed to do for this "easy money."

I had a few minutes before my next class so I went to Seaton Hall to find the IER. As an accounting major, I had never been in Seaton and trying to find the IER took longer than a few minutes. After asking for directions twice, I found the part of Seaton used for the IER.

After talking to the office personnel I was convinced it was a harmless experiment and I signed up.

A week later I was at the IER waiting to take part in the experiment. The lab attendant handed me a short-sleeved shirt and a pair of cotton pants and told me to put them on. They weren't form-fitting, but at least they were comfortable

*Wired up* — Electrodes measure the body temperature of Renee Toyer, freshman in social work, during a clothing experiment.

All I did was sit in the environmental chamber and study. Every 30 minutes I was to fill out a form about the temperature and how comfortable I was in the clothing. I also had to change into another set of clothing in the middle of the experiment. I hadn't been overworked for my \$12 and I even got some studying done.

When the experiment was finished Fred Rohles, director of the IER, told me that I was among thousands of K-State students who took part in setting comfort standards used across the country.

The IER has been in operation for 16 years and the research done is used in conjunction with the American Society of Heating, Refrigerating and Air Conditioning Engineering Inc.

"ASHRAE looks to us for what man will tolerate as far as thermal environment is concerned," Rohles said.

The experiments are conducted in a box-like room called the environmental chamber. K-State's chamber is one of three in existence. All three are operated by K-Staters.

With the \$12 securely in my pocket I couldn't help but wonder where the money came from to pay volunteers.

ASHRAE has provided grants to the IER ranging from \$25,000 to \$60,000 for most of the research according to an article in the K-Stater Magazine. The institute also does research for companies. For instance, the Ford Motor Co. sponsored a \$250,000 study of efficiency of their air conditioning systems. The experiment used 2,900 volunteers.

Much of the research conducted at the IER is tied to other departments on campus. For the clothing study, the IER had the help of the clothing and textiles department.

Walking out of Seaton into the Kansas heat, I brushed back a bead of sweat from my forehead. How could a person like me — who can't stand Kansas heat — set comfort standards for other Kansans?

"Oh well," I thought, "Maybe I can help people in Wisconsin!" **EP** by Char Heinke

## Budget cuts

Deciding whether they have enough money to go to Aggieville on Saturday night or if they can afford a new pair of Levi's is the extent of some students' financial worries.

For many other students the problem is much more serious. President Reagan's budget cuts to education, along with a tuition increase, forced students relying on financial aid to contribute more of their own money to pay for college expenses.

Pell Grants, formerly known as the Basic Education Opportunity Grants, and the Guaranteed Student Loan program were two victims of budget trimming in 1981.

The budget cuts affected the 1981-82 school year in three basic phases, according to Robert Evans, director of student financial aid. In March the Pell Grants received an across the board \$80 cut. Students receiving the grant lost an average of \$80 depending on their financial situation in 1980.

The second phase of cutbacks began Oct. 1 when the interest rates for Guaranteed Student Loans rose from 7 percent to 9 percent.

Also, the grace period before payback was shortened. Students who received loans before Oct. 1 had nine months after leaving school before beginning payment. The first payment was moved up to six months for persons who got their loans after Oct. 1.

The third phase went into effect in the spring when money for work-study, supplementary grants and National Direct Student Loans runs out, according to Evans.

He pointed out that the cutbacks will not drop many students from the financial aid program, but just reduce their package.

Carla Gasper, junior in special education, had a large reduction in her financial aid. Gasper's Pell Grant was cut in half and she received no work-study after getting it for two years. Instead she received campus payroll for one semester working at the library. ♦

*My check, please* — Jeannie Hayes, freshman in arts and sciences, fills out forms while her award package is checked by the receptionist at the financial aid window in Fairchild Hall.

"Students will probably have to make an additional sacrifice. But I don't think it's a sacrifice so destitute that it's going to keep them out of school."

## affect awards

"The only reason I got a job was because I was the only one who knew reference in the library. I don't know what I'll do next semester."

Gaspar did receive a GSL which she felt she got because she applied as early as February. Most financial aid is based on need and the day the application is received. Although no awards are based on classification in school, graduate students have more loans available to them because they do not have access to the Pell Grant or work-study, Evans said.

Dale Dubbert, sophomore in electrical engineering, received the same amount of grants and loans as he did last year but said he went through a lot of paper work to get them.

"They (financial aid) checked and rechecked our family net income and I finally went to the office in person. But I was really happy with what I received. I know it could be worse."

The director of financial aid said there are more budget cutbacks yet to come. Evans said that parents and students have to recognize that they have a greater responsibility to financing the student's education.

"The slogan that I've been trying to use is that this isn't the end of budget cutting in Washington and it won't be the last time we get a cutback. We hope the coming cutbacks are not so big."

As more cutbacks are made, the financial aid office will continue to point students to the sources of aid still available, Evans said.

"Students will probably have to make an additional sacrifice. But I don't think it's a sacrifice so destitute that it's going to keep them out of school."

"They may just have to budget a little more carefully, they may have to work a few more hours, or if they haven't been working, they may have to get a part time job."

"As students select colleges — and K-State is not the only one — some of them will have to start making decisions. Am I willing to work a bit more? Can my parents help me a little bit more than they thought they could? Those are the types of sacrifices which all parents are going to have to face sooner or later." **EP** by Susan Arnoldy

# Family experience may

If you are a descendent of L.W. Newcomer, grandchild of Olinda Haberer or have had two years service as a carrier of the Manhattan Mercury, believe it or not, you are eligible for scholarships offered at K-State.

Approximately \$950,000 of scholarship money was offered by the KSU Foundation for the year, according to Tom Carlin, publications director of the Foundation. The money provided financial assistance to about 1,900 students.

To apply for a scholarship a student

must complete a Kansas Student Data Form and indicate scholarship interest. The form is part of the ACT financial aid packet used at K-State.

Eight colleges offer scholarships for their specific areas. Scholarship prerequisites vary from simply majoring in a department to fulfilling specific credentials. A student need only fill out the Kansas Student Data form to be considered for all scholarships offered, according to James Upham, associate director of Student Financial Assistance. Fulfilling the credentials, however, may

Russell Shortt

# equal money

be another matter.

For instance, the College of Agriculture offers a scholarship commemorating Dr. Richard A. Pickett. To be eligible, the student must be an animal sciences and industry major with "a very promising future." Dr. Pickett was student body president at K-State and a long-time member of the animal husbandry department.

The same college offers the Thomas and Jessie Page Memorial. The eligibility requirement can be fulfilled simply by majoring in agriculture and milling technology. Thomas Page was a miller in Topeka and the scholarship was set up as a tribute for his contributions to industry and growth in Kansas.

A grandchild of Olinda Haberer is eligible for a scholarship established in her memory by friends and former associates. Olinda Haberer raised three children as a widow and the scholarship honors her for her job as a mother. When no grandchildren remain, the scholarship funds will convert to a general fund of K-State scholarships.

Being a Protestant male is an eligibility requirement for the Herbert M. Low Scholarship offered by the College of Engineering. The memorial was set up to honor Lowe and was sponsored by members of his family. A member of Sigma Tau engineering honorary is further eligible and the memorial is renewable as long as the applicant remains qualified.

The Ely Bergman Scholarship requires students to check their roots. To be eligible the student must be a direct descendent of Ely Bergman. He or she must be a junior or senior — preferably from Marshall County. The scholarship was created by Bergman's husband, Edward, and their children.

There is even a scholarship for people who write stories like this one. The Marlene Myers Memorial is for third year students who are members of the Royal Purple yearbook staff. **REP** by Susan Somora

*That will do it* — In her Chemistry I class, Kelly Murray, freshman in physical therapy, puts the final adjustments on a gas generator. She is attending K-State with the Lewis B. McConaughy scholarship.

# WRC moves

Many students are unaware of programs designed specifically for them even when the service is located in the middle of campus. Such is the case regarding the Women's Resource Center.

Approximately ten years old, the WRC has been housed in Fairchild Hall, Holtz Hall and in the SGS Office of the K-State Union. In mid-October, the Center made yet another move to Holton Hall.

According to the Caroline Peine, director of the WRC, the move was beneficial. The Center last year was housed in the SGS Office in a room the size of a small cubicle. "Although the walls at Holton aren't soundproof, there certainly is more privacy there and consequently more confidentiality," Peine said.

Peine succeeded Margaret Nordin when Nordin chose to concentrate on the Fenix Program, a program for undergraduate students over 25.

According to Peine the Commission on Status of Women sent a letter in 1980 to President Acker asking for a larger university commitment to the WRC and women's programs. Peine became director at the same time.

"In the past, the Center was highly invisible," Peine said, "Every counseling service has a similar problem"

She said the problem was being corrected. "The visibility is improving and the Center is already getting more traffic."

Peine was unable to give exact increases in student use since she had not been involved with the Center extensively in the past.

One aim of the WRC was to inform students of women's problems. The subject of one such program was pornography.

"This is definitely an area of concern. The program was a vehicle to show violence against women," Peine said. The program consisted of small group discussion lead by Ann Bustor of the psychology department who provided the basic information.

To publicize the Center, Michelle Crosby, graduate in history, assisted the WRC by making contacts with the residence halls to provide information and to answer questions.

"There are several misconceptions about the WRC," Peine said. "Although the more loyal supporters are women, men also come to the WRC. ♦"

# to Holton

According to Peine, both men and women come to the WRC with a variety of personal concerns.

One major concern is child care by a single parent, whether the parent is a man or woman.

Rape education and prevention is another major concern.

"There is a heightened awareness when a reported incident occurs that usually lasts two weeks. The Center must take advantage of this."

The WRC is financed in part by student tuition. Student Governing Association provides the salary for work study positions and advertising budget. The remaining operating budget is subsidized by the Center for Student Development. **RP** by Susan Somora

*Speaking out* - Informing students about rape, Caroline Peine, director of the Women's Resource Center and Julie Talge, sophomore in fashion design, participate in an anti-rape rally early in the fall. The rally was jointly sponsored by Fenix, WRC, and Womens Study and Student Council.

Mark Sageser

# Labs aimed at bilingual foreign students

K-State has approximately 750 foreign students enrolled. For this reason, The English department offered classes that concentrated on foreign student's problems in English, both in writing and grammar.

Karma Smith, head of the writing lab program, has taught at K-State since 1974. She usually had two or three foreign students in her composition classes, she said. Smith felt that foreign students needed extra help in specific areas so she started the writing lab program.

Smith pointed out that foreign students' native language causes interference with their ability to master the English language.

"Each native language brought particular problems," Smith said. "Different countries put different emphasis in areas of the English grammar, both grammatical and vocabulary: English articles or forms of structure."

"Also," she added, "that is why foreign students need to learn different ways of thought; in the way ideas are presented to the reader."

"In the oriental language, it would be considered offensive to use a direct thesis statement. They concentrate on the indirect pattern in sentence structure, and this is sometimes an advantage as well as a disadvantage to the reader."

Smith said she enjoys working on the program because she learns as much as students in the classes, but that time is a problem.

"Yes one problem that I find is that 15 weeks is too short a period of time to cover all the areas in which the students need help. This is mainly because the students are on different levels and therefore need extra help in different areas from each other."

Don Niessen and Naomi Ossar also teach special English classes.

Ossar said she had learned a lot more from the average foreign student than American students on the same academic level.

"Most of them have had more life experience than American students, that is, they've had jobs before attending school," Ossar said.

The University provides four supporting courses in English for foreign students. The speech department offers spoken English and the English department offers written English, English Composition I and English Compositions.

The goals of Composition I for international students are to give bilingual students instruction and practice in writing in the straight line style of American academic prose.

At least 80 percent of the work is carried out in class. It is more of a laboratory course rather than a lecture course.

In spring 1981 English for foreign students had 11 students enrolled, Composition I for international students had 27 enrolled and Composition II had 47 enrolled. This brought the total to 85 students.

Before being admitted to K-State, international students must demonstrate English proficiency on tests administered in their respective countries.

After admission, University policy

requires students to take "in house" English proficiency tests to determine whether or not they need to take special English courses in addition to their normal course load.

During the summer the English department, along with the Division of Continuing Education offered an Intensive English Program for advanced students of English as a second language. The program was backed by the Graduate Council which said the University should provide "a more comprehensive program in English for students from abroad." There were 23 enrolled in the program which ran for eight weeks, five days a week.

The goal of the program was to improve the English proficiency of students who were academically

*One on one* — A Writing Lab instructor gives personal attention to a student during a walk-in lab.

qualified for admission to K-State but needed more work in the English language before undertaking a regular program of study.

The program served as a trial basis to determine whether or not a regular special English program should be established. As a result 14 out of 25 were granted provisional admission to K-State.

The program was financially self-supporting through student fees. The four basic courses offered were Structure and Writing, Speaking and Understanding, Reading and Cultural Orientation. The program also included special activities such as campus tours and recitations. **by Kabura Githaiga**

*Booking it* — Writing Lab gives bilingual foreign students practical experience in writing American prose. Together the Speech and English departments offer four supporting courses in English for foreign students.

*Word it right* — Individual attention is given to each student that uses the writing lab program.

*Just a few more*—Clean dishes are unloaded from a dishwasher in Derby Food Center by Rick Teaford, graduate in animal science, and his wife Lynne, sophomore in horticulture.

# It's not mom's, but it's pretty close

Despite Ronald Reagan's declared war against it, inflation hit food prices again. Even your favorite fast food meal of a Quarter-Pounder, fries and a Coke isn't much under \$3. Now try to imagine feeding yourself on \$3.20 for a whole day.

K-State residence hall food services showed that it can be done and done well enough to receive recognition by the National Restaurant Association and the National Association of College and University Food Services.

Most students complain about "dorm food" at one time or another, but not many restaurants give out seconds on hamburgers, bread, soup, potatoes and vegetables, and also chili and spaghetti.

Although nothing can beat mom's cooking, the food centers try to give a good atmosphere in your "home away from home." On holidays and in the spring special dinners are prepared that entice the most finicky eater to "pork out." Turkey and stuffing, pumpkin pie, crecent rolls and a salad bar at Thanksgiving, steak and baked potatoes at Christmas, and a Hawaiian Luau with roasted pig are just a few of the special dinner menus.

The "Land of Ah's" was a

special dinner served May 6, featuring filet of beef with frog legs, baked potatoes, corn-on-the-cob, five different salads, fresh baked wheat bread with honey butter, along with chocolate cake, pie and rainbow sherbert for dessert.

For the dinner K-State won first place in the University Food Services section of the National Restaurant Association's "Great Menu Awards Contest," according to Jean Riggs, director of resident hall food service.

On July 9, 1981, K-State received another award from NACUFS at its annual meeting in Salt Lake City. A Hawaiian Luau served in residence halls last April was recognized as the "Outstanding Special Event Dinner."

The menu included pina colada appetizer punch, roast pork, chicken breast, baked salmon, oriental vegetables, tossed salad, banana muffins, Hawaiian sweet bread, pineapple-nut cake, island fruit, coconut ice cream and other tropical delights.

Feeding hall residents is no small task. There are five food centers on campus: Van Zile, Derby, Kramer, Putnam and Boyd. On an average weekday dinner, Derby alone serves 2,234 students on seven cafeteria lines along with 110 athletes on scholarships at the training table, said Helen McManis, administrative dietitian and instructor at Derby Food Center.

To plan for meals Derby has developed a computerized system which projects how many students should eat a certain meal. The computer tells dietitians how many "batches" of a particular recipe are needed for that meal. Batch cooking uses pressure cookers and huge ovens continually to cook food in smaller quantities throughout the meal instead of making one large recipe. For instance, if mashed potatoes are needed for a thousand people, four batches of potatoes for 250 people will be made during the meal.

Keeping in step with rising prices, K-State Housing reports that residence Hall room and board will rise from \$780 per semester to \$880 per semester for the 1982-83 school year. However, the cost of a meal there will still only be a fraction of the price of a meal eaten in a fast food restaurant and perhaps more nutritionally complete. **RP**

*Keep it moving* — Frank Ringhofer, sophomore in pre-design professions, and Julie Harms, freshman in arts and sciences, remove the dirty dishes from trays as they move down the conveyer belt at Derby Food Center.

photos by Allen Eystone

# Diversity; key to clubs

K-State clubs are for students on campus or off, new students or older ones; for students who like to help others or those who need help; those who want to meet people in their major or meet people around the world; for students interested in saving wildlife or shooting guns, those who love to ride horses or those who love to heal them; for students who love to cook or those who eat too much, those who enjoy arranging flowers or those hooked on sewing; for students who love to fly airplanes or those who fall from them, those who love to sail flying discs through the air or those who kick a soccer ball through goals; for students who are in two majors or those who are graduate students; those who are fascinated by their major or those who want impressive resumes.

There are nearly 200 organizations and they can be divided into five major categories: service organizations, in-major organizations, honoraries, religious groups and special interest groups.

One of the best known service groups on campus is Circle K. The biggest project for the organization is helping with the Red Cross blood drives, according to Paul Laugesen, club president. In addition, Circle K also helps the elderly in Manhattan and is involved in sponsoring Special Olympics.

Students wanting to meet others in their major, to learn more about their

field and to learn about the job market may join an organization in their major. One typical in-major organization is the Ag-Mechanization Club. According to adviser Ralph Lipper, the club promotes the major, and allows for students to learn about job opportunities.

Students who have a high grade point average may be invited to join an honorary. Blue Key is in charge of coordinating all Homecoming activities and also sponsors the ambassador program at K-State. Each year two students are chosen as K-State ambassadors.

There are also plenty of religious groups for those so inclined. One of the more active of these is Ecumenical Christian Ministries (ECM).

According to Mike Sanderson, an ECM member, the group is not sponsored by one church but four, on a statewide level.

"Our main project is having a supper every Sunday for students on campus since the food centers close down. At the supper we present a program of some type either dealing with current issues or entertainment of some kind," he said.

Even students having specific interests such as politics and minority affairs or hobbies like weaving or horse-back riding may easily find an organization to cater to their needs. **RP** by Sue Schmitt

Scott Williams

*The crunch* — John Dubois, senior in accounting, passes the ball that has come out of the "scrum down" for mation to Rugby Club team mate Mike Patten, graduate student in architecture. The K-State Rugby Club faced a difficult season with rookies making up nearly half the squad. The game is fast and frenzied, and continues to gain popularity on campus.

Mark Sageser

**Bargain books** — Ray Hansen, sophomore in psychology, looks over the books at the Student Association of Graduates in English book sale. The books were sold for less than one dollar each to raise money for the club.

# A report from

It was a simple request, to write a story for the yearbook about a story for the Collegian. Anyone could do that — at least anyone who works with the Collegian every day.

The basic idea was to follow a story from its conception to its birth and possibly its death. The story was not to be anything too spectacular or too front-page; most of the stories in the paper are just not Watergate. As result, an "average" and dependable (yet not flashy) reporter would be necessary.

The story was to be on local flower shops and what sort of threat the campus FTD chapter was to business. Who would suspect such a simple story would cause so much grief for one somewhat short, unsuspecting editor.

The reporter? One of the reporting students would do. Not someone who became easily excited by the prospect of uncovering some dirt in the flower shop business. Someone who would simply finish the story on deadline, well written, and proofread.

First, an explanation of Collegian

# behind the story

verbage is called for. An R2 is not something out of Star Wars, but rather a student in his second semester of reporting classes. Journalism students must take Reporting-1 and Reporting-2, thus the title R1 or R2. R2's are the lowest form of life in the newsroom (ask any editor), yet are a vitally important mainstay of the paper. E2's are Editing students in the second phase of editing classes.

Had the news story panned out, this would have told how the reporter, Scott Kenyon, had wandered into the newsroom one day, totally unsuspecting, and been hit not only with the idea for his story, but the idea for this one. Then, Kenyon would have written the story and returned to the newsroom.

Ideally, the news editor would sit down with Kenyon and go over his hard copy (what he typed on paper) to review it. But, Jim, the spring editor, was busy interviewing applicants for his spring staff and Deanna, the news editor, was working on another story. ♦

*Candid cameras* — Photography editor Rob Clark, sophomore in journalism and mass communications, is armed for action during a men's basketball game in Ahearn Field House.

photos by Scott Williams

*Typical typing* — Typewriters are available to students working for the Collegian or Royal Purple. Connie Miller, senior in dance and a Reporting-2 student, works on a story at one of the eight typewriters in the room.

## Behind the story

Eventually, Deanna (wanting to get out of Kedzie before midnight) picked up the story and began the editing process. She first typeset it onto the VDT (video display terminal). With VDT's staff can make corrections, deletions or additions to a story by pushing a few buttons.

After typesetting the story, Deanna edited it — correcting mistakes and answering all the questions raised by the copy. All the questions Deanna had, that is. When she was done she told Deana, the managing editor on duty, that the story was ready to read.

Normally, copy is first read by Eva, the copy editor, and then the editor. However, Eva didn't come in until about 4:30 and on this particular day, the editor was in early and wanted to get some copy read.

In any copy, mistakes or typos are bound to occur. This is the rationale behind three editors reading a story — so mistakes and questions can be found.

In the course of any afternoon at the paper, there are inevitable interruptions. Monday afternoon was no exception. Dave Adams, director of Student Publications, came in spouting off about drowning not really being a word. Dr. Marsh, head of journalism and mass communications, came in to have his mug shot taken and to discuss the E2 final with this editor. Giles Fowler, Seaton professor in journalism and mass communications, came in looking for

conversation, and Anton, the illustrious yearbook editor, came to check the progress of the story.

The story was finally edited, and refiled into the computer to await Eva. By this time Eva had arrived and checked to see what copy had or had not been read. She was asked to read the sports copy first, rather than news copy which this editor and Deanna were working on, and then to read Scott's story. All local copy was to be sent to the composing room as soon as possible, as the basketball game would make it a late night.

The next few hours were simply a mix of editing, eating dinner, working with photographers and helping the assistant sports editor with page layout.

Once Eva finished editing, Scott's story was sent to the composing room.

During the copy editing, much else is done in the newsroom. Simultaneously the managing editor lays out the stories onto the page and the E2's (remember them?) are writing the headlines. Before Diana went home at 7 p.m. Monday, Scott's story had been laid out and headlined.

Essentially, when Scott's story was sent to composing, it was taken care of for the night. But, after Dale lays the copy on the pages it must be checked by the editor to make sure that the headline is correct and that the story fits in its given hole. Scott's story would

have probably been a line or so too long, in which case the editor tells Dale to cut those lines off with his Exacto knife when he pastes up the story.

Monday night we finished early — a happy event for printers and editors alike — when it happens. Had Scott's story come in on Tuesday it would have experienced a great deal more moving around as editors had to take a 20 page paper and re-lay it out as a 16-page paper.

As it turned out, Scott's story fell through. This has been what would have gone into the story had it indeed been a story. Every day, editors face stories that fall through because either the story just isn't a story or the reporter fails to produce copy. Such days, the paper is known to be called The AP Collegian because most stories are from the Associated Press wire service.

Usually, it requires effort from almost 50 students to publish the Collegian every day. Because of that, writing a story about the Collegian is really no simple request. **RP** by Alice Sky

*Crashed out* — Features editor Kimber Williams, senior in home economics and journalism, takes a nap after working on the Collegian.

*Pressure release* — Mary Poppins is a welcomed interruption by Collegian staff members as they gather around the Rim to watch television. Balancing class loads and deadlines can make the newsroom a tension filled place. Sometimes a diversion is helpful, sometimes not.

Rob Clark

# Two weeks in the life of a reporter and a non-story

## Tuesday

1:15 — Walked into newsroom. Was greeted with "Scott, we have an assignment for you." Received assignment. Assignment read: Local florist shops feel threatened by the K-State FTD club. Penciled in at the top it said: ... it occurs to me that there's a story here — not just the FTD club, but all campus clubs sales and the merchants.

1:20 — Read the paper

1:30 — Listed all the organizations I could think of that conducted sales.

1:40 — Not coming up with many — went to eat lunch. Conducted an informal survey while eating. Still didn't come up with much.

2:25 — Went to class.

3:20 — Conducted another informal survey in the newsroom. The rumor that journalists are better informed is not true. Didn't come up with anything new.

3:45 — Went home.

## Wednesday

Wednesday was a bad day. I didn't work on any stories

## Thursday

This was the day that my furnace broke and I

woke up with a house full of smoke. I got to the newsroom late.

11:30 — Called Manhattan Floral - Spoke to a lady who referred me to "Bill" who was out for the day. Told me to call back tomorrow.

11:02 — Called Polley Florist. Told me to call back after 12:30 and talk to Mildred Polley.

11:05 — Called Kistners Floral. Talked to a woman who said that I should talk to her mother, Kittie Orr, who had a definite opinion on the subject. Call back after lunch.

11:10 — Went to the Union. Saw my friend Jim who who is a horticulture major. Asked him if he knew who was in charge of the K-State FTD chapter. He didn't know. Sat down and talked.

11:30 — Checked with the SGA office to find out who was the club sponsor. They didn't have any records on the club.

11:40 — Walked to Waters. Checked with the departmental office. Secretary sent me to R.K. Kimmins' office. He was out.

12:00 — Went to lunch. A morning of rejection builds your appetite.

1:05 — Returned from lunch. Called Kittie Orr. Said almost nothing.

1:15 — Called Mildred Polley — she was out

again. Back at three.

1:17 — Worked on assignment for another class.

2:25 — Ran into the instructor for my 2:30 class. Guess I have to go.

2:30 — Went to class.

3:15 — Found the name of the club's president. Called, but she wasn't home. Back after five.

3:25 — Called the girl who turned in the story idea. Wanted to see if she had just made the whole thing up. She wasn't home.

3:30 — Called Mildred back. Still not there. Waited for her to return the call until ...

3:50 — Went the bathroom.

3:52 — She called back.

3:55 — I call her back. Mildred would make no comment on the record, but referred me to Daryl Westerveldt.

4:05 — Called Blueville Nursery to talk to Dorothy Westerveldt. Husband said she wasn't in. Referred me to a Mr. Smith, among others.

4:20 — Talked to Mr. Smith at Green Thumb. He would make no comment but referred me to Carl Meyers at Horticultural Services.

4:25 — Called Meyers. Receptionist asked who was calling. Put on hold. She came back on and said that he was just pulling out and wouldn't be back until five. Told me to call back at eight in the morning. Have to cover another story tonight.

## Friday

8:32 — Call Carl Meyers. Said that there had been a problem but it had all been taken care of. Said that it was an old issue. Obviously did not want to talk to newspaper, but gave a short statement.

## Sunday

6:40 pm — Got hold of the FTD club president. She said she didn't know anything about it and referred me to Kimmins. Told me that Kimmins would be out of the state for a week for Thanksgiving vacation.

## BLEW OFF STORY FOR A WEEK \*\* WENT HOME ON VACATION

## Monday

1:00 — Called Kimmins. He said there wasn't much problem. Said that he wanted to read any story before it went into the paper. I said that we couldn't do that, but read back what I had written down.

1:35 — Called Dairy Sales. Line busy. Called Meat Sales. Line busy.

1:45 — Called Dairy sales back. Got through to a man named Harold Roberts. He explained that it and the Meat Sales were departmental sales, not clubs sales. Gave me a good interview.

1:55 — Meat line busy again. Work on other stories.

2:30 — Talked to editor, story not really a story, keep trying.

## Tuesday

Afternoon — Discussed story with editor. Decided to kill story.

# Education over long distance

There are three types of students: the kind that attends class regularly, the kind that attends only a portion of the time, and the students that never go to class at all. Actually, the third kind of student may never even make it to campus. Impossible? Not for a member of the Non-Traditional Student Program in the department of continuing education.

"This idea was formally designed in 1975, and was started so that students who could not come to campus would still attain their higher education needs," said Buzz Muir, director of the Non-Traditional Student Program. "Originally, there was no program to put together the different off-campus services that were offered to students."

The number of older students continues to grow while the 18 to 22 age group decreases. This increases the need for non-traditional programs for adults unable to come to campus, Muir said.

The program included 160 active students, living across the entire state. The participants cannot make it to campus for a variety of reasons. They may have a family, or jobs that conflict with regular school hours. They may be near a junior college, but unable to complete their degree at a four year school. For whatever reason, they choose to complete their education and they do it through the Non-Traditional Program, Muir said.

The program operates as an aid to the student. Students accepted into the program work with a faculty member on their course study.

At many universities, a student would get a packet at the beginning of the semester, read and answer the booklet, and wait for a written response in the mail, Muir said. At K-State it is mandatory that interaction takes place between the professor and student. This is usually done via the telephone. The communication is intended to keep the program creative and uniform and makes the student feel more a part of the University, Muir said. It can also be supportive for students to know that teachers care about completion of assignments.

The program also uses Telenet — a network that has hookups with 34 different areas around Kansas. The system makes it possible for a student to listen to a teacher in a classroom setting and interject questions whenever necessary. The Telenet

system was developed in 1970.

Because of the unique style of the program, more responsibility is placed on the student, Muir said. It is important that students keep in close contact with professors and advisers. Participation by faculty is voluntary but the time commitment is large because of telephone, preparation and grading time.

Acceptance into the program requires an application review by a faculty board. The board reviews each applicant based on four factors: the applicant's career goals, academic goals, background for potential quiz-out of credits and reason for not attending classes on campus. The board then accepts or rejects students who have applied for admission into the program.

Although being degree-oriented is not mandatory, 90 percent of the participants work toward a degree. Not all degrees are offered to non-traditional students, but the program does include science, teaching and general home economics degrees. Students may work toward a special degree called the degree of general study. The older student with a lot of practical experience who does not have a particular degree interest may take courses in general study.

*On the air* — Students in the Telenet broadcasting room, as well as students across the state, listen to a guest lecturer speak on exceptional children.

*Any questions?* — Warren White, assistant professor of administration and foundations, listens for questions from students at any of the 34 Telenet hook-ups in the state.

photos by Allen Eyestone

## Students get long distance education

Rob Clark

The program also helps older students on campus by publicizing quiz-out programs available to them. Teachers may use the program as a consulting group, Muir said. If a student has a good academic background, teachers are not always able to evaluate the level of information possessed by the student. The Non-Traditional Student Program can provide suggestions for evaluating students, or give pointers in finding needed information.

The program pulls together information and resources available to non-traditional students into a central location, Muir said. It provides a place where people understand the needs and wants of non-traditional students.

The program is the only four-year system among Kansas' regent schools. Other programs, such as at the University of Kansas, require students to earn a portion of credit hours on campus. The non-traditional student at K-State may earn a degree without ever setting foot on campus. Since 1975, 25 students have graduated through the program.

"That is quite an accomplishment, since many times the student just takes a few

courses a semester," Muir said.

It is difficult to estimate the average time spent in the program because many students have previous college credit and use the program to complete their degree, Muir said. She added that non-traditional students face problems when they return to school.

"They are usually not eligible for financial aid. Another problem is that it can be difficult to advise them. Sometimes practical experience can add to the college education, but people have problems following the entire process."

Non-traditional students are at a disadvantage because of their isolation.

"On campus, you are easily exposed to the library, and other resource forms," Muir said. "But when you are in areas where information is not so accessible, it can be hard."

The disadvantages are overcome by putting the student first and the institution second, according to Muir.

"With a program like this one, there has to be a commitment to helping the student," Muir said. "That is our goal — to help." **RE** by Donna Hopson

*Window watching* — Dale Weishaar, senior in agronomy, finds a quiet corner with a view by the southern windows of the recently completed Throckmorton Hall. The new building houses the plant sciences offices and classrooms.

*Ivy League?* — Anderson Hall, taken for granted by the average K-Stater, is never seen by some non-traditional students.

# Union displays its many faces

**K**-State Union. The bright purple letters stand bold on the walls of the building to welcome those arriving at their destination. The building itself may appear a cold empty facility. However, it is more than the physical feature that was constructed over some 26 years ago with the use of student activity fees.

For the doubting, try walking through the Union on a Saturday evening, then stroll through the building at noon on a weekday. During the school hours, the Union comes to life with the movement of masses heading all directions to class, home, meetings or to the cafeteria for a bite to eat and a social hour.

"I usually walk through the Union before and after class to see if I know anyone. If I do, I'll end up taking a few minutes to stop and talk," Kendre Plonte, sophomore in fine arts, said.

"The Catskeller is a great place to study. It gets me out of the house and in a study environment," Julie Newman, senior in business administration, said.

Versatility is one of the Union's strong points. The facility offers areas for studying, socializing, meetings of organizations and recreation. The Union Bookstore is a popular place to purchase books, supplies and K-State souvenirs, especially to visitors.

"We find that our shirt sales dramatically increase right before Christmas and especially when workshops and camps are held for high school students," Sharon Riley, junior in journalism and mass communications and Bookstore employee, said.

The Student Governing Services (SGS) and Union Programming Council (UPC) offices are housed in the Union. Both organizations are student operated. SGS are groups, funded with the student activity fee, that provide services to all students. The SGS office includes Student Governing Association (SGA), the student attorney, Women's Resource Center, and Consumer Relations Board. UPC provides students with input into the operation of the Union.

Like K-State, the Union is a collage of individual groups in a single setting for varied reasons. These individual interactions give the Union its feeling of life. **RP** by Jerry Katlin

*Politicking* — The Union provides room for political expressions as well as providing other services.

*For sale* — The Union courtyard serves as a sale yard for lost and found goods.

*Where's mediums?* — Ricardo Zayas, senior in industrial engineering and finance, looks over the selection of T-shirts in the Union Bookstore.

# Dance program options expanded

In the fall of 1977 the current program offering dance as a major in the College of Arts and Sciences was initiated by Madeline Cantor and Ronnie Mahler, both former K-State instructors. The program was developed primarily as a performance-oriented curriculum with emphasis on the technical aspects of the dance profession.

"I think one of the problems with the technique-orientation is that no university can really sustain a respectable dance major with only technique," Luke Kahlich, assistant professor of dance, said.

"A student can go anywhere and take technique classes, they can go to New York, they can go to any studio. In a university setting you want a lot more than that, you should touch much more

*Light image* — The dance department expanded its performance oriented curriculum to include the theory and philosophy of dance.

*Striking a pose* — Lou Ann Kramer, senior in dance, spots during a dance workshop.

than one small area of a field," Kahlich added.

The department of health, physical education and recreation, of which dance is a part, began to re-evaluate the dance program in 1980 and proposed a new curriculum which was approved within the department in April 1981. After approval by the Board of Regents the curriculum changes will go into effect in fall of 1982.

The proposed curriculum would allow the dance student more options within the dance field. It would allow them to study other areas of dance such as history, philosophy or choreography.

"We're not slighting technique, it's the basis of the performance of the art. We're actually strengthening that, but we're supporting it even more by the theory, the history and the philosophies — the thinking, intellectual activity," Kahlich said.

Problems with the old curriculum arose as the first dance majors graduated.

"They all had problems going on with their major from K-State because there were no performance outlets in this area. Many of the students didn't want to leave the area but they had no theoretical background to do any sort of teaching or graduate work," Susan Warden, assistant professor of dance, said.

Under the new curriculum the student would choose between the performance/choreography option or the theoretical option if the talent lies in writing, in history, philosophy or criticism, Kahlich said.

Also, in order to graduate, a dance major would no longer be required to reach an advanced level in technique class, Warden said.

"This is in line with our idea that some people are not cut out to be performing artists. They should not have to reach an advanced level, it might take them the rest of their lives. So they'll only be required to reach the intermediate level if they would choose ▶

## Dance program

the theoretical option," she added.

A class entitled "Dance as an Art Form," included in the proposed curriculum, was offered to students in the spring. It is a course for all students that gives a survey of dance as an art form. Other proposed classes include a second semester of choreography and improvisation, a course on philosophy and aesthetics, and a course on writing for dance, Warden said. "Dance Styles and Personalities" will complement the current dance history class taught within the history department. It will look at the chronological growth of different dance styles through history.

Adding introductory classes to the curriculum is one way to immediately draw freshman into dance as a thinking activity and not a technical activity, Warden said.

The present dance curriculum is based on ballet, jazz and modern dance techniques. Dance Workshop is the departmental class that requires students to perform.

In the spring the Dance Workshop gave its first full evening dance concert. In the past the Dance Workshop has performed for half of a concert and the music department has staged a one-act opera for the other half of the concert.

Kahlich received a faculty research award granted to pay for an original score for an original one-act ballet he would choreograph. The theme for the ballet was based on Shakespeare's King Lear but focused on the relationship between Lear and his daughter Cordelia. Kahlich held auditions, open to University and public, in early December. Letters were sent to the departments of music and art asking for interested students to help with scenery or to be a part of the live orchestra that would accompany the ballet. Composer Ronald F. Williams from New York City was commissioned to do the score. Williams came in February to organize the music ensemble of approximately ten people. The score consisted mostly of percussion and was a combination of tape and live orchestra incorporating a synthesizer.

Kahlich, who holds a master's degree in theatre and dance, may have the answer for more exciting performances in the future if the departments of music, art, theatre and dance should get together.

One of the main purposes for the grant was for the arts to share what they have in common rather than what they don't, Kahlich said. *by Connie Woodard*

# Space limited Looking for

Office spaces come in a variety of shapes for graduate students at K-State. What was an old dusty loft located on the third floor of Waters Hall (a storage attic for odds and ends of the agronomy department) is now a spacious, carpeted, well lighted office space for agricultural economics graduates. Green grass once highlighted the south end of Calvin Hall, now masses of trailer houses cover the lawn and business graduates pour over their sheets of credits and debits.

K-State has filled every nook, crook and corner with old metal desks, file drawers and graduate students working on research projects. Architecture students compete for space in Seaton Hall.

"We don't make extra space for graduate students at K-State," Helen Cooper, space analyst with university facilities, said.

Seaton Hall is like a second home to many architectural, engineering and construction science majors. With the overload of students majoring in these fields, there doesn't seem to be enough space for graduate student offices.

"Each individual department makes space available for its graduate students," Cooper said, "Seaton Hall is usually different from other departments because its graduates need different types of space."

Up until two years ago, many agricultural economics graduate students shared office space with instructors. Now the graduate students are provided

# an office

ample space in a renovated attic on top of Waters Hall, according to David Mugler, dean of resident instruction.

"Two years ago funding came from the central administration through the University budget to renovate the attic and provide office space for agronomy and agricultural economics graduates. Now agricultural economics graduates occupy the complete space. Renovation was completed by the physical plant, but the preliminary work was done by many people. The agronomy department and some horticulture people organized crews to tear out part of the attic structures and the physical plant completed the project."

Many graduate students do not have the luxury of having an entire floor for their offices.

"In the computer science department, it is literally overflowing with graduate students and no space for them," Cooper said.

The computer science department may have space eventually if Nichols Hall is renovated within the near future.

Although space is limited for graduate offices, graduate students seem to make do with what they have for office space.

"Many of the graduate offices are like night and day. It just depends on what the department does to meet the demand of space for its graduates," Cooper said **EP** by Doug Putnam

**Renovation** — Esterlina Olan, graduate in economics, sits at her office desk in Waters. What was once an attic storage is now the economics grad student's office.

*What next* — Robert Holzwarth, junior in pre-design professions, contemplates his next move on his drawings at a late night session in Seaton Hall.

## Free-lancing,

Private citizen A wants to build an addition to a house, but can't afford the services of a professional architect. Architecture student B needs experience and money, so he agrees to do the work.

After one year, the foundation on the addition begins to sink and causes several hundred dollars worth of damage to the structure. Who is at fault and who pays for the damages?

The case is fictional but could easily happen. The answer to the question is not easy.

The situation would be the same whether the student is an architecture student or an engineering student, according to John Dollar, assistant dean of the College of Engineering. The party at fault is probably different than the one who will pay for it, Dollar said.

"He's (the student) open for some such suit," Dollar said.

But since the student generally would not have the money the owner would likely have to absorb the cost of repairs, according to some architecture students.

"They won't hold you liable. Most of the drawings are not in full detail," Denise Sullenger, sophomore in construction science, said.

"Specs are what get you in trouble," she said. "We don't get into telling them how to put them together, either."

Sullenger had not done free-lancing for a fee but had done projects for free for outside groups. "I've been approached by a lot of people," she said.

Chris Hansin, fifth year student in architectural engineering, said that he would not take on a project that he questioned his ability to handle.

"I wouldn't do any thing that wasn't the normal contracting," Hansen said. His projects usually do not involve specs either. ♦

# pain or profit?

"I did specs on one. Other jobs, usually people have an idea of what they want and they talk it out with the contractor," Hansen said.

Sheila Roffler, Manhattan resident, wanted some landscaping and an addition onto her house. She hired two architecture students to do the jobs by placing an advertisement in the Collegian personals column.

"I had quite a few calls," Roffler said. "They were all architecture students."

Roffler said that she was confident in the work, even though one of the two students did not finish his portion of the job.

"We didn't worry about the experience on this particular job," she said. "I don't think for what I wanted done, there would've been any problems."

If the project was larger, she would have been more concerned, Roffler said. The architect she hired showed her plans of other free-lance work he had done.

"One student that I hired had done free-lance work before," she said. "If I'd wanted to, I could've called these other people."

What if the work had been faulty?

"That didn't come into play. I'd had some feedback from other nurseries that would've done the job and I wasn't worried," Roffler said.

The University should coordinate student services to help out the community, according to Roffler.

"I wish there was a facility on campus that was open to the public," Roffler said. "The students need to practice and we are in inflationary times and I just can't afford to go to a professional for a job like this."

Dean Dollar agreed that free-lancing can be beneficial to both the student and the client.

"As long as the client understands the situation," he said. "Whoever the client is, they must know that the architect is still a student, only."

The College of Engineering does not have a formal program for setting up free-lance work.

"If someone mentions a job to me, I pass it along. That's really all there is," he said. **by Anton Arnoldy**

# Classes for

Manhattan isn't the only place where K-State classes are in session. The Wolf Creek nuclear power plant is a temporary classroom for Kansas Gas and Electric employees that want to upgrade their education.

As part of a program designed for the training of shift supervisors, senior reactor operators and shift technical advisers, both K-State and Emporia State are teaching courses at the Wolf Creek site northeast of Burlington.

The program is sponsored by KG&E and will last one and a half years, from June, 1981 to around Oct. 5, 1982.

According to Ted Wischropp, director of Development for Continuing Education, many utilities are realizing the necessity of providing additional training for employees, and programs similar to the Wolf Creek situation are on the rise.

"Participants will receive a total of 64 credit hours from K-State and ESU combined," Wischropp said. ESU is providing 36 credit hours in basic science with classes such as Advanced Chemistry and Technical Calculus while K-State is providing 28 credit hours in engineering technology and nuclear engineering.

The current program is taught under the Department of Engineering ♦

*Industrial classroom* — Teachers from K-State travel to the Wolf Creek Nuclear Power Plant in Burlington for a series of classes to train shift supervisors of the plant.

# Wolf Creek

Technology and uses faculty from the department of nuclear engineering. It is actually a technology program, placing most of the extra teaching burden on the engineering technology faculty, but because nuclear technology is most applicable to power plant operators, nuclear engineering faculty are also utilized, according to Ray Hightower, assistant to the dean of engineering.

The program was designed in eight-week sessions of classes followed by four week work schedules at the plant site.

Most of the classes are taught at the plant and KG&E paid all expenses of the program, including tuition for employees, and cost of faculty salaries.

As Hightower explained, K-State faculty have agreed to teach the courses on an overload basis. Faculty members drive to the site, or stay overnight and teach for a second day if that is required.

They also have office time where students in the program may go to talk with the instructor. Classes are taught in the same way they are taught at K-State and the courses are videotaped for future use.

As Wishropp explains, the videotapes may later be used for preliminary training of employees on the site and thus save K-State faculty from driving to Wolf Creek. **KEP** by Sharon Riley

# 'Pud' courses save brain strain.

“A pud class is one that requires no brain effort whatsoever,” Pamela Hundley, senior in retail floriculture, said. “You know, the ones that you’re embarrassed to tell your friends you’re enrolled in.”

“Pud” classes — classes that are considered to require little or no effort from the students enrolled in them — are popularly known as “G.P.A. Boosters,” according to Hundley.

“(A pud class is) a class like Music Appreciation, Theatre Appreciation, Advanced Bowling, Concepts of P.E., Jogging, Small Group Discussion, Square Dancing, Aerobics,” she said.

Other students, however, say they have found “pud” work in such unlikely sounding courses as Introduction to Nuclear Engineering, and Impact of Engineering Technology on Society.

A “classic” pud course is Appreciation of Theatre, a two credit hour course.

“It’s super pud,” Fred Rock, junior in accounting, said. “All you do is listen to lectures.” He admitted that critiques of performances were also required. According to Rock, many students sleep through class and “it’s a good time to write letters to your friends.”

Joel Climenhaga, associate professor of speech, instructs the course. “I tell them it’s a pud course. It’s just inconceivable that anyone could be so stupid as to fail it, but some do. They get C’s and D’s and so on,” Climenhaga said.

Like most pud classes, Theatre Appreciation relies heavily on attendance. “The class has 12 scheduled events (that the students are required to attend). If they go to all 12 events, have an A in their attendance and pass the final, they get an A,” Climenhaga said.

One absence is a B, two a C and so on, according to Climenhaga. The final examination has 50 multiple choice questions. A 50 percent or better score qualifies as an A.

“Frankly, what I try to do more than anything else . . . is to give enough that everyone will learn one thing that they didn’t know when they came into that class,” Climenhaga said.

Often, classes stressing a sport are referred to as “pud.” Terri Eddy, Union Recreation manager and instructor for

Advanced Bowling, said that grading is based equally on attendance, effort and a final exam. Eddy said the exam is based on basic bowling knowledge such as “methods of picking up a spare.”

“It’s not the hardest (one credit) hour they’ve ever had. We hope they have a good time while they’re in the class,” Eddy said.

Eddy doesn’t feel that students are spending their time uselessly in her class.

“It’s basically to introduce them to a lifetime sport. It’s one of the few sports you can participate in at the age of 80 or 90.”

Kim Ringer, junior in sociology, described Advanced Bowling as a relaxation period.

“It gave me more practice time. I think a lot of kids just take it because it’s a pud class,” Ringer said.

Not all classes which are generally considered academically light have simple titles. For instance, some believe Introduction to Nuclear Engineering, and Impact of Engineering Technology on Society, both worth three credit hours, are classes that can be labeled “pud.”

Introduction to Nuclear Engineering is designed to “provide some introductory knowledge to students who are not students in nuclear engineering,” according to Herman Donnert, professor of nuclear engineering and instructor of the course.

Donnert listed the format of the class as being “mostly lectures” accompanied by reading assignments, 10 problem assignments, five tests and one final examination.

Attendance was taken by distributing paper slips at the beginning of each class. The student signs the paper and turns it in. “There was no way someone can do a forgery,” Donnert said.

Mike Brown, freshman in finance, disputed the idea of forgeries. He said students would simply forge an absent student’s signature and the missing student would be marked as present. “Lots of times you could tell when people were doing it just by the size of the class,” Brown said.

Brown also said that he was never required to hand in problem assignments. “He never asked for them,” he said.

Donnert said that he “wouldn’t count off too much” in the class if an assignment was not handed in. He also said that “they (the class) took advantage of it. I’m going to be more strict this semester.”

Margaret Matz, senior in management, said she enrolled in Impact of Engineering on Society as a “a surefire way to pull up my G.P.A. I had a really full load last semester, so I took it,” she said.

According to Matz, although book reports were a required part of the course and a final was given, attendance was by far the most important grade determinant.

“You could only miss like two classes and get an A,” she said. “He (the instructor) gave five points for every book report and took off five points for every absence, so you could hand in extra book reports to make it (attendance records) balance out.”

“I never once — never once — read a book and I got full credit on my book reports. I just read the back cover and that’s what others did,” she said.

Since attendance was such a large portion of her grade, Matz felt that her instructor was especially hawkish. “He had an evil eye out. You could tell he was watching (for cheating on attendance).”

Attendance was taken by having each student pick up a card with his name on it at the beginning of each class period. The cards left would denote absentees.

“We tried . . . (cheating on attendance) . . . once and we got caught. The bad thing for me was that I was a girl and there were only two girls in the class,” Matz said.

Matz said there was no test except for the final, which she felt “didn’t even relate to the course, really. It was just going in there and writing.”

Matz said that students carrying an A at the time of the final were not required to take it.

She does believe she gained from the course. “You learn something about people, yet you know you have three hours credit going for you.”

Are “pud” courses simply fillers for elective credit or are they part of a broader education? ♦

Allen Eyestone

*Isn't that right?* — Joel Climenhaga, instructor of Appreciation of Theatre, typically uses a gesture to emphasize memorable points of his experiences with theatre.

*Aim that way* — During bowling class, John Garetson, senior in wildlife biology and class instructor, assists Brenda Stottmann, senior in home economics, in her practice of the fine art of obtaining a strike.

John Tracy, head of the department of electrical engineering and a student adviser, feels that students should enroll in courses that are good, solid, meaningful, and perhaps also difficult.

On the other hand, Vincent Gillispie, assistant head of the department of English and a student adviser, feels that such courses "are important because they offer a chance for exposure of the sort that many (students) never had before."

"Pud" classes. Laudable or Laughable? You decide. **RP** by Veronica Lorson

*The 'rock' is back*

# KSDB increases power, goes stereo

**K**SDB-FM, which has been serving the students at K-State for over thirty years, underwent "reconstructive surgery." The reason was not for an ailment but for self-improvement.

The station converted to stereo and increased its power output. The change was in the works for approximately two years and came to an end February 1, 1982, at 6 p.m. when KSDB signed on with an extra 90 watts of power and in full stereo.

KSDB, a public service radio station, is a class D FM station. This means that it is a low-wattage student station.

Lionel Grady, KSDB faculty adviser, called the station an album-oriented station. This means basically all it played were cuts from albums. Every weeknight from 9 p.m. to 1 a.m., KSDB featured specialty shows ranging from country to funk and soul. All of the disc jockeys, the news people and the management are students at K-State.

"Increasing the station to 100 watts increases the coverage area to include all of Manhattan and strengthens the signal to people who already receive it," Grady said. The Federal Communications Commission is trying to do away with all of the 10 watt stations and this is why KSDB applied to the FCC for the increase, according to Grady. "KSDB submitted the application to the FCC in December of 1979 and received approval in February of 1981."

Grady said the original target date for the "New KSDB" sign-on had been set for the first day of classes in the fall. After waiting 14 months for FCC approval, bids for the equipment had to be let. He also pointed out that the company that builds the 100-watt transmitters was back-logged four months because of the FCC ruling.

The power increase and the change to stereo did not come inexpensively. "Student Governing Association gave KSDB \$10,500 toward the purchase of the new studio equipment required for the transition. The College of Arts and Sciences added \$20,000 for the transmitter and \$2,000 was collected in donations," Grady said.

For the installation of the equipment, KSDB looked primarily toward Dave Richards, radio engineer for the station, and toward University Facilities personnel and special help from Dave Weise of KJCK radio whom Grady called

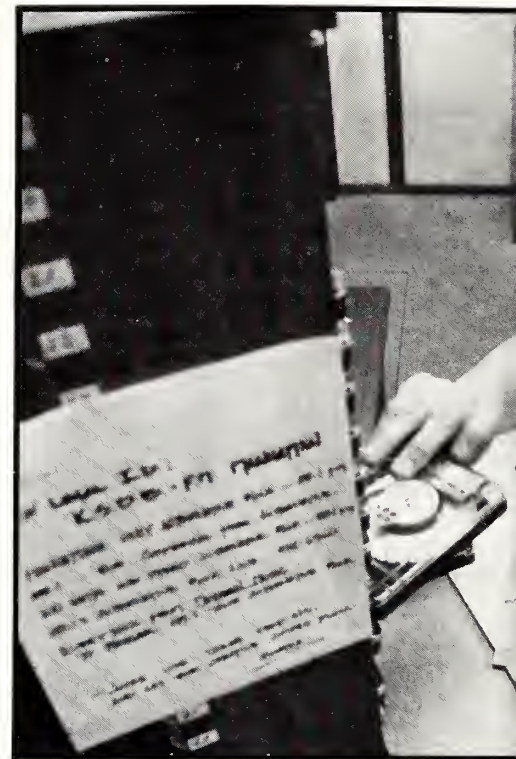

"the best FM man in the area."

"The facilities people were involved with a lot of the rewiring," Grady said. A lot of the studio equipment had been already installed over the summer but the transmitter and the antenna system were installed during Christmas break.

Grady thinks there is no question about an upsurge in the listening audience. "We are able to reach more people with a better quality sound." As for the disc jockeys, Grady thinks that they are trying harder knowing there is a bigger audience for which to perform.

The station changes did not affect the format for the first semester after installation. According to Grady, "The station will keep the same programming that it has this past year but I can't really say what the format will be like a year or two down the road."

The reason for this is due to the students themselves, because it is a student station and the students have a major role in saying what the programming will be. **RP** by Bill Brothers

**Finishing Touches** — Television engineer George Sheets consults with Dave Richards, senior in electrical engineering, about some final audio adjustments before KSDB can return to the air.

Allen Eyestone

Back on the air — Gary Novy, senior in radio and television and station manager, slips an audio cartridge back in place and prepares to broadcast on KSDB's first day at 100 watts stereo.

# Campus Iranians divided over Khomeini

Standing silently and shrouding their faces with paper plate masks, about 30 young Iranians bear signs reading "Death to Khomeini" and "Condemn Khomeini's Spies on K.S.U." It is Nov. 6 and the flyers being passed out are asking "all freedom loving people to condemn criminal acts of Khomeini's regime and spying of his agents on campuses abroad."

Alleged attacks on Iranians by Iranians occurred on campus, and even in the Union by what one source likened to "a hit man."

Iranian students were allegedly forced to sign petitions against their will with threats that funds from their families in Iran would be cut off.

The list of incidents continues. Who are these groups? What purposes do they serve?

The Iranian organizations on campus are sharply divided into two groups: those supporting the government, pro-Khomeini, and those opposing it, anti-Khomeini. Of about 130 Iranians on campus, nine distinguishable groups have evolved.

They are: The Iranian Muslim Organization, also known as Muslim Association at Manhattan or Iranian Association of Students — Persian Speaking (MSA-PSG); Progressive Iranian Women; Iranian Student Association at Manhattan or Iranian Student Association at KSU (ISA); Organization of Iranian Students (OIS); Iranian Muslim Student Society (IMSS); the People's Mojahedin Organization of Iran (PMOI) or Supporters of Mojahedin; Progressive Iranian Students; and the Iranian Muslim Association.

The MSA-PSG, a group registered under the University Activities Board, is the oldest and perhaps the most controversial Iranian group at K-State. It is by far the largest pro-Khomeini group on campus and has been accused by many of collecting information about fellow Iranian students who are opposed to Khomeini and sending the information back to Iran — what opposing groups term as "spying."

"Khomeini's agents on KSU collect information and send it back to Iran. If we go back we may be killed or they may torture our families to get words out of them," said one anti-government Iranian who asked that he not be quoted by name.

A MSA-PSG member, who asked that he be identified only as Abbas, said, "We are agents of the government and we are agents of Khomeini." "Without pay" another MSA-PSG member, was quick to add. They said the information

is gathered so that in case something happens, those people who have threatened will be known as possible offenders.

"Because it is our government, because we like it, because we want to keep it, we will do what we can to protect this government," Abbas said.

Ahmed, a member of the Supporters of Mojahedin, perceives their motives differently. "The MSA-PSG are spies of Khomeini; we feel a threat from them. As soon as we finish (our studies at K-State), we wish to go back, but the threats that exist is another thing. We would be killed."

"I know of several students that had relatives that were executed for just being a member of Mojahedin," said another Iranian student.

Many groups feel that the K-State administration should take steps to condemn spying by Iranian students on campus.

Mobarez, an ISA member, went to K-State officials and asked that spying activities be stopped. With him, he brought a letter written by Mostafa Aghorlikhani which thanked "the Collegian photographer for taking the picture of the Monafeghine demonstration, because it is very useful to us." Aghorlikhani is a MSA-PSG member, but said he was acting as an individual and not as a member of MSA-PSG. He would not comment on why the article was useful.

"I took the letter," said Mobarez, "I went to the International Student Center, to the Police Department and Dean of Student Affairs . . . (and told them that) they shouldn't accept spying activities on campus and you (the administration) are responsible for our safety."

Jeff Taylor

He cited an example of what he believed to be appropriate action. "Four years ago they had the Shah's spies on the (University of Kansas) campus. People of Savak, which was the Iranian secret police during the Shah's regime. KU threw him (the spy) out. We think the American officials here in this university should take action. They should stop the spying."

Abbas, a MSA-PSG member, feels there is no danger. "Robbing places, shooting people, assassinating, are the only crimes punishable by death (in Iran)," he added.

However, a member of ISA, tells another story. "They are executing people for having one (anti-Khomeini) newspaper in their hand," she said, "Just having them is enough to execute them."

This is supported by "R," an Iranian graduate student. "One of my friends that I received a letter from, he lost two brothers and one sister. His sister was just 9 years old. For just distributing the anti-government newspaper she was killed in front of a firing squad."

Members of the MSA-PSG are cynical about the anti-Khomeini groups. Many of the Iranians now in anti-Khomeini groups were once members of MSA-PSG.

According to Ahmed, once a MSA-PSG member, she now belongs to the Supporters of Mojahedin, the MSA-PSG was originally neither anti, nor pro-Khomeini. They were simply anti-Shah. The group supported the new government, Khomeini. After about six months, said Ahmed, unfavorable reports of the new government reached many members. It was at this point the

*Silent Protest — Members of the Progressive Iranian Students for Freedom and Democracy protest alleged spying on campus.*

# government

divisions began, he said. Many of the higher-ranking officials of MSA-PSG, both locally and internationally, retained a pro-Khomeini attitude and those against the new regime left the organization.

"For different reasons," according to one Iranian, they separated. They all went to different groups for a number of reasons — financial problems and they (anti-Khomeini groups) had a little more money. They (the anti-Khomeini groups) said, 'Come on towards me; I've got the money. I take care of you,' or they had English problems. Then the guy who knew the language would say, 'Well, I can help your language'."

Members of the Supporters of Mojahedin laugh at this. "We are the poorest of them all!" they said. "If they have no money, tell me this. How are they going to build a mosque that will cost \$70,000?" A supporter of Mojahedin refuted the idea of the mosque by saying that the plan was only tentative and that a resident of the neighborhood where the mosque may be built informed him of this. He added that if the mosque is built, only Moslems supporting Khomeini would be allowed to attend.

The MSA-PSG is not without grievances as well. According to one Iranian, a group he refers to only as "the opposition" employs the services of what he likens to that of a "hit man." "This person," he said, "has been used by the opponent group. He is just being used to hit members of our group. Two, three times this man did it (attacked MSA-PSG

Rob Clark

Political placard — An Iranian woman marches on campus displaying her loyalty to the Ayatollah.

Rob Clark

# Controversy

members) and no one tried to stop him." Then, according to the Iranian student, the "hit man" approached a member of the MSA-PSG in the Union and struck him in the back of the neck. The victim was assisted to the hospital and that man later brought charges against his assailant. The county attorney refused the case and so far there has been no conviction.

When asked about the incident, the alleged assailant, a staff member for K-State, denied the charges saying, "I never hit anyone in the Union or any other place. The charges are false."

The MSA-PSG is also discontented about the behavior of campus officials in regulating student activities.

Shortly after spring semester classes adjourned the MSA-PSG staged a demonstration in front of the Union. Mostafa Aghorlikhani related the incident. "We are marching. It has been going on for at least two hours . . . Suddenly, an opposition group, counter-revolutionaries started, you know, giving hand-outs and shouting against us . . . and right at that time the police must stop (it)! (MSA-PSG) had a demonstration permit and the other group did not. Right away because they have no right to demonstrate (without permission). If we would do it without, we would be in jail right now!"

Aghorlikhani also mentioned that at the demonstration there were "FBI" agents between the curtains by the window of the Union information desk taking pictures.

Another Iranian student who was present at the demonstration mentioned "people from the MSA-PSG" who were behind the curtains taking pictures.

According to Art Stone, director of Security and Traffic, he and another officer were behind the curtains and they were not taking pictures. "The only reason we were there was to avoid a physical confrontation, not to check permits," Stone said. It is not his usual policy to check demonstration groups for permits, he said.

The Organization of Iranian Students, OIS, is registered through UAB and also has representatives in the International Coordinating Council. "R," an Iranian graduate student, said that although the organization had no stated political stance, the members were anti-Khomeini. MSA-PSG attempted unsuccessfully to revoke the OIS's UAB registration. MSA-PSG felt the OIS was not representing "the true Iranian people," and presented a petition against OIS. It was signed by

about 30 Iranians.

According to three Iranian students, many of those signing it did so under the threat that funds from their families in Iran would be cut off.

According to the same sources, one man who signed the petition under pressure, went to OIS and apologized for signing it.

Perhaps the most vigorously political group is the Supporters of Mojahedin.

They say their purpose is "to distribute Islam. What we believe is that basically Khomeini is not a Moslem . . . and is covering up the truth of Islam."

Mojahedin, is registered through UAB.

"The ISA," said a member who asked to be identified as Mobarez, "is an international group to oppose Khomeini and support democracy." He voiced an opinion that appears to be predominant among the campus anti-Khomeini groups; that though divisions occur in those opposed to Khomeini, they are "united in cause."

"The difference, we feel, for example, let's say OIS has a different opinion of how the government should work. But we have the same thing in common — opposing Khomeini," Mobarez said.

Scott Liebler

*Pro-Khomeini* — Members of the Moslem Student Association gather in the summer for a demonstration north of the K-State Union.

Ahmed, a member of the Supporters of Mojahedin, feels that only the MSA-PSG leaders know what is truly going on in the Iranian government and purposely misinforms its members about events. "Their leading members know what they are doing, and they take the order of Khomeini to report the students and spy on the Iranians, but the lower rank of MSA people, because of false literature or bribery, they don't know what is going on inside the country. They are being tools in the hands of Khomeini."

The statements of the pro-Khomeini and anti-Khomeini factions also conflict in reference to physical attacks.

The MSA-PSG claims to have "never, never initiated one physically violent act."

All the anti-Khomeini groups disclaimed any accusations of violence.

The Iranian Student Association at Manhattan has representatives in ICC, and like the MSA-PSG and Supporters of

He also cited a letter written to the Collegian by 64 Iranians. He said members of ISA, OIS and Supporters of Mojahedin signed the letter.

Enghelabi, a member of ISA is also a member of OIS and she sees no conflict. Enghelabi said there are many other students who belong to more than one anti-Khomeini group.

This cooperation is not extended to the pro-Khomeini faction. Enghelabi and Mobarez said that the ISA had trouble with MSA-PSG disrupting meetings. "They stood up and said, 'This is bullshit,' and 'you are lying.'"

The members of MSA-PSG are not always from the K-State campus, according to Enghelabi and Mobarez. The MSA-PSG is an international organization with chapters on campuses all over the world. The ISA and other Iranian individuals said that the MSA-PSG sends members from other campuses, since

they will not be recognized, allowing them to monitor meetings and heckle speakers.

"Other MSA-PSG members from other cities, like Lawrence, like Wichita and Oklahoma . . . will come and disrupt the meetings," said Mobarez.

"We (ISA) ask them not to come, but we will not prevent them," Mobarez said.

This is not a policy followed by MSA-PSG, according to the ISA. "If anyone attends a meeting and asks questions that are anti-Khomeini in nature, they will be thrown out," Mobarez said.

According to the UAB conditions, meetings of all UAB registered groups, as well as their memberships, are open to all students.

The Iranian Moslem Student Society is less politically, and more religiously oriented than many Iranian groups. According to "R," the group has no set political stance, but all the members oppose Khomeini's regime. "Religion is not far from politics," said another member of IMSS. "They cannot be kept completely apart."

There are other Iranian groups on campus, but they are smaller or keep low profiles. None is formally recognized on campus.

Progressive Iranian Women organized in the fall. Adviser Cornelia Butler said that several Iranian women banded together in indignation when an Iranian man unintentionally addressed another Iranian man by a feminine instead of a masculine title in a Collegian letter to the editor. The group meets, Butler said, to allow Iranian women to update themselves on current issues pertaining to Iranian women. They do not have a political stance, but the members oppose Khomeini individually.

Progressive Iranian Students is a group thought to be anti-Khomeini. They did not wish to comment on their organization.

The newest group on campus is the Iranian Moslem Association. Its membership includes at least one member of the MSA-PSG; therefore, the group may be pro-Khomeini.

The Iranian organizations on campus are a population fraught with accusations, anger, fear and a fierce loyalty to their country. Their life blood seems to be their pride and patriotism.

Perhaps Abbas captured the intensity of the Iranian student's ongoing political feud when he said, "We support it until the last drop of our blood. No matter if it takes our life, our wives, children, our property — I don't care. We stand for it." **RP** By *Veronica Lorson*

# Bowser brings mischief to 'Vet Med

**B**owser may not make a very helpful lab partner, but the students at the clinical pathology lab don't seem to mind. Bowser, a three year old African Gray bird, was donated by the aunt of a former student in 1975. Bowser has been a permanent resident of the Veterinary Medicine Complex Aviary ever since. Bowser is under the care of students who feed and play with him.

Terry Campbell, temporary instructor in laboratory medicine, is also in charge in the Veterinary Medicine Aviary.

"When Bowser is in the lab he usually walks around on the cabinets," Campbell said. "Bowser has a great curiosity which tends to lead him into trouble. One of his favorite habits is tearing the erasers off the tops of pencils."

Bowser's ability to speak has caused some incidents.

"That crazy bird just freaked me out the first time I heard him talk," Campbell said, "I was all alone in the Aviary late at night, taking down nest burrows off the top shelf when I heard 'Hello fella;' It just scared me to death."

Bowser also loves to imitate animals. One of the veterinary students was examining a horse in the next room, and kept hearing a cat meow. When he went to find the cat, much to his surprise he found Bowser meowing.

The students really love Bowser and will continue to keep him around as long as he is living. For a healthy parrot the average life span is 70-90 years old. **REU** by Jennifer Zang

*Need a second opinion* — Candy Layton, temporary instructor in surgery medicine, looks over a lab report as Bowser gives it a close examination.

*Sign on the dotted line* — One of Bowser's favorite habits is playing with a pencil.

# UPC: For the students, by the students

Concerts, movies, spring break trips and art gallery exhibits on campus don't just happen. There is a small group of students who spend the time and energy necessary to promote and produce each event. These volunteers are collectively called the Union Program Council.

"UPC volunteers come from all different groups on campus," according to Diane DeForest, UPC president. "We have students with majors from accounting to wildlife biology."

UPC consists of eight different committees, each with its own chairman, DeForest said. "Even though each committee handles a different area of interest, each has some things in common."

"The idea behind student programming is to provide some unique learning experience outside the classroom," DeForest said. "Each committee decides on the selection, promotion and presentation of each program. Everyone involved gets first-hand experience with marketing, public relations, advertising and business administration."

The work, however, isn't really work, according to a UPC volunteer. "Being on UPC is a lot of fun," Rich Arnold, Feature Films Committee member, said. "It's an excellent way to meet new people and make some new friends. We have a good time at the meetings and promoting the films."

"A lot of people don't realize how much work these people up here in UPC do," DeForest said.

"Many people aren't aware that it is

students that volunteer their valuable time to set up programs for other students. No one is paid here except the program advisers," DeForest said.

The program adviser's job is to guide the chairman and the committee throughout the year, and to help with personal student development, according to Sylvia Williams, one of four program advisers.

"I think programming helps students develop more fully because it exposes them to more things," Williams said.

"My job is rewarding to me because it puts me in a position to offer a variety to students."

Williams got involved in student programming as a sophomore in college. "I was involved in student government, a sorority and numerous other groups, but I learned the most from my programming experience," Williams said.

"My degree was in recreation management, and I didn't realize how well the two went together. I chose it as a career because it offers me new opportunities constantly."

UPC was formed even before the Union was opened in 1956, according to Walt Smith, Union director, who has worked in the Union since 1957. "UPC was originally formed because the first Union director had a programming background," Smith said.

The first committees included dance, movie, hospitality, special events, games, music, library and arts. "We had a really strong dance committee when it started," Smith said. In the late 1950's, college students were dancing to the sounds of Louis Armstrong and Harry

James.

"Overall, we have one of the better program councils in the country," Smith said. "We do more and better programs."

Including the Executive Committee, which consists of the president and some assistants, there are eight other UPC committees from which to choose.

The Arts Committee, according to Pat Honors, chairperson, coordinates all phases of the Union Art Gallery exhibitions. "We also sponsor print sales, an annual Arts & Crafts sale, and Midday Arts series with musicians and artists," Honors said.

Small scale concerts in the Union Catskeller are set up by the Coffeehouse committee. "Our Nooner series is popular because it is students entertaining students in just about any way imaginable," Rob Slusher, committee chairperson, said.

Friday and Saturday movies in Forum Hall are the major UPC profitmakers. The Feature Films committee tries to bring the most recent and popular films as soon as they are available, while also bringing back old favorites such as matinee and midnight films.

The other film series with UPC is called Kaleidoscope. Jim Meliza, committee chairperson, said they try to bring films from every corner of the world, including international films, documentaries and American classics.

Issues and Ideas, according to Kurt Wilbur, chairman, tries to inform the campus of issues in the community, state, nation and the world. Their ♦

programs range from major speakers, like David Toma and Peter James, to a "Let's Talk About It" series of informal discussions in the Catskeller.

The "cooperative wilderness adventure" structure is the basis for the Outdoor Recreation Committee (ORC) trips. "We take students canoeing, backpacking, and on other adventures where they are given food and equipment, but they have to work together," according to Dave Bussen, ORC chairman.

Special Events is the newest of the committees. Along with major concerts, they also provide the campus with lectures, mimes, comedians and other activities which don't fall under another committee area. Fritz Behrhorst, committee chairman, said the committee was started to help meet the concert demands at K-State.

The Travel Committee of UPC sponsors trips throughout the year to many different places. The most popular trip for the past few years has been, according to Phil Howard, chairperson, the South Padre Island spring break trip. "This year, in addition to Padre, we are offering a ski trip to Winter Park in Colorado, and a new trip to New Orleans," Howard said.

Each spring semester, committee chairpersons and members are selected to serve the following academic year, DeForest said.

"The selections are done on an application-interview basis and anyone is eligible," she said. "We look for people who are willing to dedicate some time and energy to provide K-State with quality programs."

"We like to encourage anyone with interest in any of our committees to come up to the Activities Center in the Union and check us out," DeForest said. **by Pete Manfredo**

Function damages are costly

*One more toast — Smiles and ties are donned during a function in the lobby of third floor Moore.*

# Partyin' Problems

photos by Richie Bergen

Many students like to start the weekend early and on Thursday nights they may find a function at one of the various residence halls.

"The definition of the term 'function' is when individual floors have their own party," said Greg Harms, junior in electrical engineering and president of Haymaker Hall.

Partial payment for the parties held throughout the year is taken from the \$25 application fee students pay to the residence halls. Each residence hall is allocated a sum of money, varying according to the size of the hall. The money is taken from the hall social and educational fund which includes an application fee, advance housing collection fund and money remaining from previous years.

"It is up to each hall government board to decide what to do with the money," Thomas Frith, director of housing, said.

Although each residence hall is allocated money and divides it according to hall preference, whether it be for guest speakers, pizza parties or beer for functions, the money is generally not used for the intended purpose.

"Each floor is warned at the beginning of the year that they must pay for any damages caused at functions out of their funds. If floors receive more damages than they can pay for out of their respective funds, they cannot have any

more functions," Gary Nelson, freshman in pre-nursing and Moore Hall social chairman, said.

"If one person damages something and there is a witness to the fact, that particular person is billed," Harms said.

"If something happens inadvertently and there is not fault or blame to any particular person, then the money is taken from the floor fund," he added.

"West Hall doesn't have functions on each floor as a result of problems because of damage," Sharon Berry, junior in natural resource management and West Hall resident, said.

"Brother floor functions can be held in the floor lobbies with the girls taking care of their own escorting. The hall TV room is usually where hall functions take place," Berry added.

"If a damage is reported and the respective floor account is in the hole, the floor is not allowed to hold any more functions. Often, a person is singled out and reported. Judicial Board hears both sides and then makes the decision as to blame. If the person is found guilty of the damage, he must pay for it. If the person happens to not be a hall resident, he may be banned from the hall," said Dennis Aitken, junior in chemical engineering and member of J-Board.

Decorations for the functions are up to each individual floor, with most floors always having a theme, Gerold Rappold, freshman in sociology and social

chairman of Haymaker sixth floor, said.

"Floors try to pick something unique when choosing their theme," Shari Heitman, junior in social work and Moore Hall president, said.

"Floors in Moore have had tie, jungle and space themes for their functions this year," she added.

A tradition for Haymaker sixth floor is a Hawaiian party sometime in April. The floor decorates and dresses for the occasion. A large pole in the center of the lobby is decorated as a "Teki god." The floor participants make palm trees and other decorations to correspond with the theme.

"One year they had a swimming hole with sand everywhere," Rappold said.

Many floors in the residence halls are designated as dry floors with functions not involving alcohol. An ice-cream function was held on 8th floor of Moore Hall this year.

"The average number of functions held on each floor is one each semester. Functions are often held around holidays and during the week before Spring Break. The prime time for functions is at the beginning of the fall semester, since residents are anxious to meet everybody," Heitman said. **FE** by Susan Somora and Lisa Kessler

*Tied up* — A tie function held on third floor Moore draws a crowd. Theme functions are popular in the residence halls.

# Lafene works on image

Are you hesitant of "no frill" products? Lafene Student Health Center is struggling "to be as attractive as regular hospitals," Lafene Administrator Roger D. Birnbaum said.

"We are trying to move away from the thought of institutional medicine, but how do you do that in the middle of an institution?" Birnbaum asked.

"We have an excellent staff to handle problems," Birnbaum said. The staff and facilities are comparable to any other health care units.

Lafene is striving to change the institutionalized image into a feeling of confidence and competence. Birnbaum said the new goal is to "give more patient privacy and patient rights." Lafene's staff wants everyone to utilize its services to the fullest and without the fear of others seeing health records and data. All files and records are kept private, totally confidential, Birnbaum said.

To keep all the files and records seen by the minimum number of people, the files are organized through the different clinics. For example, the "La Femme" clinic is designed primarily for women, although it also deals with males in some areas of family planning.

"Females have problems we males don't have and they (females) need private attention," Birnbaum said. He emphasized that there is a choice of whether to use the "La Femme" or to go through the regular acute clinic.

"These clinics are a convenience for patients," Birnbaum said.

Along with the regular staff each clinic has a library of cassettes which is a part of the new audiovisual system. Slides are shown and cassettes are played to educate the patients. For example, in the area of "La Femme" they have audiovisuals about allergies, birth control methods and breast examinations.

"These portable films are used to routinely educate our patients." The collection of available topics covers virtually every possible interest, Birnbaum said.

"We are back in the business of health education," Birnbaum said. Lafene hired Cindy Culver as health educator. Her job is to get the updated health information out to the public through various forms of media. Birnbaum said

*Lobby talk* — Denise Worley, junior in arts and sciences, and Joan Lopez, junior in health care administration, talk in the lobby of Lafene Health Center. Lafene is trying to change its "institutionalized" image to one of confidence and competence.

the position had existed before but was left vacant when the last health educator resigned.

Birnbaum is also in the process of finding a new pager recall system. Lafene presently uses a "beeper" system. A doctor, laboratory technologist and x-ray medic are on duty 24 hours a day at Lafene. Each of these staff members carries a "beeper." They are beeped when there is an emergency and have 15 minutes to arrive at Lafene.

The new system being priced is a one-way telecommunicator, with which the nurse would notify the staff-on-duty as to the extent of the emergency. Birnbaum said the system would probably be set up with a code language for description of the injury.

Lafene has made other equipment purchases already. They include a blood analysis machine, a Culture Counter, a set of electronic thermometers, a blood pressure machine for the main lobby area, an apparatus for wart removal, fiber optic lights for internal examination of patients, a machine that rehabilitates bones and muscle, a temperature biofeedback

machine, audiovisual equipment and new examining tables.

Lafene also implemented an appointment system to complement the walk-in system of patient care.

"It isn't necessary to use the appointment system but we encourage people to try it," Birnbaum said.

Birnbaum said that Lafene gets student input from a student committee.

"A committee is established of all students including a representative from the Student Senate to relay the student's wants in health care. Through the Student Health Advisory Committee, we know what you want." **RP** by Lynda Mines

*Is there a doctor in the house?* — Chuck Reinecke, freshman in computer science, heads the line of students waiting at the medical records window at Lafene Health Center. Lafene started an appointment system along with the walk-in system of patient care.

*You're kidding!* — Kathy Larson, senior in marketing; Tim Miller, junior in marketing; Karen Plumer, senior in marketing; Priscilla Banker, senior in marketing; and Hayden Wands, senior in milling science and management, give their group project presentation in Wayne Norvell's Marketing Strategy class. This class is taken after the BAPP requirements have been completed.

# Business College installs program

A new admissions policy became effective spring 1982 for all students entering the College of Business Administration. The program was entitled the Business Administration Pre-Profession Program (BAPP) and was designed as a non-degree program willing students to take 60 credit hours, 44 of which are pre-specified. The remainder of the courses are to be selected by students in consultation with their advisers. Each student must also achieve a 2.25 grade point average on all work completed to apply for his

degree track program or profession program. The policy only effects admission to the College and did not effect the requirements for the degree.

New freshman are automatically placed into the BAPP program, while transfer students must have a 2.0 GPA to be admitted.

"When deciding to initiate the new program, we didn't look at other schools. We did what we thought we should do." Robert Lynn, dean of the College of Business Administration, said.

"The advantage of the program," Lynn said, "is it requires students to take their required courses in mathematics, communications, statistics, etc., during their first two years. It will thus assure the student to be adequately prepared for his professional program of study."

In January of 1981, the idea was shared with faculty at meetings after a committee was appointed to study the admissions system. While no formal input was sought by students, Lynn said he had heard no negative comments. According to Lynn, the Business Council commented positively.

"The Business Council feels the BAPP program will make K-State more competitive with schools around," Julie Youndoff, senior in psychology and Business Council secretary, said "Many schools around the U.S. are going towards a five-year program, which I feel the BAPP leads towards".

Lynn said the BAPP program will

prevent students from putting off courses until too late. It is beneficial to the student to take the basic courses their first two years because they will need these courses to help in their later courses, Lynn said.

"The quantitative required courses in particular are somewhat difficult and students have the tendency to delay taking them. However, students need to take these courses — they are prerequisites," Kay Stewart, assistant to the dean, said.

"The program will raise the academic quality of the Business College as well as assuring students to be adequately prepared," Stewart said.

Another area involving all students at K-State that the BAPP program effects is the drop-add policy.

"There are overfilled classes at the beginning of the semester until the first test," Lynn said. "I feel there is a necessity for shortening the drop program."

By forcing each student to take required courses, Lynn feels there will not be the tendency to drop courses.

New students were notified of the admission policy change by being given a handout with a description of the program as well as a list of required courses. A suggested two-year program of study was also included.

Sandra Kidd, new student adviser, said she was unable to measure student reaction. She feels the BAPP program will upgrade the Business program and make students become more serious about what they're doing.

"My advising is the same as in the past," Kidd said. "Many students have already been following the BAPP curriculum." One difficulty Kidd foresees is problems for students changing from one major into the Business College.

"Students having over 90 hours who meet the 2.25 grade point requirements may be admitted into a degree track major. Students cannot enter a professional program until they have met the requirements," Stewart said.

Lynn said, "I feel the program inspires greater academic endeavors. It has in mind the 'go for broke' students who succeed and make it."

"One company has hired 25 accounting graduates in the past few years and feels K-State students are tops," Lynn said. "The BAPP program will uphold this reputation." **By Susan Somora**

"Sign here — Sandra Kidd informs prospective student Jim Stein about the BAPP program.

# K-State prepares law and medical school

Why would a pre-medicine student come to K-State when the University of Kansas has the medical school? Why would a pre-law student come to K-State instead of a school back East?

K-State may have a reputation as a veterinary school but medical students are also attracted to it, according to Betty Dale, academic adviser for pre-med students.

"Rural western Kansas students who want to go to medical school usually come to K-State for pre-medicine."

"People like the program because it is smaller (than KU)," Dale said.

Angela Paige, sophomore in pre-medicine, said it was a matter of convenience.

"It was closer to home. I knew more about K-State. It just worked out better for me."

For Sharon Miller, sophomore in political science and a pre-law student, K-State was financially more feasible as compared to going to a school in the East. When making a choice between KU and K-State, she chose K-State because, "I like the atmosphere here better."

"Besides, to me where you go to for undergraduate studies isn't as important as to where you go to law school. K-State has a good political science program that is giving me the background I need for law school."

Dale said a good science faculty is another reason for studying pre-medicine at K-State. Three biology faculty members have won Research Career Development Awards bestowed on the national level. Another biology faculty member had won a modified version of the award.

The last two Rhodes scholars chosen from K-State were pre-med students according to Dale. Ann Jorns, 1980 graduate in foods and nutrition and home economics, now attends Oxford and Elaine Hefty, 1979 graduate in microbiology, attends John Hopkins University.

Pre-medicine is an undergraduate degree while pre-law is courses selected, with the help of a pre-law adviser, along with a regular degree that prepares the student for law school. However, just about anyone can apply to law or medical school. The University of Kansas Medical School expresses its

philosophy of pre-medical education in the K-State pre-med/pre-dentistry brochure: "A broadly based education is believed to be the most desirable basis for the study of medicine. The field of medicine is humanistic as well as scientific. A cultural background in the humanities and in related fields as well as in science is the most appropriate education for the future physician and citizen."

Chemical engineers, philosophy, history, education, physiology and medical technology majors are just a few of the undergraduate degrees that go into med school besides the pre-med majors. According to the Association of American Medical Colleges, biology is the most accepted major going into medical school on a national average.

Regardless of the major, one is given the opportunity to work closely with a pre-law adviser in selecting courses which will prepare one for law study.

Nancy Twiss, academic adviser for pre-law students, said that law schools look for four things in a student: (1) communication skills, especially in writing; (2) being able to think clearly and constructively; (3) understanding the

John Zidek

# applicants

society he or she lives in; and (4) depth — major in a specific field.

"We want students to take the most demanding courses they can that emphasize these points," said Twiss.

To help students become more familiar with law and medicine, there is a Pre-Law Club and Alpha Epsilon Delta, a pre-dental, pre-medical national honorary fraternity on campus. Both clubs host visits from the deans of admissions of their respective professional schools, listen to other guest speakers, and participate in campus programs such as the Activities Carnival and Arts and Sciences Open House.

Miller is a member of the Pre-Law Club.

"It gives you exposure to the area of law and you get a chance to meet other pre-law students."

Grades and the Law School Admission Test (LSAT) are two of the crucial factors law schools look at, according to Twiss. Likewise, the Medical School Admission Test (MSAT) taken in the spring of the junior year and grades are the determining factors for medical school according to Dale.

The grade point average of students admitted to medical schools is 3.6 for most schools. Twiss said there is no real cutoff for law schools, that it varies with the particular school.

The national average acceptance rate into law schools was 60 percent. K-State's acceptance rate into law school is in the "high 90's" according to Twiss.

"I've talked to a lot of seniors and they said they've really had no problems getting into law school," Miller said.

Last spring approximately 75 percent of the pre-med students who applied to med school were accepted. When asked about whether she was worried about being accepted into a medical school, Angela Paige replied, "I think that's a pretty common word among pre-med students. After I take my entrance exam I'll know a lot more where I stand."

Most K-State students will go to an in-state institution for medical school as well as law school. However, Twiss said, law students from K-State are accepted into other schools such as Harvard, Duke, University of Virginia, Northwestern, along with KU and Washburn. Although most med students go to KU, others go to such schools as Stanford, University of Nebraska and John Hopkins University. **RE by Susan Arnoldy**

# Initial step taken by Senate

A new coliseum for K-State came one step closer to realization through Student Senate's passage of a bill committing \$5.5 million in student fees.

"The coliseum issue has been debated for years," Doug Dodds, Student Senate chairperson said. "Student Senate did not choose it as an issue; we inherited it."

In November, Student Senate voted 43-7 to appropriate student funds toward the construction of a multipurpose coliseum to be used for intercollegiate basketball, concerts, lectures and convocations.

In spring 1979, students passed a referendum that committed \$2.5 million in student fees for a proposed 20,000 seat facility to be collected only if substantial progress was made in other areas to obtain the additional funds. Senate voided the referendum in spring 1982 because it felt substantial progress had not been made and that the \$2.5 million commitment was unrealistic.

"Our objective was to develop a realistic, workable proposal, educate the students, obtain an accurate assessment of student opinion and resolve the issue," Dodds said.

Representatives of Student Senate visited campus living groups and sponsored tables in the Union to present

information on the issue and to receive student input.

"Visitations were a good chance for one-on-one contact between senators and their constituents," according to Jerry Katlin, business senator. "A majority of students visited favored the construction of the coliseum. Those opposed stated reasons as the burden of a fee increase following the recent 22 percent tuition hike and jeopardizing academic requests. Some favored the renovation of Ahearn over construction of a new arena."

To further gauge student opinion, a survey was developed by Donald Hoyt, director of educational resources. A sampling of 500 students was asked to participate. Information concerning students' financial situations, class status and living environment was gathered as well as reactions toward the proposal itself.

Seventy percent of the 366 responding students supported the proposal and 51 percent of those in favor supported it with reservations. The most common concern of students was the financial burden involved.

The proposed \$20 million facility would have an approximate seating capacity of 15,000. The funding breakdown includes \$5.5 million to be collected from student fees beginning in

fall of 1982 that span a 25-year period. The first fee increase will be \$9.75 per semester. A second fee increase of \$6.75 per semester is to take effect fall of 1983, creating a total fee increase of \$16.50 per semester for students. The remainder of student funding is to come from fees presently being collected for KSU Stadium and Union II bonds.

The Athletic Department determined that a commitment of \$2 million could be raised through ticket and parking surcharges. The KSU Foundation conducted a survey indicating a necessary and realistic contribution of \$6 million toward the coliseum. The remaining funds would be requested from the Kansas legislature by President Duane Acker in his 1985 budget requests.

After the Senate's favorable vote, the bill was sent to President Acker for his consideration and approval. Concurrently, the KSU Foundation conducted an additional survey to reaffirm its proposed \$6 million contribution.

If Acker approves the student fee increases and for any reason the Coliseum project is disbanded, collected student funds would be applied toward existing stadium and Union II bonds. **By Donna Osborn**

*Moment of decision* — Agricultural senators, Joe Neumann, junior in agricultural education, and John Gilliam, junior in agricultural education, listen intently to both sides of the coliseum debate. The bill was passed 43-7 in favor of appropriating \$5.5 million in student fees toward the arena.

Excerpts from the coliseum survey developed by Donald Hoyt appear below. Other topics included in the survey were age, marital status, living situation, classification and interest in collegiate basketball. Space was provided for additional comments. Of 500 students surveyed 366 responded. The results, by percentage, were as shown.

Statistics concerning date of occupancy, construction cost and seating capacity shown in the survey differ from those presented in the Senate bill. All figures presented were approximate according to Angela Scanlon, student body president.

## Student Characteristics

*Check the statement below which best describes your financial situation.*

- 25.1** (1) I have adequate financial support to take care of my educational expenses without going in debt.  
**23.0** (2) To avoid debt, I have to be very careful about spending money while attending KSU.  
**47.3** (3) I can handle my educational expenses at KSU, but in the process I am incurring some loan obligations (GSL; NDSL; other)  
**4.6** (4) There is a fair chance that, at some point, I'll have to leave KSU (at least temporarily) because of inadequate financial resources.

## Reactions to the Proposal

*Assumed Advantages. Besides providing an improved facility for playing and viewing basketball, proponents have claimed that the coliseum would have the advantages listed below. Indicate whether you Agree (Ag), are Undecided (Un), or Disagree (Dis) with each statement by checking the appropriate column.*

AG UN DIS

- 57.7 20.2 22.1** (1) A new coliseum will noticeably improve our ability to recruit first rate players and coaches.  
**43.3 28.6 28.1** (2) A successful basketball program will make it easier to obtain support for the academic program  
**37.4 23.8 38.8** (3) A new coliseum would help ensure KSU's continued membership in the Big 8.  
**47.7 26.0 26.3** (4) We can save \$5-\$7 million in remodeling which fire codes would require if Ahearn is used as our basketball facility.  
**73.0 13.9 13.1** (5) A new coliseum would provide needed space in Ahearn for academic and recreational program.  
**80.7 11.6 7.7** (6) A new coliseum will increase student seating capacity for basketball by about 2000.

## Student Input

- (1) Did you read carefully the information sent to you about the proposal?  
**86.1** (1) Yes, all or most **13.3** (2) Yes, some **0.5** (3) No  
(2) Did this information answer your main questions about the proposal?  
**62.9** (1) Yes **33.0** (2) Partially **4.1** (3) No  
(3) Did it identify important issues or concerns which you had not previously considered?  
**44.8** (1) Yes, several **45.7** (2) Yes, one or two **9.5** (3) No  
(4) How did the information influence your opinion of the proposal?  
**42.0** (1) Made me more favorable **42.3** (2) No effect **15.7** (3) Made me less favorable  
(5) In addition to this poll, do you believe a student referendum should be held before Student Senate makes its recommendation to President Acker?  
**65.9** (1) Yes **19.5** (2) No **14.0** (3) No opinion

## Your Recommendation

*The existing proposal is for students to contribute \$6 million of a projected total cost of \$19.99 million by reassigning fees currently assessed for the Stadium and the Union addition (after these bonds have been paid) and by phasing in additional student fees of \$16.50 per semester, beginning with an additional fee of \$9.75 per semester in the fall of 1982. How do you feel about this proposal?*

- 34.6** (1) I support it with no reservations **36.2** (2) I support it with reservations **27.0** (3) I oppose it **1.9** (4) Undecided

## Improving the Proposal

*(To be answered by those who responded "I oppose it" Which of the following helps to explain your response? (Check as many as apply)*

- 46** I am opposed in principle to assessing students for a purpose like this.  
**61** I believe that students are being asked to carry too much of the financial burden in this proposal.  
**44** I don't believe there is a serious need for a coliseum.  
**40** It is unrealistic to expect all of the other funding sources (contributions, surcharges, Legislature) to produce the funds projected for them.  
**35** The seating capacity of the proposed coliseum (14,500\*) is too limited.  
**35** The proposed date for occupancy (1988\*) is too far in the future.  
**69** Construction or renovation of academic facilities should take precedence over a multipurpose coliseum.  
**28** I think the projected costs are out of line and that a less expensive option should be developed.  
**33** I believe it would be preferable to renovate Ahearn.  
**46** It is improper for current students to commit future students to pay for constructing a coliseum.  
**52** Additional fees of the size proposed would create a financial problem for me.  
**29** Other

# Runner-up wins in end

Everyone's for the underdog, or at least that is the way it was for Bill Rogenmoser, junior in secondary science education, when he nearly doubled his votes in a run-off election to become student body president.

"Although our campaign was optimistic," Rogenmoser said, "the margin was shocking."

It had been eight years since the second runner-up in the general election had won the run-off. Rogenmoser received 1,218 votes while his opponent Scott Long, junior in journalism and mass communications, received 837.

The run-off resulted when none of the eight candidates receiving votes in the original election captured the majority.

"When no candidate receives a majority vote, a run-off election is held. I knew we would have a run-off this year," Gayla Backman, election committee chairperson and senior in home economics education, said. "Eight is an extraordinary number of candidates running for office."

Two of the eight candidates were write-ins and one of those comprised the co-candidacy of Dick and Steve. They received 191 of the 2,994 votes cast.

Fifty-nine student senators were also voted into office and four were elected to the Board of Student Publications.

The retiring Student Body President Angela Scanlan, senior in agricultural journalism, dealt with many issues throughout her term. The main responsibility of Senate was the allocation of \$831,736.43 of student money. The money, collected by a \$25.25 activity fee paid by students as part of their tuition was distributed among various university services and organizations.

The Parachute Club was the first sport club to be funded by the Student Governing Association in recent years. The appropriation caused a debate over allocations to all sports clubs.

Other projects of senate included the improvement of campus lighting, researching, defining and making available the definition of K-State's dead week policy and passage of a bill pledging student support toward

construction of a multipurpose coliseum.

The passage of a campaign expenditure bill set limitations on the monies to be spent during student body presidential and student senate election campaigns.

"The idea behind the bill was to lessen financial demands on individuals running for office," Doug Dodds, student senate chairperson and senior in political science, said. "Students in previous years, had spent up to \$2,000 on their campaigns. Also, the bill was designed to encourage candidates to spend more time talking with students rather than relying on advertising."

The bill limited expenditures of student body presidential candidates to an amount equal to the incidental expense (tuition) paid by a full-time, in-state student incurred during an academic year (fall and spring semesters). Expenditures for Student Senate and Board of Student Publications campaigns were set at one tenth of the same amount. The bill invalidated the candidacies of students who exceeded their campaign expenditure limits. During the campaign four expenditure reports were required of presidential candidates and one report from other candidates.

Twenty candidates (19 senate and one Board of Student Publications) were struck from the ballot because their expenditure reports were not turned in on time. They were still eligible to run but were considered write-in candidates.

Student involvement in the elections was up by almost 50 percent from the previous year as 2,994 votes were cast in the general election, up from 2,050 votes cast in the 1981 election. **RE** by Donna Osborn and Jean Nicholson

# Short course benefits farmers

Farmers are becoming more concerned about an agricultural education beyond high school, but they don't always have the opportunity to attend a college or university for a regular academic program in agriculture.

To help young Kansas farmers improve their present and future farming business operations and to teach more about the increasingly technical aspects of the farming operation, K-State offers a short course program for young farmers, according to Dr. Frank Carpenter. Carpenter is associate dean and assistant director of resident instruction in the College of Agriculture.

"The short course program will provide university-level training in the management and operation of a farm business to young farmers who feel they cannot participate in a regular two- or four-year course in agriculture," Carpenter said.

The program employs 35-40 professors and each student enrolls in four two-credit hour courses that include agricultural economics, agronomy, animal science and agricultural engineering. The courses last for eight weeks and start in January.

"The program is taught during this time period because the work on the farm is in a slack period and farmers are able to get away without a great deal of problems," Carpenter said.

"The students taking the course are considered K-State students and must pay one semester of tuition," Carpenter said.

The total cost of the program for a Kansas resident is \$897, which includes room and board, tuition, fees and books.

Graduation from high school and an interest in learning more about successful farming are the only requirements for admission.

"Young farmers today see the need for knowledge of present farming and the opportunities that are available on a production and a marketing standpoint. Farming is very competitive and farmers should not be caught short in the profit area and end up not being able to stay in production agriculture," Carpenter said.

The program involves four topic sections and each section has a topic leader. They are Stanley Ehler, leader for agronomy, Leo T. Wendling for

engineering, Earl Farmer for animal science, and Wilton B. Thomas for economics.

In addition to being campus coordinator of the program, Thomas also serves as a topic leader for all four sections. The program began in 1964, but was dropped after two years for lack of funds, he explained. Three years ago Thomas came out of retirement to help revive the program and said he feels it is once again going strong.

"This is what you'd call an applied course," Thomas said. "We tailor it a bit to the students we have here." Thomas explained that during the first week students are questioned by instructors as to what they want to learn from the program.

"It changes each year. For instance, this year students put more emphasis on marketing," he said. In response, instructors have added lectures in that area.

"They (the students) give us tips on what they want to get out of the program. They nudge us in the direction they want to go," he said.

Earl Farmer, professor in dairy science and industry, sees the course as a way to prepare young farmers for production agriculture.

"The short course program gives students many tools that they can use

*Learning by observing* — Dan Hartzell, short course student, listens to Steve Rutchmann, swine unit research assistant, during a lecture.

*Knowledge on to paper* — Robert Hines, professor of animal science, monitors young farmers taking a test during the farmers short course.

## Short course

immediately, (such as nutrition, breeding, and husbandry), after completion of the course. Heavy attention is put on basics and new developments instead of detailed course work," Farmer said.

The course material is directly related to Kansas agriculture because most of the students are from Kansas.

"Students can see just what is actually used today instead of what is promised for tomorrow," he said.

The short course program is held on the K-State campus to provide access to University facilities, including laboratories, the library, and the use of extension and resident faculty members.

As Thomas explains, this is advantageous to the students because it gives them contacts with knowledgeable individuals on a variety of agricultural subjects.

"The program is designed for the immediate use of students and what they're doing," he said. "Students can make special appointments to talk with instructors at the University not necessarily connected with the short course program."

According to Thomas, students enrolled in the short course come from a variety of different backgrounds. One student, who has a political science

degree from the University of Kansas, said he decided to enroll in the short course program for a better understanding of agriculture.

"I am currently farming full-time with my father, and I wanted some practical education in agriculture, so I enrolled in the short course," Larry Haas said. "I learned a great deal and I am glad I took the course."

Merilee McCaustlan, a current student at K-State, majoring in journalism and mass communication, said that she also enrolled in the course for a better understanding of agriculture. McCaustlan comes from a farm background and hopes someday to work in the radio and T.V. field.

"Since Kansas is primarily an agricultural state, I thought that the course might help me out when I get through with college," she said. "I think that I would have gained a great deal more from the course if I could have gone back to the farm and utilized it, like most the short course students."

According to Thomas, instructors and topic leaders are always interested in feedback from students, and the program evolves in relation to students' needs.

"They (the students) keep pretty doggone busy while they're here," said Thomas.

"We like to ask the students how they're doing, if we've scheduled about all they can handle or if they want more."

Thomas added that while there are no immediate plans to make the course a two-year program, he speculated it could grow outward into a program similar to one found at Purdue University.

"Purdue's been running a program like this for a long time," Thomas said. "They have a number of short courses available, and the student has a greater variety to choose from." He said he feels that as enrollment in the short course grows, K-State too will be able to add more classes to the program.

"The course has room to grow in several additional directions in the future, but that remains to be seen," he said. **REU** by Sharon Riley and Jeff Dillon

# Funding for

K-State has always had horses and taught courses about the equine breeds, but it wasn't until recently that K-State recognized horses as having a much greater importance than just a novelty item in the agricultural field.

The changes began when Don Good, head of animal science and industry, and Roger Mitchell, former vice president of the College of Agriculture started looking for someone to head up the equine science division in the animal science department. Good found Dennis Sigler, a Texas A&M graduate with a PhD in equine physiology. Sigler came to K-State in spring 1980. His arrival marked the beginning of changes in equine studies and research conducted at K-State.

Although K-State's equine research and specialization is still in its infant stage compared with leaders in the field like Texas A&M, or Colorado State University, the animal science department has increased the equine curriculum. It now offers eight hours of equine science and a horse judging team.

The horse judging team was organized in Sigler's second semester at K-State. In its first year of existence, the team won the World Quarter Horse Show at Oklahoma City. In the fall of 1981, Sigler's horse judges went to the Quarter Horse Congress in Ohio in addition to the World Quarter Horse Show.

Sigler feels that equine studies have to be approached from a scientific standpoint.

"Our role will always be approached from the standpoint that we're here to primarily teach the science part of it," Sigler said. "My horse science course will always be the primary course as far as teaching horse facts and horse information."

Sigler also hopes that he can broaden his courses so the student can really get a feel for horses.

"Things like a little more breeding experience or actual hands-on experience with feeding and handling horses and training and things of this nature are

*Equine hairline* — A two-year old quarter horse receives a grooming from student assistants, Eva Stumpff, senior in animal science, and Joe Peabody, graduate student in animal science, at K-State's Horse Research Unit.

# equine program growth needed

definitely going to be part of my courses. Training and making the horses useful are the end products of the horse and I think they should be part of the program," Sigler said.

Sigler's efforts are enhanced by the aid of Walt Smith, professor in animal science.

"Walt teaches horse breeding as applied to genetics and this really helps the student get a feel for equine breeding," Sigler said.

K-State has always had horses in the history of the school. However, Fort Hays State University has a larger equine program than K-State. Although FHS has a larger program, Sigler feels K-State can catch up with them.

"I think as far as the curriculum we offer, I believe we have equalled Fort Hays State but FHS has had its program going for more than two years," Sigler said. "We just can't change the world overnight and the way the economy is, we can't even get the Kansas legislature to approve another livestock extension specialist, let alone build more facilities," Sigler said.

"We'd like to build a barn that had 30 to 40 stalls and an indoor riding pen and an area for a lab. I think we could do this very easily for \$500,000. This would be a nice facility and not just a tin barn. It wouldn't be a facility like Weber hall, but I think we could build something

that would be useful for teaching and research," Sigler said.

"Convincing the Governor and the Kansas Legislature that we need more facilities is the problem. The Board of Regents recommended our livestock extension specialist but the Governor is the one who took it out of his budget," Sigler said.

Kansas quarter horse production ranks fifth in the nation. Departmental funding does not reflect the commercial figures, according to Sigler.

"We have nearly as many quarter horses in Kansas as there are sheep and the sheep program receives three percent of the total departmental budget while we receive .9 percent of the total budget," Sigler said. "As far as the horse economy in dollars generated in Kansas, I believe there is more money in horses than sheep."

"As far as the funds allocated to us by the department, we have only enough to maintain the facility and our herd and we are very close to the bottom in funds provided," Sigler said.

Because of the funding problem, Sigler has only one research program being conducted.

"Right now, we are conducting a project approved by the experiment station concerning improving reproductive efficiency using different types of hormones. We were allocated

\$4,630. As far as funds, research grants provided for equine, they are almost non-existent at K-State," Sigler said.

"I think if we had \$5,000 a year, we could do a reasonable amount of research. We couldn't do adequate research but we could do some research," Sigler said.

Sigler believes that commercial horse businesses must help initiate funding.

"The two things holding us back right now are the lack of a horse extension specialist and the facilities. The horse extension specialist will not be available until the people of Kansas get behind our program. Until the people and our government realize how important horses are to the livestock industry, we are not going to see any changes come about. It's going to take people from within the state to do it," Sigler said.

Another measure Sigler feels must be taken is to get the horse people to donate up to one-fifth the total cost in building an adequate equine research facility. By getting a commitment from people in the horse industry, Sigler believes that the program would stand a better chance of receiving money from the state government.

"If we could get the horse people to donate \$100,000, then maybe the state Legislature would take a second look at supporting the equine program at K-State." **EP** by Doug Putnam

# Transfer troubles

They come from junior colleges, private university settings, vo-tech institutions and other public universities.

And the inevitable question they receive is, "So why did YOU come to K-State?"

To most transfers, K-State seemed to be the most natural niche to fit into their own lives at the time.

K-State simply filled the needs of the transfer student. Academic, social and ethnic experiences multiplied upon arrival.

Kim Murphy, junior in pre-nursing, attended Baker University her freshman year. Baker is located in Baldwin City, south of Lawrence.

Murphy said Baker University was too small for her needs. "I felt that I needed more alternatives to choose from, and a bigger school offered more freedom to do what you want to do."

The decision as well as the move wasn't hard for Murphy because a lot of her friends from high school were already at K-State.

"I just flowed in — K-State is very friendly, and that's coming from BU, which was really friendly," Murphy said.

However, the transition does not always come naturally. There is more to moving from a familiar setting to a new college. For Connie Kuhlman, junior in animal science, Colby Community College just didn't offer everything she wanted in her curriculum.

Kuhlman is in agriculture, along with a possible change of degrees to pre-physical therapy. "What Colby was to me was an extended high school," Kuhlman said. "I believe that CCC publicizes 900 enrolled, and for me, that was a big situation to come into from Dighton, Kan."

"There were 35 in my high school graduating class," Kuhlman said. "I know that for the type of person that I am, I wasn't ready for K-State. I loved Colby my freshman year. The people, the friends — we were inseparable."

Although Kuhlman believes her three semesters at CCC were worthwhile, she knew she was ready for a change. "I decided that I wanted more than a two-year education. Since agriculture isn't a woman's field (by social measures), I came up here for more schooling."

Kuhlman and Murphy agree that class load and financial burdens are more emphasized at K-State than at BU or CCC.

"The main difference between K-State and Colby is that it takes a lot more studying up here to make the grade," Kuhlman said. "Tests at CCC were easier, preparation requirements were less. I could study the night before, for most of my classes, whereas at K-State,

it takes a lot more."

"The trade-off at K-State is that the classes were smaller (at Colby)," Kuhlman said. "They were definitely more personal. At Colby you never stopped going home because of books or classes. Here you have to take in account your class load — especially if you know you won't study at home."

Murphy said K-State lecture classes were larger but that "academically, the K-State facilities are much greater in quality and diversity."

"For me, and I'm sure other transfers, the financial burden can't simply be ignored if you came from a private school," Murphy said. There is a trade-off, because scholarships are harder to come by up here."

Kuhlman also said that financial pressures are greater at K-State. "I had a basketball scholarship at CCC, and I know there's no way I would want to go

to school if I didn't work at a job I enjoyed."

Kuhlman works at the KSU Dairy Barns. She said the cost of living is considerably more in Manhattan compared to Colby. "Rent, food, beer, laundry — you name it!"

Yet with large classes and big expenditures aside, K-State is the place to be according to Murphy. "You know, I was very shocked. BU plays on personal attention as its big asset. But if you want it — faculty and friends — you can get the same personal attention here. Even more."

"To me, people are more eager to really help and get to know you up here," Murphy said. "For me, there are more worthwhile relationships — I guess because the more people you have, the more opportunities you have to find friends that fit you." **RP** by Janie Allen

## Algebra problems? Holton offers

Lonnie Inlow, senior in agriculture, has his own private tutor. For three hours each week, Inlow and his tutor, LewAnn Schnieder, junior in pre-veterinary medicine, meet to work on and discuss problems in his Chemistry I and Genetics classes.

The arrangement sounds too good to be true. How much does it cost? Nothing, the service is free to Inlow and approximately 82 other students who qualify for the tutoring service.

Located in Holton Hall, the tutoring service is one of the programs included in the Learning Academic Service, a federally funded program. Other services

**"It gives me a chance to meet one on one with a student, it improves my communication skills, it improves my understanding of the subject, and there is good money in it."**

include a math lab, and a learning skills specialization service, which teaches students test-taking techniques, reading skills and how to study for a test, Kathy Green, coordinator of the learning service, said.

The tutoring service is the only service that requires compliance with set requirements, Green said. Applications are based on a student's financial needs, ethnic background or if the student is a first generation college student.

After qualifying, a student is assigned to a tutor, who is hired by the service.

"There are 25 tutors, most of them are juniors and seniors," Green said. The tutors are required to have a 3.0 GPA, "but most tutors are close to a 4.0 grade point," she said.

A tutor and the student determine the schedule of when they wish to meet. "Most of them meet here," Green said, referring to rooms in Holton Hall. Generally a student will meet with a

# free tutors

tutor two or three times a week, Green said.

A progress record is kept of tutors, who fill out weekly evaluation reports. Likewise, a student also fills out a report on the tutor.

"College Algebra is the most demanded class to be tutored," Green said. The service generally offers approximately 23 classes, and additional courses are offered "based upon demand and availability of tutors."

"The Service helps me, as it is a one-to-one situation with somebody there that knows what is going on to answer my question," Inlow said. Inlow, who meets with his tutor three times a week, said the service has probably raised his grade point by a point level.

Inlow's tutor, LewAnn Schneider, tutors not only Inlow, but two other students and generally puts in about six to seven hours weekly.

"It gives me a chance to meet one on one with a student, it improves my communication skills, it improves my understanding of the subject, and there is good money in it," she said.

Besides the tutoring service, Holton Hall features a math lab available to all students. The lab, directed by Bernell Ramsey, is open to walk-ins who seek assistance in a class. The lab has volunteer tutors, and approximately 16 people use the service, Green said.

Anxiety that may accompany a student preparing for an exam can also be helped by the learning academic service. Ben Silliman is the director of the learning skill specialization program that aids students preparing for exams. The program is also open to all students.

In the future Green hopes "the services could be used more in reaching the people who really need them." A lot of the students who use the service are pretty well motivated. It needs to include more students who need motivation to raise their grade point, according to Green. **REP** by Kathleen Pakkebieer.

# Re-birth of student after twenty years

What prompts a person to quit a good job, sell everything that won't fit in the back of the car, box everything that will, say goodbye to familiar signs of security, i.e. financial and friends, and head for school to become a full-time student again? After 20 plus years away from the classroom?

I wondered myself, many times, those first few weeks, what drove me to do it. I'm still not sure, except that I want my degree.

Back home, some thought I was crazy and said so. One regarded school as "too much of a burden for a woman your age."

"What do YOU know?" I was tempted to fire back at her, but I kept quiet.

Others, however, envied me, my courage and cheered me on, while the family, after the first initial shock, showed signs of pride.

So I turned my back on the pessimists and focused instead, on the menagerie of new faces. At first I was excited, then confused and anxiety-ridden before feelings of order and enthusiasm returned again.

Enrollment day is embedded in my mind. That's the day I not only paid my fees and became a student at K-State, but I became a grandmother, too. I stood in line in that hot sun that day, actually sweating, and worrying about a hundred things, one of them my daughter. My granddaughter was born while I was inching my way through Ahearn Fieldhouse. I don't remember ever perspiring like I did that day.

After enrolling, I bought books in the Union Book Store. There were so many and they were so heavy, that the plastic

bag with the white draw string broke and I had to hike them on my hip while I trudged to my apartment in that sweltering heat. Boy, what a day.

The next few hours were not much better. My first class was cancelled but I didn't know it until I'd sat in the empty classroom a half-hour. Then I had to re-schedule and learn all about drop-add. During the first month I forgot a book report, flunked a test, and wore a blister on my heel. I was a bit frightened, too, wondering if I'd make it. One woman I met dropped out three days after school started. When I heard, I gritted my teeth and stared at the calendar — the one from the Union showing the WHOLE school year — and pleaded with God, "Please don't let me quit."

I also experienced feelings of horror those first days. What if the professor called upon me in class and I HAD TO SPEAK OUT LOUD IN FRONT OF EVERYBODY? They did, and I did, and I finally calmed down.

In the meantime, I found a friend, got a part-time job on campus, and captured Purple Pride. In short, I became a K-Stater.

Gradually, I met others like me — or almost like me. A conversation in the hall at Eisenhower one morning set me to thinking. I'd met her — The Other Older Student — enrollment day and hadn't seen her since. Bumping into

*One of the crowd* — Blending in with the rest of the students, Karen Rainey, senior in journalism and mass communications, makes her way across campus.

*Study hours* — Deep in thought, Karen Rainey sits in her apartment and studies for a class.

each other was like old home week. She was as dazed as I was.

"Do you feel out of place?" she asked.

"Yes," I mumbled.

She looked at the mob strolling by and let out a long, wistful sigh. "All the kids in their jeans," she said. "I'm just not a jeans person anymore," and patted a pudgy thigh. I sympathized. Later I was amused that our feelings of inadequacy stemmed from physical appearance, not mental aptitude.

The day before school started in August, a clerk at the grocery store asked me if I had anyone in school this year, I laughed. "Me," I said.

"Oh!" she grinned. "You'll have fun. I took a night course once just for fun."

Her words made me mad. Who goes to school for "fun" at my age? I was going to school to complete a degree I'd begun working on over 20 years ago. I couldn't be more serious.

But it was fun, in a different way. An

accumulation of small incidents made it so — going to football and basketball games, drinking a beer in Aggieville, and attending classical concerts and afternoon movies. They were not a steady stream of activities, but they had the affect of putting me in touch with life — at its heart beat. I feel good about the future of America because of the quality of people I've met at a K-State.

Getting in touch occurred in various dimensions. Just before enrollment day, I was strolling around campus, looking for Eisenhower Hall, (I was lost) when a young woman stopped me. "Do you know where Lover's Lane is?" she asked.

"Lovers's Lane? On campus?" I gasped as I whipped my campus map out of my purse. If she was surprised, she hid it well, and we stood there, somewhere in the shade, looking for Lover's Lane on the campus map — the freshman and the senior.

I hope she found it.  
Someday, I'll tell my granddaughter all about the day she was born — the day I came into being. **REP** by *Karen Rainey*

Commencement Schedule  
May 14-15, 1982

Friday, May 14  
3:30 p.m.

Graduate School and Veterinary Medicine  
Auditorium  
Saturday, May 15  
9:00 a.m.

May 15, 1982

This is it. It took five years, but today I finally graduated. I can't believe it's over. Now what do I do? They didn't tell me that, they just handed me a piece of paper. I guess I'll go out and find a job that pays more than \$3.35, pay rent, buy life insurance, raise a family -- the whole bit. Dad was so proud when I cried.

I haven't hung up the diploma yet. It just won't look right next to my score poster and my stuffed wildcat. Too dignified. Too final.

Finals -- that brings back some painful memories of all-nighters with bottles of coffee and No-Doz by the bottle (I thought I was hooked). But finals no more, along with no more 7:30's, boring lectures, Swannies runs, TGIF in Aggieville, basketball games (Ahearn magic) and friends I'll keep in touch. It's hard to say well, now it's time to say "Good-bye."

Good-bye, K-State. It's been real.

photos by Jeff Taylor

## Getting out

After taking five years of classes, including four summer schools, three student loans, two government grants, a pawned stereo and multiple loans from Mom and Dad to reach the long-awaited day of graduation, some find it necessary to apply for yet another loan.

Bachelor candidates for graduation must purchase a cap and gown if they decide to take part in the ceremony. The cost is \$12.75 plus tax which includes cap, gown and tassel (also a collar for women).

Candidates for Masters and Doctorates as well as faculty can rent their academic apparel. The price ranges from \$18 for full apparel to \$8.25 for a hood only.

The cost of apparel for Veterinary Medicine students is \$20.75 plus tax. Adding the deadline late charge of \$3, the cost becomes even greater.

At least the cost of gasoline is not involved since the apparel can be purchased in the Union Bookstore.

In case it slipped by notice, the price of gold and diamonds has gone up quite a bit since high school graduation. Class rings range from the traditional 10K ring for men at \$219 and for women, \$167 or the lustrum for men at \$112 and for ♦

# costs money

women, \$106 to the Art Carved Diamonds 10K gold, up to \$366.

Depending upon the number of people attending the long-awaited event, hotel room cost ranges from \$8 without television for one person to a poolside room for \$49 with two double beds.

Don't forget to make dinner reservations far in advance of graduation day or else waiting for a table will take no less than two and one-half hours, not including finding a parking space within two blocks.

Don't forget the before costs. A bottle of booze on the average costs \$9 with mixers costing \$2, ice \$1.50 and junk food, \$5. Remind friends it's BYOB. The cost of party damages doesn't really hurt because they will be deducted from the apartment deposit and that's already paid.

Well, late fee for cap and gown has been paid, confirmation of hotel room has been done only to find no room available so the \$8 room is reserved in an older hotel, announcements have been sent out with an aunt and uncle left off the list by mistake — graduation is over. College brochures tell how much it costs to go to school, but neglect to tell how much it costs to get out. **RP** by Susan Somora

# Officials divert faculty salaries

K-State officials have been using funds earmarked for faculty salaries to pay for operating expenses for at least the past five years, President Duane Acker said.

Acker said it has become standard practice at K-State to leave faculty positions open and use the money budgeted for those positions to pay for equipment, transportation, supplies and travel.

Acker was in Topeka pleading the University's case for a 13 percent faculty pay raise from the Legislature. Gov. John Carlin recommended a 10 percent pay raise for state university faculties.

In 1981, approximately \$2 million budgeted for faculty salaries was diverted to the Other Operating Expenses (OOE) fund, Acker said.

The Wichita *Eagle Beacon* reported that the funds could have been used to raise faculty salaries, but Acker disputed the report.

Acker said the Legislature budgets funds for the University in two separate areas — salaries and OOE.

"It is legal, proper and normal to take salary monies that we do not expect to use and use these funds toward OOE," Acker said. "It is routine procedure."

Acker said using these funds for additional salary

raises would have violated "legislative intent."

"Since we haven't been able to create any new positions, it is possible that a department which loses a \$30,000-per-year professor might hire two \$15,000-a-year instructors to replace him," Acker said.

"Over the years, I would expect that this has led to a greater percentage of instructors and graduate teaching assistants within our faculty ranks."

The department head may also opt to leave a position open and use the budget funds for OOE, according to Acker.

It has become necessary to use salary money to pay operating expenses because the Legislature has been raising the faculty salary budget twice as fast as the OOE budget over the past several years, Acker said, adding that funding has been directed toward people rather than equipment.

There was no input from Faculty Senate concerning the transfer of salary funds to meet operating expenses, according to Heinz Bulmahn, Faculty Senate president and associate professor of modern languages.

"We have never dismissed anyone from a position simply because we needed their salary to pay operating expenses. However, when someone leaves, we review their position to see whether or not we should attempt to fill it," E.J. Peterson, assistant to the director of business and finance, said.

## McCain loses future concerts

Manhattan rock music fans may have seen the last concert in McCain Auditorium when Shooting Star left the stage following their concert in December.

After the concert, broken chairs and bottles were found. Because of the damage caused by people standing on the chair arms and cushions, McCain will be closed to future rock concerts, Doreen Bauman, McCain Auditorium director, said.

Rock concerts "create camaraderie and spirit, but McCain is not built for that kind of concert," she said.

Bauman said that she and the McCain staff made the decision to close the auditorium to future rock concerts.

"We also have a very real concern about beverages brought into McCain in bottles," Bauman said.

A "worn out, tired, nervous house staff" tried to keep people from breaking bottles and lighting cigarettes during the concert, she said.

The Shooting Star concert was scheduled by the Special Events Committee of the Union Program Council. Barbara Burke, committee adviser, said most of the tickets sold at the door immediately prior to the concert were to the general public, "so we knew we

had attracted a lot of high school students."

The closing of McCain to rock concerts is causing the Special Events Committee to look at other types of acts, Burke said.

## Faculty senate adjusts drop/add

A new drop-add policy was passed by Faculty Senate. The policy states, "The last day for dropping a course without a 'W' being recorded is at the end of the 25th day of classes. After the 10th week of classes courses may not be dropped."

The previous policy concerning withdrawal from classes stated, "The last day for dropping a course without a WP or WF being recorded is at the end of the ninth week of classes. During the last two weeks of classes courses may not be dropped."

The Academic Affairs Committee of Faculty Senate, which sponsored the bill, stated their rationale concerning the drop-add policy is to help students learn "personal responsibility and maturity."

"It's a step toward improving the academic climate on campus," said Heinz Buhlman, associate professor of modern languages and Faculty Senate president.

Jeff Taylor

**Dig in** — Russell Lewis, University facilities, supervises the construction of barricades between Senior Hall and the Union. The area was developed into an entrance plaza to the campus for bicyclists and pedestrians. It includes two built-in seating areas. Circle drives surround the area for motorists.

**Sign language** — Campus police Reese Jackson and James Taubagh look over about \$1,000 worth of signs from Marlatt Hall. Officers went to the residence hall and asked students if they had any signs to return. No

arrests were made. The reason behind the seizure was because Security and Traffic was approximately \$1,000 over its traffic sign budget.

Jeff Taylor

## Union hosts demonstration

A noisy crowd that grew to 150 people at times gathered around a table in the Union lobby to discuss politics.

The cause of the crowd was a sign displayed behind the table stating, "We the students of Kansas State University oppose the distribution of anti-U.S. materials on our campus."

The table was set up by John Markiewicz, sophomore in construction science, to help pay for advertising of this view in the *Collegian*.

The advertisement attacked the pro-Khomeini Iranians at K-State. Markiewicz said that it was prompted by the actions of the Iranian students.

"I got the idea for the ad last week when I walked out of the Union and was met by these students and their anti-U.S. literature," Markiewicz said.

He said he set up the table in the Union after some of his friends and others offered to help pay for the advertisement. He said it was an opportunity for others to express their feelings.

A large jar sat on the table. Throughout the day Markiewicz and his wife, Jill, asked passersby to contribute funds and sign a roster if they agreed with the sentiments expressed in Markiewicz's advertisement.

The collection in the jar totalled more than \$150 by day's end, and Markiewicz had collected more than 375 signatures on the pad.

But not all the people gathered around the table supported Markiewicz. There were several discussions going on at all times in areas around the table, often heated exchanges between American and Iranian students.

The mood of the gathering was captured by Pat Eskew, freshman in political science, when he said, "They're just acting on emotions, not really thinking about any issues."

The following day another table, set up near Markiewicz's table, asked for signatures of those who agree with the statement, "Freedom of speech for all."

Megan Patterson, senior in management, said the table was set up because "anti- or otherwise, everyone has a right to be heard."

## GLIMPSES

### East side parking changes

Students who habitually parked east of campus had to set their clocks ahead 15 minutes to get ready for some "pre-class hiking."

City ordinance 3900 went into effect in February which restricted parking on the east side of campus from 2 to 9 a.m. Those who parked there without authorization were issued tickets.

According to Gene Cross, vice president for University Facilities, this should pose no significant problem as "there is adequate space on campus for all residents."

Art Stone, director of Security and Traffic, said "We are not forcing people to park on the streets; it is their option. (We're) not guaranteeing you'll be right outside the door, but we'll guarantee some place on campus to park."

### Students feel 22% increase

The Board of Regents approved a 22 percent tuition increase for the seven regents institutions in April 1981.

The increase was seven percent more than the original proposed increase of 15 percent. The 15 percent raise was approved by the Legislature.

The increase added \$60 to the tuition of \$280 at K-State. Out of state tuition increased by the same percentage, from \$820 to approximately \$1,000. The tuition figures do not include student fees.

The motion was passed by a vote of 8-1; the only dissenting vote was cast by Bernard Franklin, board chairman.

### Golden Key colonizes

A new honor society was established in May when the K-State chapter received a charter from the Golden Key National Honor Society. Golden Key honorary society caters to upper classmen who have exhibited outstanding academic achievement, said Willard Nelson, faculty adviser to Golden Key. He is also director of the Pre-Education Advisement Center and instructor of education.

This type of society is new to the University, Nelson said, because it honors students solely for academic achievements and not extra-curricular activities.

Golden Key is a national non-profit organization with 20 charters throughout the United States. It was founded in 1977 at Georgia State University.

To be a Golden Key member, a student must be an undergraduate, have a minimum of a 3.4 GPA and have 30 hours in residence at K-State, Nelson said.

## Landscaping dots campus

The Quinlan Natural Area and the Jean Middleton Goldstein Nature Walk was dedicated in November. The ceremony took place on the Quinlan grounds south of Boyd and Van Zile halls.

The natural area was dedicated to Leon Quinlan, retired professor of horticulture, who attended the ceremony. Quinlan retired in 1964 after 25 years of teaching at the University. He is noted for categorizing trees on campus, according to Norma Ross, community relations coordinator.

The area is called a natural area instead of a garden because the plants will be allowed to grow naturally instead of being pruned. Quinlan believes in natural, untouched beauty.

The nature walk was dedicated to the late Jean Middleton Goldstein, a former K-State student. Her husband, Jack Goldstein, dedicated the nature path in her memory during the ceremony.

The area is designed to be used by students for study in a natural setting.

The two projects are part of a Univer-

sity planning project for beautifying the campus. In addition to the Quinlan Natural area and the nature walk, landscaping was also completed between Seaton Hall and the Union.

## Regents approve housing increase

The Kansas Board of Regents approved increased rates for on-campus housing for the fourth consecutive year. The new rates, effective fall 1982, are from 7 to 12 percent more than 1981.

Increases were based on financial impact statements and recommendations submitted by the University administration, according to Sandra McMullen, chairman of the Regents. The financial impact statements measured the effects of each category of increase.

"They look at how many people are involved, what the amount of increase will be, when the last time an increase was approved — it's general information which tells what this kind of increase will do and how many people it will affect," McMullen said.

Thomas Frith, director of housing, said the new rates were necessary be-

cause of a general increase in the cost of labor and materials.

Residence hall housing and food service rates for the regular semester, when paid in one payment, increased from \$780 to \$870. Before, residents paid \$198 quarterly. Under the new budget, payments are \$220.

## K-State up for accreditation

Eight administrators and faculty from other universities evaluated K-State in February for accreditation by the North Central Association of Colleges and Schools. The team did not examine specific programs at K-State. The review was a periodic check done on all schools associated with the NCA and was last performed in 1972. The actual vote for K-State's continued accreditation was not to occur until June of 1982.

*Paper work* — Danny Williams, junior in life science, and Ed Erickson, junior in agricultural mechanization, fill out financial information sheets. Many students were effected by the scarcity of student loan funds.

# Grievance board sides with student

The Undergraduate Grievance Committee overruled a department's policy and allowed a student to change instructors.

"It sets a precedent in the sense that a student's wishes shall be considered if it's humanly and physically possible," said Hermann Donnert, head of the grievance committee and professor of nuclear engineering, adding that if a similar case came before the grievance committee, the same decision will be made.

Robert Lytle, junior in construction science, filed a grievance against Richard Summerhill, head of the Department of Mathematics. He wanted to change his calculus recitation section, but a five-year-old policy prevented him. The policy "would not allow a student to change from one section of a course to another . . . unless there was a time conflict," Summerhill said.

Lytle began climbing a chain of command that led to the Undergraduate Grievance Committee. In a letter to Donnert, he said he had a problem in his recitation class.

"I am having trouble understanding my present recitation teacher because of a language barrier and the way he conveys material in the class. I feel I am not discriminating against an instructor because I simply want the best education for myself by choosing a different teacher that I can understand better," Lytle said, adding that other students and the teacher were

also having trouble in the recitation section.

After three weeks in the class, Lytle visited other recitation classes. "I found one where I liked the teacher. I liked the way he presented the material, and I could understand him," Lytle said.

The instructor, Tim Crice, graduate in statistics, thought it would be possible for Lytle to add his class, Lytle said.

Lytle talked to Summerhill who denied his request. Then Crice went in to talk to Summerhill in an attempt to settle the issue without going to the grievance hearing. Summerhill again turned down the request.

"If you change your policy for those who scream loudest, then it's not much of a policy," Summerhill said.

The grievance committee consisting of two faculty members and two students, tied in its final vote. Donnert was left with the decision and voted in favor of Lytle.

Donnert said he wanted to accommodate students and give them the best learning experience possible. He added that students' wishes should be considered if there is an alternative.

"We don't make a policy. We just make a decision if there's a disagreement between faculty and students," Donnert said.

Andy Schrock

## JMC initiates new policy

Long waiting lists for closed classes in the journalism department prompted a new drop/add policy in the journalism and mass communications curriculum, according to Harry Marsh, department head.

The policy states that a student who doesn't show up in class or notify the instructor by the fifth day of the class, may be replaced by someone on a waiting list.

The policy was initiated to accommodate the long waiting lists for classes, according to Donald Foster, registrar and director of records.

Almost 10 percent of the classes closed for the entire University were in the JMC curriculum, Marsh said.

"We were concerned about empty seats in classes when (actually) there was a waiting list," he said. "Our courses fill up and get waiting lists even before January enrollment."

"We did try and let everybody know by distributing the policy during pre-registration," he said. "In Reporting II and Radio and TV (classes), not all people on the waiting lists got in."

Priority on waiting lists is given to those who may not have another chance to take the course, Max Milburn, associate professor of journalism and mass communications, said.

# High level

William Fateley, K-State professor of chemistry, received a four-year grant from the Air Force Office of Scientific Research. A colleague of Fateley's, Vernon Bode, professor of biology, received a \$13,238 grant from the National Institute of Child Health and Human Development.

Fateley and Bode are just two of the many K-State faculty members involved in research that utilizes over \$21 million dollars a year from federal, state and private sources. Research not only benefits a particular area of study, but also graduate students assisting in the research and eventually entire society benefits. Research is divided into three general areas according to Robert F. Kruh, dean of graduate school. General Research handles research involving departments in the colleges of Arts and Sciences. The Agriculture Experiment Station controls the agriculture, home economics and veterinary medicine research and the Engineering Experiment Station handles engineering research.

Three factors are involved in research, Kruh said. It produces new additional knowledge, it serves as a rich resource to the state because an expert in almost every field can be found on campus, and the final product or result of a research project can be incorporated into the future study of the graduate student.

Support grants from the external sources are given when a funding source believes a research proposal is a good investment. Kruh said faculty members

# learning

receive grants because of their ability to come up with a good idea, their ability to compete with others for the awards and because of their reputation of excellence in a field.

"K-State is one of the top 100 schools for receiving federal funds," Kruh said.

Engineering, agriculture and biology research projects are the most often noted. However, other areas of study such as art, philosophy, history and education are also recipients of many awards.

Faculty members are encouraged to engage in research in their field, according to Kruh.

"They are expected to contribute to their field, be aware of new techniques, new ideas, principles and theories," Kruh said. Approximately 4,000 graduate students are involved in a research project in their studies.

"Research is the way of learning at the most high level," Kruh said. Using research to gain better knowledge into the subject, graduate students probe more deeply into a field.

Graduate students are paid "substance money" to cover the minimal cost of an education, according to Kruh.

Because the research field is a never ending, continuously expanding program, there is no limit to its growth. Research will continue to play a major role in the education of students and the bettering of society, as there will always be a better mousetrap to be built, according to Kruh. **RP** by Kathy Pakkebie

# K-State research: Cattle to cancer

Most people exercise their gerbil on a treadmill, not their 500-pound steer. However, in the College of Veterinary Medicine, beef cattle were given a workout on a large treadmill for research.

Cattle were placed under stress to learn more about how stress can lead to bovine respiratory disease.

Several other universities are conducting research on respiratory diseases, but their projects deal primarily with infectious agents and vaccines, according to Frank Blecha, stress physiologist in the department of anatomy and physiology, and member of the team working on the project.

"The K-State respiratory research project is unusual because of the stress-factor approach," he said.

M. Roger Fedde, professor in physiology who heads the team, said respiratory diseases cause reduced growth rate in animals affected.

"Respiratory diseases are the primary dollar amount losses in beef cattle production, and results from this project could mean important changes for Kansas' largest industry," Fedde said.

Other livestock are also affected by respiratory disease. It is the leading cause of economic losses in horses and poultry, and the second leading cause of losses in swine.

The research team's purpose was to identify and alter factors that make animals susceptible to respiratory

diseases.

The K-State research was supported by a one year \$40,951 grant from the U.S. Department of Agriculture.

Fedde and Blecha worked along with Richard Gallagher, bioinstrumentation specialist in the department of electrical engineering; Harish Minoch, virologist in the department of laboratory medicine; and Wade Kuhlman, a graduate student in the department of anatomy and physiology.

Not only is K-State striving for healthy animals but healthy people, as well.

Four biology professors were recipients of a "Research Career Development Award" by the National Institute of Health. The four faculty members have their salary paid for five years by the National Institute of Health to do research.

The award was won in national competition and allows the winners to focus early in their careers on research.

Donald Roufa was in his fifth year of studying cell genetics and cancer biology. Larry Takemoto is also involved in the never-ending cancer research. He also is exploring the aging process and cataract formation.

Paul T. Kelly chose to do research in neurobiology and development of the central nervous system. Why a body rejects one kidney and not another is one of the subjects of concern for L. Scott Rodkey in his study of immunity mechanisms.

Just as medicine requires continuing research, so does the area of energy.

A K-State professor of electrical engineering is developing a system through research that should help lower the cost of electricity generated from wind.

With a \$76,500 grant from the U.S. Department of Agriculture, Gary L. Johnson is working to design a control system which connects a wind generator to the electric utility line.

Wind power can generate energy to heat buildings along with drying grain and also for air conditioning, according to Johnson.

"The control system will be designed for a wind machine that will supply these needs and also produce surplus power that can be sold to utilities," Johnson said.

"Machines this size are just now becoming available, and control systems for them are still expensive. We are trying to get into 'economics of scale' so we can reduce the cost per unit of electricity produced."

"Control systems now cost several thousand dollars, but we can justify perhaps \$1,000 to make the entire system more cost effective," Johnson said.

An idea can be thought up in an instant. But it usually takes years of research and development before the idea becomes beneficial to society. **EP** by Susan Arnoldy

*Hoofing it* — A calf undergoes tests dealing with stress related respiratory diseases. The research, done at the Veterinary Medicine Complex, was aimed at reducing losses in cattle production.

Jeff Taylor

Scott Liebler

Sports is perhaps the biggest stronghold of traditions on the college level and K-State is no exception to the rule. The levels of interest in particular sports varied but opportunities to join in on some Wildcat spirit were plentiful and many students did just that.

K-State, however, holds the distinction of trying to break tradition and make it in the same year. Head football coach Jim Dickey tried to fight the team's losing history with a unique redshirting plan that was unheard of in major college circles, while Jack Hartman attempted to build on K-State's strong basketball tradition as it was.

Not all sports news was made on the playing field. The resignation of Deloss Dodds marked the end of an era for the Athletic Department. Dodds left after putting the department's finances back in the black and the integrity back in line with the NCAA. He was replaced by a former undergraduate, Dick Towers.

When the issue finally came to a vote, Student Senate committed \$5.5 million of student money toward a proposed coliseum. Controversy about the role of sports on campus and student input in Senate decisions transcended normal sports boundaries.

But while some of the issues may have been clouded by controversy, the traditional college sports scene thrived at K-State. RP

# Towers climbs to top of

With the resignation of Deloss Dodds in mid-August came the search for a new athletic director. Dodds, who had served as athletic director since July 1978, steered K-State's athletic department through a bleak financial situation, a football probation and a Title IX suit concerning women's athletics. He left K-State athletics in one of its most stable conditions in recent years to become the men's athletic director at the University of Texas in Austin.

The search for a new athletic director ended on Oct. 26 with the appointment of Dick Towers. Towers, a native Kansan and 1953 K-State graduate, came to K-State with a broad knowledge of the athletic system, its problems and 23 years experience as a football coach and educator.

Towers had been hired in the summer as the academic counselor for athletics. For the preceding four years he had been the athletic director for the Great Bend school system.

Towers said he's always been involved in athletics. "When I was growing up I loved to be involved in outdoor activities and athletics."

"I had a great experience at K-State in track and football." Towers started and lettered for three years in football and track at K-State.

He also served as post athletic director at Fort Leonard Wood, Mo., football coach for Leavenworth and Manhattan high schools and Hutchinson Community College. In 1964 he returned to K-State as the offensive backfield coach for two seasons. From there he went to Southern Illinois University at Carbondale where he served as assistant and later head football coach. In 1971 he was named college division Coach of the Year.

Duke University was Towers' next stop where he served as offensive backfield coach from 1974 to 1977. He then returned to Kansas to the Great Bend school system. ♦

# department

"This is something I've really wanted. I think all my life I've prepared for this. The right opportunity came for me and I was prepared," he said.

But he added, "It's important to keep the proper perspective in this job." That's probably why Towers has a variety of hobbies outside of the athletic realm.

Towers and his wife have built two houses, one in Great Bend and one in Manhattan. The houses were built on weekends and spare time.

Towers also likes to restore old cars. He has a 1936 Chevy that he and his son restored. He also has a 1947 MG-TC that he bought while at Duke and a 1966 Toronado, the first American-made car with front wheel drive.

He makes his own lures and once a year he takes a fishing trip to Montana. He is also a licensed pilot. He likes to hunt and golf.

Towers' goal for K-State is "very simple," he said. "I want to get our sportsmen's and women's — at a high level nationwide, and do this with honesty and integrity. In other words, we will play by the rules."

Basketball, he said, already has a competitive edge nationally. "My goal is to get football to be competitive. K-State is one of the great land grant colleges in the country. We are a member of a great conference that is nationally recognized and respected. K-State must be an important part of that conference." **RP** by Kerri Harter

**Past** — Deloss Dodds discusses strategies for the department before his departure to Austin.

**Present** — Speaking at a banquet in his honor, Dick Towers addresses the goals of his administration.

# Women's sports affiliate with NCAA

artwork by Anton Arnoldy

**Pacesetter** — Janet LeValley, junior in history, takes an early lead in the women's 5,000-meter race at Warner Park. LeValley, the fourth place finisher, is followed by Deb Pihl, junior in health, who won the race in 17:32.

Leaving the Association for Intercollegiate Athletics for Women for affiliation with the National Collegiate Athletic Association is a big step for K-State women's sports, according to Lynn Hickey, varsity basketball coach.

The coaching staff and players are in favor of the division change. Because the NCAA has television rights, more money and publicity will be made for the team.

"The switch is not clear-cut," Scott Nelson, women's volleyball coach, said. "The women's teams will be participating in the NCAA championships, but the change has no effect on recruiting, nor competition right now."

The rules used under the AIAW division will remain under the NCAA. The opponents will be basically the same as in the past, but since there are fewer than six schools having women's sports in the NCAA, K-State cannot receive a regular bid to the play-offs.

The only chance of getting to the play-offs is by an "at-large bid," which is easier

to get by playing teams we've played in the past, according to Hickey.

"The spectators would be able to identify more with playing Big 8 teams, but it is to our advantage that we won't be," Hickey said.

"While the benefits won't be in the immediate future, eventually, because of the increase in publicity, there will be more attendance at women's games," Nelson said.

Becoming lost in the crowd seems to be the main worry of players and coaches. The NCAA is traditionally a male dominated association.

"The problem of male domination, however, will hopefully not be a problem since the NCAA has agreed to have women on all committees," Hickey said.

Switching affiliations is just one step of a long process.

"One day, the women's teams will be among the Big 8 Conference just like the men's teams," Hickey said. **RE** by Susan Somora

## *Many dream of it, but few have the opportunity*

The dream to play professional sports is in the minds of many K-State athletes. The reality comes true for only a few.

K-State produced four professional athletes and another graduate in a managing position in 1981.

Two athletes were drafted in football. Monte Bennett and Steve Clark entered the professional ranks after standout careers at K-State.

Bennett, a former nose-guard, was drafted by the New Orleans Saints. He went to the Saints' organization as a defensive lineman.

Clark, drafted by the New England Patriots also entered the pros as a defensive lineman. Clark played defensive end and tackle for the Wildcats.

Jeff Thorson broke into the professional football scene, although not on the playing field. Thorson, former assistant equipment manager at K-State, was named head equipment manager for the Houston Oilers.

Rolando Blackman was the second choice during the first round of the Nation-

al Basketball Association draft. Blackman was chosen along with Mark Aquirre of DePaul University and Jay Vincent of Michigan State University as the building blocks of the Dallas Maverick expansion team. Blackman, a member of the 1980

the team during the summer to check graduating players. Prospects are timed in the 40-yard dash and charted on their weight-lifting statistics. The Office of Sports Information sends out weekly informational releases about the team mem-

bers. Along with these releases, film clips of the players in action are sent to teams requesting them.

Basketball scouts come to the games and attend practices to see the athletes. They also received statistics on the players from Sports Informa-

# 'Going pro'

Olympic team, had played a key role in K-State's 24-9 season in 1981.

Shortstop Antonio Triplett went to the Texas Rangers after two years in junior college and one year at K-State. Triplett landed a position with the Rangers' second team but said he hoped to play for the first team by the fall of 1982.

Moving to the pros is aided by the individual team programs at K-State but each sport handles informational releases in approximately the same manner.

In football, professional scouts contact

tion.

Scouts recruiting for baseball see the athletes at games and contact coaches for additional information. Some teams hold area tryouts for local talent. The Cincinnati Reds held such a tryout during the summer at Frank Meyers Field.

Actually being drafted is a far cry from surviving in the world of professional athletics, but for at least a few K-Staters, the dream is still alive. Only time answers the question of how long it will continue. **RP**

by Tammy West

**On Call** — K-State defensive lineman Steve Clark awaits a telephone call from a National Football League team during the first day of the draft. Clark was picked in the fifth round by the New England Patriots.

*You're on* — Younger players like Gary Morrill, sophomore cornerback, gain valuable playing experience while the seniors are redshirted.

Jeff Taylor

The team that has traditionally found ways to lose is experimenting with a new way to win.

K-State football owns the worst winning percentage of major colleges in the nation for games after 1945. Coach Jim Dickey took a drastic step to reverse that trend by redshirting seven senior starters. The group included guard Amos Donaldson, linebackers Will Cokeley and Vic Koenning, defensive linesmen Mike Simeta and Wade Wentling, defensive back Jim Morris and offensive tackle Doug Hoppock.

Redshirting allows the player to practice with the team but prohibits playing in any game for the entire season. The move is common in college football to allow players an extra year of maturity and training. It also increases team depth by allowing the coach to pick starters from a five-year recruiting period instead of the normal four.

Dickey installed the redshirting program which he hopes to pattern similar to the University of Nebraska's program. The difference is that redshirting starting seniors was unheard of in college football circles. Nebraska and most other colleges redshirt players on the sophomore or junior level.

Dickey denied rumors that he had sacrificed the 1981 season for a better

1982 season by holding out some of the team's best players. The only comments that he received about the decision by the start of the season were positive, according to Dickey.

"The redshirting is one of the smartest things that could have been done in building the program," according to Vic Koenning. "Its like putting money into a bank and receiving interest as we are gaining experience and improving physically by lifting weights and running."

"It is very beneficial and it works in a two-fold way as it gives the younger players more experience while the seniors and the other redshirted players develop and concentrate on their individual skills," said Wade Wentling.

What happens if the redshirt approach doesn't produce the results in 1982?

"A new can of coaches may be in order," Dickey said.

The results remain to be seen but as one area newspaper put it, Dickey's redshirt program may be forever known as "the charge of the light brigade" in college football. **RD** by Char Heinke

# Dickey said Cats to be competitive

It was all a matter of numbers, according to Coach Jim Dickey. K-State just didn't have enough outstanding athletes at one time to field a team and would be bogged in mediocrity until something was done to improve the situation. Thus, Dickey redshirted seven starting seniors.

But Dickey insisted that the season was not being sacrificed to build for the future and that the Cats would be competitive. While sportswriters and fans generally supported the redshirting decision, a substantially fewer number were convinced by his reassurances. **RP**

*Heads together now — The K-State Wildcats are ready for action against South Dakota. The Cats emerged victorious with a final score of 31-10.*

South Dakota head coach Dave Triplett accused the Wildcats of running up the score and said the game was comparable to K-State playing the Kansas City Chiefs.

The victory was a milestone for Jim Dickey, who recorded his first opening-game victory at K-State. **RP**

K-State kicked off the year of the redshirt against South Dakota in a resounding fashion. The Wildcats rang up a 31-10 decision over the Coyotes before 20,210 sun-drenched fans in KSU Stadium.

The Wildcats, playing without the leadership of their eight would-be starting redshirts, found a field general in Darrell Ray Dickey. The junior quarterback directed a finely tuned offense which amassed 536 yards against outmanned South Dakota, an NCAA Division II school.

The total yardage by K-State represented the third-highest output in a single game by any Wildcat team. Running the option to near perfection, Dickey ran for 126 yards and passed for another 120 yards. His rushing yardage set a modern K-State record for quarterbacks, surpassing the old mark of 100 yards by Steve Grogan in 1973.

"They didn't want us to get the big play so they let me run the ball," Dickey said. "A lot of those plays were option passes, but since they were leaving me alone I just ran."

The defense was not lacking for leadership, either. Reggie Singletary, playing in his first major college game, continually harassed the South Dakota defense. He finished with 12 tackles, including four sacks for minus 17 yards.

"Reggie disrupted like we thought he would," Head Coach Jim Dickey said. "He will be a big-League player in the Big 8 in the next three years."

Going into the game, Coach Dickey knew the defense would have to play well to keep K-State within striking distance of the 17th-ranked Huskies.

The defense held up its end of the bargain, but the offense did an about-face and Washington saddled the Wildcats with a 20-3 loss at Husky Stadium in Seattle.

The Wildcats came into the game as underdogs to the Huskies, who were coming off a 23-6 loss to Michigan in the Rose Bowl after the end of the 1980 season. Still, the Huskies had a tough time shaking the pesky Wildcats.

The game breaker came when sophomore quarterback Steve Pelluer hooked up with split end Anthony Allen for a 69-yard touchdown.

Washington tried to play into the hands of the Wildcats by losing three fumbles and two passes to the active K-State defense, but the Wildcats could not take advantage of opportunities to score. To make matters worse, K-State also gave the ball away five times.

The statistics battle did not reflect the advantage held on the scoreboard. The Huskies outgained K-State 296-287. For the second consecutive week, the running sparked by Masi Toluao with 78 yards, showed some punch pilling up 172 yards against the Washington defense.

Darrell Ray Dickey completed only 5 of 19 passes against the Huskies. **RP**

*Shooting the gap* — Ivan Pearl, running back, crosses the goal from two yards out to give the Wildcats a 14-3 lead over Drake. Drake came back to win 18-17.

Rob Clark

"It's a continued worry how we figure out ways to lose," Coach Dickey lamented after K-State lost, 18-17, to the Drake Bulldogs before 31,220 stunned fans in KSU Stadium.

A six-yard touchdown pass from quarterback Gary Yagelski to tight end David Borsh provided Drake with its winning margin. That pass was the culmination of a second-half rally which saw the Bulldogs recover from a 14-6 halftime deficit.

Yagelski riddled the Wildcat secondary for 206 yards passing and fullback Amero Ware rambled for 142 yards as Drake built up a 375-215 offensive advantage.

Drake dominated the second half from its onset. The Bulldogs took the opening kickoff and marched 80 yards against the wind for a touchdown which cut K-State's lead 14-12. The two-point conversion attempt failed.

Neither team scored again until 4:58 remained in the game. K-State kicked a 30-yard field goal to take a 17-12 lead.

The Bulldogs then began the winning game drive at its own 23-yard line after the kickoff. **RP**

Five lost fumbles set up scores as the Golden Hurricanes gained strength for a second half victory, 35-21, at Skelly Stadium in Tulsa.

To pull out the victory, Tulsa overcame a 21-7 deficit at half-time and won their first time of the season after four losses by a total of 12 points.

"The thing that really hurts was that Tulsa came back in the second half and really wanted to win," head coach Dickey said. "It also hurts that we only had four or five guys on both sides of the line of scrimmage who played as well as they can."

Two of those players were defensive tackle Reggie Singletary and linebacker Dan Ruzich. The two completed 18 and 17 tackles, respectively. Singletary also disrupted the Tulsa attack for six sacks for minus 17 yards.

"Reggie had one of the best games ever, and Danny Ruzich played real well," Dickey said.

Tulsa scored in the third and fourth quarter to grab the victory over K-State for the fourth time in many years. **RP**

Rob Clark

*Free flight* — Mark Hundley, running back, scores over the top in the second quarter against South Dakota. K-State went on to win 31-10.

Two years ago at Faurot Field in Columbia, K-State stunned the Tigers. But there was to be no upset this time in the first Big 8 game for both teams.

Missouri scored 21 points in the first seven minutes, 29 seconds of the game, enroute to a 58-13 triumph.

Two fumbles and a short punt gave Missouri excellent field position to break open the game early. When the dust settled, K-State had lost four fumbles and two passes, giving away 28 points.

"When you make one mistake they start to multiply," head Coach Dickey said. "We were very generous. We made too many mistakes to give ourselves a chance to stay in the game."

The Tigers took a 28-0 lead only 56 seconds into the second quarter. K-State got on the board at the 10:35 mark in that same period when quarterback Darrell Ray Dickey found split end Ernie Coleman behind the secondary in the end zone for a 35-yard completion.

In the third quarter, Dickey hit flanker Rick Manning on a 5-yard toss, and the extra point was blocked. The Tigers tacked on a 1-yard touchdown scamper by running back Bobby Meyer, his third score of the day. **RP**

Scott Williams

**Brought down** — Split end Ernie Coleman is hit hard by a tough Missouri defense. The Cats had difficulty with the Tigers and lost 58-13 in the conference opener.

**Head First** — Nebraska running back Roger Craig dives over the defense during the third quarter.

The Cornhuskers were the foe for K-State in the season's sixth weekend. Nebraska continued the agony of the Wildcats with a 46-point victory before 44,915 fans in KSU Stadium.

It was the second largest crowd in the 12-year history of the stadium and a sea of red was given credit for the full house.

Much to the pleasure of the Big Red faithful in attendance Nebraska lined up and did what it does best — run.

The Cornhuskers' rushing offense, third-ranked in the country at the time, racked up 451 yards, and defensively, Nebraska limited the Wildcats to only 136 yards.

Overall, Dickey was impressed with the Cornhuskers in all phases of the game. "I said before the game that Nebraska was a great team and I haven't changed my view," he said.

"We played some young players who were not ready to play at this level. Our program is totally based on developing, but that doesn't take anything away from Nebraska," Dickey said.

The offensive line enabled Nebraska to establish its superiority and give the Cornhuskers' runningbacks room to run. "Their backs looked like Oklahoma backs, I didn't think they had great backs, but those guys can run," said Coach Dickey.

The top rusher for Nebraska was sophomore I-back Mike Rozier who had 153 yards on 19 rushes. Most of that came on a 93-yard romp early in the second quarter.

A 33-yard field goal by Steve Willis late in the third quarter prevented the shutout. The only bright play came when sophomore punter Scott Fulhage hit a 48-yard punt out-of-bounds on the Nebraska 7-yard line.

However, the Cornhuskers weren't in the shadow of their own goal line for long. On the next play Rozier galloped 93 yards for a touchdown. It was that kind of a day. **RP**

Rob Clark

Once again the University of Kansas rallied to beat K-State, 17-14, in Memorial Stadium at Lawrence, where placekicker Bruce Kallmeyer booted a 28-yard field goal with only one minute, 33 seconds left in the game.

"It was a well-played game by both teams," Head Coach Dickey said, "but it was a real disappointment to our team."

This was the 55th time K-State had been frustrated by the Jayhawks in the series which began in 1902. The Wildcats have tasted victory against the Jayhawks only 20 times, and four games have been played even.

K-State led at halftime, 14-7, and seemingly had momentum, but the second-half was a different ballgame. The fact that the Wildcats could not score and made critical mistakes came back to haunt them. "We couldn't get any points in the second half which was vital to the outcome of the game," Dickey said. "We made mistakes and I don't think you can make those kind of mistakes and win a football game."

The game began as if K-State would run over the Jayhawks. The lead held up until the end of the second quarter when KU ran four yards for a touchdown after an 80-yard drive.

The Wildcats returned the favor on their next series. Starting at the 28-yard line, K-State moved the length of the field in 16 plays, with Mark Hundley going over the one-yard line.

Disappointment came on K-State's next possession. After driving to the two-yard line, KU strong safety Gary Coleman made a game saving tackle on Dickey who was trying to score.

Three running plays after a Dickey interception, Kallmeyer decided the issue once and for all, setting off the victory celebration for KU players and fans alike, by kicking a fieldgoal. **RP**

Rob Clark

*Leading the crowd* — Reggie Singletary and D.L. Johnson celebrate victory in the final seconds of a 10-7 win over Iowa State. The win was K-State's first Homecoming victory since 1970.

Jeff Taylor

Disguised as giant killers on Halloween, the Wildcats tricked the 11th ranked Iowa State, 10-7, and treated 26,650 enthusiastic fans to a happy Homecoming in KSU stadium.

The victory broke the 11 year drought for K-State which last won a Homecoming game in 1970, a 28-15 decision over Oklahoma State.

"I needed this one badly," Head Coach Dickey said after his Homecoming triumph. "My stomach was going crazy."

He looked on as K-State amassed 257 yards against a strong Iowa State defense. Tailback Mark Hundley led all rushers with 109 yards on 28 carriers. Masi Toluao had 80 yards on 17 totes.

"This was a game the players deserved to win," Dickey said. "It was a great performance by our kids, offensively and defensively."

While the offense controlled the game, the defense stymied Dwayne Crutchfield, the Cyclones' battering ram. He only gained 46 yards which was a personal low for any one game in his two seasons at Iowa State.

The game began rather ominously, as K-State fumbled on the opening drive to give Iowa State field position only 38 yards from paydirt. It took only four plays to score as quarterback John Quinn ran in from six yards out.

The Wildcats got a boost from the toe of Steve Willis in the waning seconds of the first half when he converted a 38-yard field goal.

"Those things just have a way of sparking the team," said Coach Dickey. The 'Cats went on to score in the second half and won the game 10-7. K-State chose to receive at the onset of the second half of play. The offense marched down the field in an impressive 19 play drive. A Hundley run around the right end of the offense produced the game winning touchdown. **RP**

*Bummer* — Darrell Ray Dickey contemplates an interception just thrown to a Jayhawker that sealed the defeat.

Head coach Jim Dickey and his staff knew that in order to beat Oklahoma, the Wildcats would have to play keep away from the dreaded Sooner wishbone attack.

And it almost worked. In the end, the Sooners wiggled off the hook and left KSU Stadium with a 28-21 victory.

"I think we were really ready to play," Dickey said. "Our coaches had a good game plan against them." The plan drew on numerous onside kicks designed to take advantage of an Oklahoma flaw.

Maintaining possession of the pigskin was the key to K-State's surprising start. K-State took the opening kickoff and marched 80 yards in 20 plays using up 10 minutes, 13 seconds in the first quarter. Tailback Mark Hundley reached the endzone on a one yard leap over the goal line.

Donnie Kirk kicked the football only 12 yards and fell on it at the Sooner 43-yard line. At the end of a seven play drive, Hundley

was called on to use his leaping abilities for another one yard score. The key play in the drive was a pass interference call in the end zone which moved the ball to the one yard line.

The Wildcats threatened yet another onside kick but this time John Chandler lofted it over the front line. Oklahoma ran three plays and then katback James Robinson fell on a fumble at the Sooner 39-yard line. Backup tailback Iosefatu Faraime put K-State ahead 21-0 when he scored on a 2-yard run around the right end. The Wildcats called on Chandler to execute another onside kick. He squibbed the ball along the ground and after a Sooner player had touched it, he pounced on it at the Oklahoma 42-yard line. However, a dead ball foul after the play pushed K-State back, and the offense turned the ball over on downs.

It was time for the Sooners to roll. At the half, K-State lead 21-6. At the end of the third period, the score was 21-14, and midway through the final quarter the Sooners had closed the gap to 21-20. A final touchdown made it 28-21.

The winning touchdown for Oklahoma had come after a fumbled Oklahoma punt which kept the Sooner's comeback alive, but Coach Dickey refused to pinpoint the play as the reason for the loss.

There were missed opportunities to score more points, according to Dickey. "We're a better team than we were when we started the season," he said. **RP**

Without starting quarterback Dickey, the team's leading tackler in linebacker Dan Ruzich and tailback Mark Hundley, who was hindered by a sore neck, the Wildcats struggled offensively against the nationally ranked Oklahoma State defense. As a result, the Cowboys prevailed, 31-10, before a Homecoming crowd at Lewis Field in Stillwater.

Backup quarterback Rusty Hill made the start instead, playing for the first time since the Nebraska game, as he completed 11-21 passes for 181 yards. Most of the yardage belonged to freshman flanker Mike Wallace who caught seven passes for 146 yards and one touchdown.

That touchdown was the start of a 10 point flurry at the beginning of the third quarter as the Wildcats erased a 17-0 halftime deficit. Then Oklahoma padded its advantage with 14 fourth-quarter points including a 96-yard run with a fumble that clinched the game with three minutes left.

Mistakes were also a factor in the demise of the Wildcats who had played well in the prior three weeks. Seven fumbles, two of them lost, stalled the running attack which had been productive since the KU game.

"Our injury situation is critical. We really don't like to play without Danny Ruzich who has a lot playing experience," Head Coach Dickey said before the game. **RP**

**A nerve wrecking day** — During the Oklahoma game played in Manhattan, Head Coach Jim Dickey and Offensive Coordinator Jerry Boyce watch as the Wildcats let a 21-6 halftime lead diminish into a 28-21 Sooner victory.

The first phase of the grand redshirting experiment ended with the Wildcats in the bottom of the Big 8 again.

It was another year of "almosts" and "would've beens" in a 2-9 season that made Coach Jim Dickey remark, "It's a continued worry how we figure out ways to lose."

But it was a season with a cause. Finally, so it seemed, K-State had a plan to improve its football team. While the Iowa State upset and the exciting Oklahoma game highlighted the season, next year was always in the back of the minds of players and fans. It remains to be seen if the senior redshirt plan will produce results, but it did add something to the old slogan, "Wait, 'till next year." **introduction and closing by Anton Arnoldy**

For the second year in a row, K-State and Colorado fought for the Big 8 basement in the season finale for both teams.

But unlike 1980 when K-State prevailed 17-14 on a last-second field goal and tied the Buffalos for last place, Colorado got the best of the Wildcats, 24-21.

One glance at the score might indicate that it was a good game — far from it. Only a last-gasp effort by K-State in the fourth quarter made it appear respectable.

Head Coach Jim Dickey, who was given a two-year extension on his contract during mid-week, was displeased with the attitude displayed by his team. It appeared as though the Wildcats were playing out the string.

Both teams were sluggish in the first half. Colorado took a 10-0 lead and K-State responded with a touchdown just before half-time.

That advantage ballooned to 24-7 on a pair of touchdowns in the third quarter. Then the Colorado defense was called on to preserve the lead.

K-State made an effort to pull the game out, but it was a case of too little, and too late. A 3-yard run by Eric Mack and a two-point conversion pass from quarterback Darrell Ray Dickey to fullback Masi Toluao closed the gap to 24-15.

Minutes later, running back, Ivan Pearl, who caught four passes for 94 yards, latched on to a 41-yard strike from Dickey. The snap from center for the extra point went awry and the Wildcats trailed 24-21.

An onside kick attempt failed, and Colorado ran out the clock for the game as well as the season. **All game by game copy by Ron Brown.**

# Taking it on the run

A one-mile run is an agonizing experience for many people, while others run five to ten miles a day with little effort. Fun Runs offer all types of runners the opportunity to spend a Saturday afternoon exercising at their own pace.

Usually pre-planned, with pre-routed courses, Fun Runs are sponsored by various groups to get visibility or promote a cause.

In 1977, the First National Bank brought Fun Runs to Manhattan with the first Little Apple Road Race. The annual run has had participants ranging from three years to 71 years old.

K-State students have gradually gotten into the Fun Run craze. ROTC held a Fun Run in September. The Recreation Complex sponsored a pre-game Fun Run before

the University of Nebraska football game in October.

Most Fun Runs have two courses. A short course of two miles is available to the runner out for some mild exercise and a good time. For more serious runners, there is a longer course, usually 10,000 meters (6.2 miles).

Janis Rupe, graduate student in health, ran in the Little Apple Road Race as part of her training for a marathon. Anthony Wilcox, assistant professor for the Health, Physical Education and Recreation Department, participates in Fun Runs as a "stimulus for maintaining training." Both said they like the feeling of competition.

Jack Ayres, coordinator of the 1981 Little Apple Run, said Fun Runs will remain popular because they combine an emphasis on individual fitness with a planned social event. For whatever reason, Fun Runs remain a popular activity at K-State. **RP** by Beth Bowen

*The end* — Mark Roessler, senior in industrial engineering, shows pain and relief after finishing 10,000 meters in the Little Apple Road Race.

# Manhattan to Lawrence: Via canoe

It starts in Manhattan and ends in Lawrence, but during the course of the K-State-KU Residence Hall Canoe Race, the Kansas River wears down many old grievances, and a few new ones rise to the surface.

"We get this big hype built up between the two schools, but you get on this river, and you realize that people here (at K-State) are not all hick farmers, and they realize that we're not all running around with our noses in the air," Alan Bailey, University of Kansas junior in geology, said.

The competition begins early at the Fish and Game boat ramp, located on U.S. 24, east of Manhattan. A few chants fill the air as race time nears.

The canoes are launched at 8 a.m., and the canoeists hurl mild insults as they jockey for position. A shotgun report starts the race, and 28 canoes drive ahead, bumping and ramming one another. Eighty-four paddles slash the water as the canoes surge toward the front of the flotilla.

Passing under a railroad trestle lined with teammates and supporters, the canoes round the first bend, leaving the crowd behind.

The official map given to each team at the start of the race lists eight locations where the spent rowers can be relieved. Many race veterans have designed their own maps and checkpoints to relieve rowers at more advantageous areas, according to Tony Ferguson, senior in mechanical engineering.

Part of the race strategy is to read the river, according to Lee Engler, senior in landscape architecture. The canoeists must avoid sandbars that force them to drag their canoes to deeper water.

As the canoes come into sight, the support crews wave team flags and shout encouragement. The rowers summon a last burst of energy and sprint toward their teammates.

The exhausted rowers roll out of their canoes and rest in the water as the new rowers depart amidst cheers from their crew.

Back-up crews are essential to the race because it is their duty to meet the canoe at the checkpoint.

One missed checkpoint can ruin a team's morale and cost valuable time because the rowers become too tired to continue the muscle-straining pace, Engler said.

The final checkpoint of the first half of the race is an island outside St. Mary's. As the canoes arrive they are timed in order to preserve their positions for the start on Sunday.

The day's competition behind them, the rowers set up camp and begin to unwind. Coolers are produced as the rival teams begin to compare notes, and discuss the politics of the two universities.

But important decisions are also being made. The teams assess their chances for victory. Some choose to drop out, others opt to finish for finishing's sake. The leaders plan their assault on the finishing line.

"We came down to have a good time, but we want to finish the race," said Glenn Moreland, sophomore in construction science.

"There's competition out there, but I think the competition's real good," said Terri Sween, KU freshman in mathematics.

"The people in the boats work hard, but all the rest of the time you just lay back," said Roger Hansberry, freshman in general.

Race participants are joined at nightfall by friends who are not participating in the race. Cars line the road leading to the camp-

site, and the all-night parties begin.

However, by 1 a.m. most of the racers have retired to their sleeping bags, to rest for the day ahead.

On Sunday morning the race starts anew. The competitive canoeists are now more determined — the rowing becomes stronger, steadier.

Racers representing categories other than residence halls have contests of their own. This year the overall race winner and independent class winner was the K-State River Pigs with a time of 15 hours and 3 minutes. The Rogues, from KU, won the Greek competition in 16 hours and 38 minutes. Van Zile Competitive won the residence hall category in 16 hours and 58 minutes.

The 110-mile stretch of river took its toll on all the participants.

John Miller, senior in business administration, summarized most participant's feelings at the end of the race, "Right now the worst part is driving back from Lawrence to Manhattan because everybody in your car goes asleep." **RP** by Tom Glass

*Smooth Sailing* —Some participants spend hours planning their strategy while others participate for the leisure of floating down the river during the day and partying at night.

Jeff Taylor

Scott Williams

*Drats* — Taking a spill during the canoe race is all a part of the competition. One participant holds the canoe while the other is submerged.

Scott Williams

*Relief at last* — A new team of rowers is sent on its way while the old team cheers. Residence Hall first place winners were Van Zile Competitive — John Alexander, freshman in computer science, Janice Schmitz, sophomore in architecture and Dan O'Donnell, freshman in business administration. Looking on are Jeff Greene, senior in architecture, Beth Thomas, sophomore in pre-veterinary medicine, and James Mather, junior in architecture.

# Veterinary professor changes roles

Every Friday afternoon during football season, Dr. Dan Upson puts down his textbook, picks up his whistle and heads for the football field. Unlike the weekend football fan who goes to the game for fun, Upson goes to work.

"We have a philosophy that every Saturday our game for us is the biggest game in the country that day. You have to approach it that way," said Upson, professor in veterinary medicine at K-State and a Big 8 Conference official.

"And if you ever quit getting nervous before the game, it's time to quit officiating," he added. Upson completed his 10th year in the Big 8 Conference, but he hasn't always been at the Big 8 level.

First, there were games involving junior high and small high schools where his career as an official began nearly 25 years ago. Next, were games involving small Kansas colleges like Washburn and Emporia State.

From the small colleges he moved to the Missouri Valley Conference which includes Tulsa and Drake, two of K-State's opponents in the fall.

Upson's position on the officiating crew is back judge. The back judge stands in the defensive secondary and is always on the press box side of the field. He concentrates on running plays to his side of the field, pass plays and punt returns. Upson became a back judge because it was the position most needed when he started officiating on the high school level. He has been there ever since. In those days high schools had four-man crews and he was designated as field judge.

When Upson came into the Big 8 in 1972, policy stated that no official could work a game for a university in his state. Upson said this rule was later modified and he can now officiate University of Kansas games. He is still not permitted to officiate K-State games.

Upson's years as an official outnumber his years in teaching by three. He has been teaching in K-State's College of Veterinary Medicine for the past 22 years. Upson graduated from K-State with a degree in veterinary medicine.

After graduating at 22, Upson went into private practice with another veterinarian in his hometown of Hutchinson. A year and a half later, he opened a private practice in Pretty Prairie, where he spent the next five and a half years. After seven years of private practice Upson returned to K-State intending to take some specialty work and return to practice. However, he discovered teaching and has been doing it ever since.

Upson teaches two classes to professional students and two classes of service courses to agriculture students. He is also in charge of the audio-visual systems for the College of Veterinary Medicine.

Although Upson does not do surgery in the veterinary hospital and has no patient responsibilities, he does do experimental surgery for classroom demonstrations.

"In my opinion, Dan is the ideal type of instructor we look for in the College of Veterinary Medicine," Russell Frey, head of the department of anatomy and physiology, said "Twice he has been the recipient of the Norton Award, which is the Teacher of the Year Award, and he has won the All-

Jennifer Zang

*Hitting the books* — Dan Upson, professor of veterinary medicine, stands before his class at the beginning of the period. Upson teaches during the week and is a Big 8 referee on weekends.

University Teacher Award. I think these accomplishments speak for themselves." Upson's list of awards was lengthened by the Kansas Veterinary Medical Association in January. He was named Kansas Veterinarian of the Year.

Frey does not think Upson's officiating interferes with his teaching because he does not have Friday classes.

"He's gone some, but he ends up putting in comp time on Sundays or early in the morning to make up for it," Frey said.

Upson officiates one game every weekend during the football season. The game to which he is assigned determines what time on Friday he must leave Manhattan to be at that destination no later than 6 p.m. If the game is not far away, he prefers to drive his own car.

The same men work together on an officiating team throughout the season unless there is a game involving an alma mater of

one of the members. The crew remains together until reaching the mandatory retirement age of 57.

The crew follows virtually the same routine each weekend. They have dinner together the night before the game. Later, they watch a film of the game that they worked the week before. The film is furnished through the conference by the home team. At each game a press box official keeps a play by play sheet that details every play of the game. During the week, Bruce Finlayson, supervisor of Big 8 officials, uses the sheet as he studies game film to grade the official's work. He makes notations about calls made by the crew. On Friday night, they read his comments.

It's breakfast together at 8 a.m. the next morning and then on to the stadium.

"The players in the Big 8 Conference are exceptionally fine, young men," Upson said. "The old cliché about the dumb football player has been gone for a long time."

"Football is an emotional game. If you don't play with emotion, you are not going to be a good player," Upson said. "The players usually behave themselves because nobody wants to sit on the bench," he said.

Upson said the coaches in the Big 8 are a "super group" to work with. "We couldn't ask for better coaches. They're all high-caliber men with a lot of class. They are under a lot of pressure. They get upset with us, no question about it, but it is understandable. As long as they stay within the realm of enthusiastic, emotional coaches there is no problem at all."

It is rare for a coach to be penalized during a game, Upson said. "I think I have thrown the flag on only one coach in 10 years."

"It is a mutual thing. If they think the official is not doing his job, they'll sure get on him and tell him, and they ought to," he said.

"During the game we'll discover in the midst of doing something that 'No, that's not right there.' Usually, it requires the entire crew getting together and talking over the whole situation and we've changed a lot of mistakes. "The rule of officiating is 'Don't ever walk away from a mistake that can be corrected. Sometimes it makes you look bad, but that is better than making a mistake that affects all these young men," he said.

"I enjoy the game, the excitement and the color. We get emotionally prepared to officiate just like we used to get emotionally ready to play," he said.

"When you quit enjoying that sort of

# on weekend

thing is when you need to quit officiating. It becomes work then and you just wouldn't be very effective."

Upson likes officiating because "it is a chance to stay active in athletics. I have been in athletics all my life from grade school on."

He believes his experience in athletics has helped him in his career as a veterinarian. "You learn from competition, setting goals and teamwork. You learn to get mentally prepared about doing things," Upson said.

Officials who are assigned to work in the post-season bowl games are the ones who grade the highest in the eyes of the coaches and Bruce Finlayson, the Big 8 supervisor.

"Those who make the fewest mistakes are usually the ones in the post-season games," Finlayson said.

Upson was an official in the Liberty Bowl game in December. Ohio State was the victor in the game.

Upson had officiated in five post-season bowl games including the Sugar Bowl of 1979. It was between Alabama and Penn State, who were ranked No. 1 and No. 2 in the nation.

"I have a lot of faith in Dan," Finlayson said. He added that he puts Upson in some of the toughest games because he considers him one of the best officials in the conference.

To be accepted in the Big 8, Finlayson said, an official must have a minimum of three years experience working smaller colleges or junior colleges. All officials must pass a physical exam before each season and are former athletes. There are 30 officials in the Big 8 Conference, five from each of the six states included in the Conference. Their occupations vary and include attorneys, bank presidents, salesmen and college professors.

They are paid \$250 for each game plus expenses for room and travel, Finlayson said.

Being an official means being away from home every weekend during the season, sometimes interrupting family plans.

"I think the families of our officials are very understanding," Finlayson said. "I think they are very proud of having someone in their family who is a part of the Big 8."

"I've never really resented it too much," said Upson's wife, Stephanie.

"I have had Elizabeth here so I'm not alone much. You have to work at it because it cuts down on the time that Elizabeth and I spend with Dan."

Occasionally, it even works to the family's benefit. In September, Upson was assigned to the Oklahoma-Southern California game in Los Angeles where his other daughter, Connie, lives. He was able to spend several days with her after the game. **RD** by Meredith Henderson

# The magic kingdom

It's really not that big of a deal is it? After all, basketball is just a game and Ahearn is just an overcrowded fieldhouse that needs replacing. K-State basketball is just a couple of hours of entertainment on game night and something to talk about over a Coke in the Union. Isn't it?

It is something more, though, for most fans. K-State basketball is that fairy tale land of enchantment, where all is well and worries drift away.

Ahearn Fieldhouse is that "magic kingdom", where the good guys always beat the bad guys and a happy ending is almost always assured. Each time the "kingdom" is invaded, good King Hartman sends forth five valiant knights to slay the dragons. The battle can be fierce, but the victors remain poised throughout.

And in those times when the victory is in danger, the knights draw upon the power of the people for support. The deafening roar of the crowds, the blasts of the royal band, and cheers from a court of regal princesses, immobilizes the invaders, and the knights move in for the kill.

The scene is repeated over and over, but the people always believe in the power of the good king and his knights. And they in return believe in the power of the people and the magic of Ahearn. **RP** by Anton Arnoldy

## A case of the Willies

# Two persons share the mascot position

No K-State basketball or football event would be complete without Willie the Wildcat. The mascot became an official part of the cheering squad in the mid-60's, and is still doing the traditional strip-tease routine, much to the delight of the fans.

The identity of Willie is customarily kept a secret. This helps prevent Willie from being abducted before a game by fans of the opposing team. However, the present Willie said it wouldn't be hard to learn the identity of Willie, if someone were serious about kidnapping him.

"I think another reason for keeping the identity a secret is because people tend to view Willie as more a certain character than a real person," Willie said, "and if they knew who I am, it wouldn't be the same."

**Cue cards** — Willie prompts the crowd with the proper reply during the introduction of opposing players. After each introduction, the crowd responds with a yell such as "big deal" or "so what."

**Eyes right** — The center trumpet player watches the band director during a number in Ahearn Fieldhouse. The band plays dance routines for the cheerleaders as well as their own numbers.

The same person had been Willie for two years until the fall semester when a cast on his leg prevented him from performing. The alternate Willie had been married in the summer, and did not come back to school at K-State, so tryouts for another alternate were held the first week of school.

The alternate Willie said he had always wanted to be Willie, and when the alternate position became open, he decided to try out.

"I was pretty scared at first, because the alternate position was so important for the first year," the alternate said, "and I'd never had any practice at it."

The Willie tryouts are usually held in the spring. The tryouts consist of doing the strip-tease and an interview with the Pep Coordinating Council. The applicants also try on the Willie costume. They are judged on how the costume looks and on how outgoing they are. There are no set rules for trying out, but they should be about six feet tall.

"Last year a girl tried out for the alternate position," Willie said, "but since the Willie was a guy, it would have been obvi-

ous when she was taking his place."

Each Willie is free to develop his own personality for the mascot. The athletic department places few restrictions on the actions of Willie.

"We are just expected to use our common sense, and not do anything that is in poor taste," Willie said. Willie is not allowed to touch the referees, coaches or players.

"It's not good to tease the referees too much either," Willie said. At one of the basketball games this year a referee got angry with his antics and told him to tone them down. Willie said that he usually tries to meet the referees before the game starts. Most of the referees don't mind it when he makes fun of them, he said, and they feel it is a tension release for the crowd if bad calls have been made.

The mascot's head, which is the principal part of the costume, weighs about 25 pounds.

"It gets very hot — like an oven — especially at the basketball games," Willie said. Because Willie sees through the mouth of the head, vision is limited to what is directly in front of him. His costume,

Scott Williams

Russell Shortt

## Willie Wildcat

props and travel expenses are paid for by the athletic department. He receives one hour of credit for his time as Willie.

Willie gets to travel to any game that the cheerleaders attend. He said he doesn't miss too much class because of his job as Willie. He goes to basketball games about an hour before they start, and practices some of his shots. He also stays around after the games to sign autographs and talk with people.

"A lot of kids always want autographs — but I have to sign a lot for college students, too," Willie said.

Willie is allowed to talk, but he has to be close for someone to hear him through the mascot head.

"It's impossible not to talk — especially if you've got a girl out on the basketball floor and you are trying to get her to shoot baskets," the alternate Willie said.

Having a fan shoot baskets at half-time is a popular stunt. The girl is pulled from the audience and taken out to the free-throw line. Willie then has her shoot until she makes one.

*Sideline view* — Reggie Singletary and Willie watch first half action of the Drake football game from the player's bench. Drake won the game, 17-16.

"One time, I blindfolded a girl, and turned her around so she was facing the opposite basket three-fourths of the court away, and had her shoot," Willie said. "The crowd loved it, and I don't think she was too mad about it. Most of the people taken from the audience are good sports," Willie said.

Willie also uses props to entertain the crowd. He has a purple "Super-Cat" outfit complete with cape and a symbol similar to Superman's. Willie also has an eyechart that reads U R BLIND" at the bottom, as well as a blind referee outfit. Whenever a player from the other team is slightly hurt or loses a contact lens, Willie comes running with his doctor's bag.

"I would never use the doctor's bag if a player were seriously hurt," Willie said.

Both of the Willies said it isn't hard to come up with new ideas to please the crowd. A lot of the ideas are passed down, and a lot are spur of the moment ideas.

Willie usually tries to meet the mascots from the opposing teams and do something together.

"At away games it is especially good to be with the other mascot for a while," Willie said. "It makes Willie more accepted."

The Willie alternate said most of the other team's crowds are nice, but that the rudest crowd he's encountered has been Missouri's.

Russell Shortt

*Back support* — Merilee McCaustland, sophomore in arts and sciences, performs a stunt with the help of Bud Cook, sophomore in physical therapy, during a practice at Memorial Stadium.

## Long hours give something to

Aching and weary muscles. Intensive hours of preparation. Unsmiling, determined faces. Fans never see this side of the cheerleading squad as they greet the Wildcats at all home games.

The squad, consisting of eight male yell leaders and eight female cheerleaders, performs double stunts, pyramids, and dance routines at the beginning of each game and during the time outs and half-time.

"Nothing is put before the crowd that hasn't been tried and tested many times," Bea Pray, cheerleader adviser, said. "All the cheerleaders must be mentally and physically prepared or they don't cheer."

The squad practices every weekday for at least two hours, putting in a minimum of ten hours per week.

At practice, the yell leaders perfect pyramids and tumbling, while the cheerleaders rehearse dance routines for the half-time programs.

"You four weren't together with the others on the last eight counts," Pray criticizes. "Okay, let's try it again girls, and this time get those legs higher," she directs.

Interruptions like that are frequent throughout the entire routine. "Sometimes the criticizing really gets to me, but then I realize that I will be a better person be-

cause of it," Judy Buzzard, junior in exercise physiology and new squad member, said.

Most of the squad was new with only four members returning from prior years.

"It seems like just when you get used to somebody, they leave, and then you have to change partners," Kathy Arnold, senior in elementary education, said.

A week-long tryout clinic is held each spring where all applicants are taught basic routines and stunts. After the clinic, a panel of judges, including past cheerleaders, representatives from national cheerleading groups and former gymnasts, considers all applicants.

Applicants must have a 2.0 grade point average and plan to be in school for a full semester after tryouts. Furthermore, the cheerleaders are chosen on the basis of dancing ability and yell leaders on gymnastic skills. Both are judged on appearance and double stunts.

"All of the present squad members have to try out again each year," said Merilee McCaustland, sophomore in arts and sciences. "We don't get any breaks by being cheerleaders for one or two years other than knowing most of the routines and stunts."

The cheerleading squad gets many op-

"They bombed me with apples, oranges and ice," he said, "and were yelling obscenities at me. Their own cheerleaders wouldn't even stand down in front of the student section."

Willie said he thinks the worst crowd is the University of Kansas. He said he has been cussed at, had things thrown at him, and people even tried to pick fights with him.

Willie said the best crowd is definitely K-State's.

"The fan's show a lot of appreciation for what Willie does; they're also nice to other mascots." He said that Oklahoma University's fans are nice, too; probably because they don't have a mascot of their own. The band and the cheerleaders are also very helpful in developing enthusiasm for the game, Willie said.

The current Willie graduated and said he will miss doing Willie.

The alternate plans to try out for the main position next year.

"The one thing I really enjoy is getting to meet all the little kids because they get such a kick out of Willie," he said.

He also said it would be fun to be Willie because then he could develop his own personality for Willie.

"When you are the alternate you can't really develop a personality — you have to try to be like 'the' Willie because there's supposedly only one," the alternate said.

The alternate Willie did the women's games to gain experience, and he also did a lot of men's games over Christmas.

"The best thing about being Willie is raising all that enthusiasm just by being Willie and standing in front of the crowd," the alternate Willie said, "It's terrific." **RP**

*Hidden message* — Willie invites a referee to read the eye chart during the K-State — Arizona basketball game in December. K-State won the game 63-55 despite Willie's worry over referees.

# cheer about

opportunities to practice the routines and stunts set aside from programs done at home games. Cheerleader representation is stressed for all away games also.

However, the athletic department's budget does not allow every squad member to attend all away games so members must decide among themselves who will attend which games.

The athletic department does pay for travel expenses, and provides for uniforms and a summer cheerleading camp at Memphis State University in August. There, cheerleading squads from all over the United States share ideas for fight songs, dance steps and pyramids.

These newly learned techniques are shared with area junior and senior high school students at local tryout clinics and at the 10 to 12 benefits the cheerleading squad participates in annually. **RP**

*Showtime* —Practicing 10 hours per week can be a strain, but the payoff is on game night when the routines are performed for the crowd. Cherie Parish, senior in clothing retailing, performs a dance routine at one of the games.

## Diary of a

**N**oon Tuesday, Oct. 20 — The ticket lines have already started already? It's only Tuesday — the tickets don't go on sale until Sunday!

**9 p.m. Tuesday** — Are these people crazy or what? Gathering to stand nearly five days in line for a basketball ticket. This is really nonsense. How can a person get in the line? Does he have to stay there until the actual sale? What are the procedures for basketball ticket sales?

Another fall and another hassle with the basketball ticket lines. What will the system be this year? No one has devised the system of organization for this year's line yet. A few stragglers begin to gather for an "informational meeting" conducted by the group at the head of the line, Marlatt Four.

Nearly five days of waiting left! Night and day and tents and trash and colds and complaints.

"It's silly to make you wait this long," Steve Bender, junior in radio and television, said. "There's got to be a better way."

Hopefully that better way is contained in the new ticket line policies. Meanwhile what can a person do? Complain to Student Senate? The ticket office? The athletic department?

Here are all these people, participants of a system, devised in 1978 as a "positive change" in the procedure of selling season basketball tickets. ♦

photos by Scott Williams

*Is it roll call, yet?* — Looking out of their temporary home, Ed Kerley, sophomore in animal science and industry, and Perry Lutsch, senior in agricultural economics, watch for roll call to assure their spot in line for ticket sales.

*No. 57* — Members of Marlatt Hall conduct one of the many roll calls taken during the campout.

# campout: ticket line frenzy strikes again.

In the good old days of 1976 and 1977 students camped 12 and five days, respectively, at the parking lot of KSU Stadium. At the designated time, the gates were unlocked, and the word "Sooner" adopted a new meaning as the crowd rushed to lay claim on those precious tickets.

Problems of missed classes, cleanliness of the area and certain image problems for the University led to the review of these ticket procedures. The result of the review was the lottery system presently used to sell group reserve tickets, "eliminating the need for camping out," but only for the group reserved. What about the individual ticket purchasers? For them, "camping out will be permitted . . ." Permitted?

A point of clarification: There are three types of season basketball tickets:

(1) Group reserved — A group of up to 20 people are allowed to combine fee cards (one fee card for each ticket desired) and as a group, draw a number in a lottery system at the Athletic Ticket Office. The lottery is open for two days; then tickets are allotted to groups according to the numbers drawn.

(2) Individual reserved — These tickets are obtainable via a line at the north side of Ahearn Fieldhouse. The ticket designates a specific reserved seat for the ticket holder for the duration of the season. The first people in line receive the better seats.

(3) Non-Reserved — This ticket is different from the other two types in that it does

not reserve an individual seat in Ahearn for its holder. While a spot is guaranteed, it may be anywhere in the designated non-reserved sections. Therefore, those who have these tickets must arrive early to have choice seating in these sections.

**10 p.m.** — Sniff, sniff. Suddenly the smell of trouble fills the air. The Front Row Fanatics, a group whose goal at every game is to sit on the front row, begin to air their views against the line policies of Marlatt Four to the crowd.

"Fanatics do this every year," Chris Wagers, junior in business, said.

The "Fanatics" aren't alone in their unhappiness with the system.

"I feel like Student Senate should make set rules," Paul Cowan, senior in graphic design, said. "Maybe they could establish some way to take applications rather than a first-come, first-served basis to avoid the needless overnight staying. It interferes with classes and studies."

**Midnight** — The battle rages, the battle ground gets messier, the air full of chaos, seems to hold zero percent visibility for most of the tired fans. Finally things are being talked out and a "treaty" is reached for now. Let's just go to bed.

**9 a.m. October 21** — Student Government Offices. The Fanatics are in, bright and early, to complain to Student Government.

"This happens every year," Jenny John-

ston, secretary for Student Government, said. Will Student Senate make a set plan after this year? "They need to," she says.

"That is the solution in the long term," Dodds said. "To set up a permanent group with permanent procedures. Next year I foresee Student Government taking it over."

**4 p.m.** — Dodd's office is filled with Student Senators and they review last night's problems. The group comes up with a plan to submit to Marlatt Four and Fisher, who is present. Confusion is clarified (thank God). Meeting adjourned.

**Wednesday night** — No problems except the weather.

**Thursday, Friday, Saturday, Sunday** — Smooth sailing. But this camping is a pain. Look at all of the tents — 61 of them, count 61 — just for one line. Obviously something needs to come of this, all the troubles. Something needs to be done.

"This is one of the things to be voted on by this year's Senate," Dodds said. "So that next year, when ticket buying season rolls around we will have a set policy."

Another year goes by and the ticket situation is the same, a week's wait for a ticket to see the Wildcats play. "The stupid part of this whole situation," Collin Hulse, senior in milling science and management, said, "is that there were still tickets left over on Sunday after the line was finished." **RP** by Jerry Howard

**Refreshments** — Tom Troilo, senior in fisheries and wildlife biology and Craig Alexander, junior in construction science, camped in one of 90 tents.

**Under cover** — Lance Tittle, freshman in elementary education, waits for the final roll call while Vince Kalbach, junior in mechanical engineering, rests under his blanket.

# Recruits

Jim Eads looks for two things when he recruits a basketball player for K-State.

"He must be a good shooter and have good quickness," Eads, an assistant coach and recruiter for Jack Hartman's club, said.

Meeting the above requirements are Lafayette Watkins, Kenny Williams, Greg Livingston and Eddie Elder. The four were freshman recruits on basketball scholarships this past season.

Watkins averaged 24 points per game at Julian Percy High School in Chicago. He also fired in an impressive 54 percent of his shots. In six junior varsity games, he averaged 17 points per game.

Watkin's varsity play has shown considerable improvement on a daily basis.

"He's a winner," Eads said of Watkins. "He's competitive, has a lot of desire and wants to improve." Watkins chose K-State over the likes of powerhouses DePaul and Ohio.

Williams displays excellent quickness and connects on jumpers from long range. He is a graduate of St. Joseph's High School in Chicago where he hit for an 18-points-per-game average. Before being promoted to the varsity level, Williams scored 12.5 points per contest in six JV games, second only to Watkins. ♦

# bring up the slack for varsity

"Kenny is an outstanding individual. He's an outstanding competitor and has good basketball skills," Eads commented. Williams served as a reserve guard on varsity.

The only in-state recruit, Livingston, is no stranger to K-State basketball. "We watched him grow from a seventh grader in junior high, to a high school player," Eads explained. The Coffeyville native had attended seven of Jack Hartman's basketball camps prior to his signing.

"He's a good shooter and an aggressive player," Eads said. Livingston's quickness is evidenced by the fact that he led the JV team in steals with 18, over an eight-game span. He stepped into a backup position at guard for varsity.

Elder, the runner-up for Oklahoma's player-of-the-year award in the 1980-1981 season, was a standout at Tulsa's Cascia Hall High School.

He pumped in 22 points per contest, hitting on 56 percent of his attempts. Also, he hauled in 13 caroms per game. "He's quick for a player of his height," Eads said. The 6'8", 192-pounder works on weights to build his slender body. Elder saw limited action on the varsity.

*Reach for the sky* — Freshman Neil Degner attempts to block a shot by an Iowa State player. Degner saw limited varsity action and figures to be a prominent player for K-State.

Neal Degner and Parker Laketa, also recruits on basketball scholarships, are not fleet of foot, but make up for their lack of quickness in other areas. "Neal Degner has intelligence for the game. He's very competitive, has great hands and with maturity, he'll be a very solid player," Eads said. Degner has been used as a backup forward on the varsity, seeing a considerable amount of action.

Laketa didn't dress out for a single game the past season because of surgery to his right knee. He does have outstanding credentials. Laketa is a deadly outside shooter, averaging 22 points per game at Homewood-Floormoor High School in suburban Chicago. The 6'7" freshman weighs around 220 pounds and is an aggressive player.

"His future will depend on his knee," Eads said of Laketa.

Eads notes that a lot has been written about the freshman recruits as being one of the best crops ever at K-State. "On paper, this year's freshmen are potentially outstanding," Eads said.

In addition to the freshmen recruits, K-State also picked up senior Chris Rorabaugh, an outstanding leaper. Rorabaugh is a transfer student from Marymount College in Salina. He saw action at the varsity level as a backup forward.

"The players we signed were on our re-

cruiting lists from the beginning," Eads said. "Our priority was to get five or six good players that could adjust to K-State, socially and academically."

In explaining his process of recruiting, Eads said, "It's very important that we try to keep in an area that is in our TV-news-paper range, so we can keep up-to-date reports on a player's progress." Eads listed Kansas, Illinois, Missouri, Oklahoma and Nebraska as K-State's primary recruiting area.

"We're looking for a player that can perform efficiently in a team concept," Eads explained. "We try not to bring a player on top of another player." Eads further explained his statement, "In order to avoid having too many players at the same position, we space players who play the same position a couple of years apart so that our team will have depth and more players will have the opportunity to play."

If recruits produce for K-State like they did for their high school alma maters, basketball in Wildcat land will have a rosy future. **RP** by Mack McClure

*Double coverage* — Senior transfer Chris Rorabaugh is closely guarded as he attempts to pass the ball. Rorabaugh used his last year of eligibility at K-State after playing at Marymount College.

## Talk about a road game

# カンサス州立大学 日本へ遠征

K-State basketball had an added worldwide flavor in July as the team traveled abroad for the first time to participate in the 1981 Kirin World Basketball series in Japan.

The Wildcats were champions of the double round-robin type tournament as they were unbeaten against the national teams of China, Czechoslovakia and host, Japan.

The 14-day, all-expense paid trip was sponsored by the Japan Amateur Basketball Association (JABBA). The Wildcats' performance on and off the court and Jack Hartman's reputation were major reasons K-State was selected for the tournament.

JABBA representative Gumi Kikuchi said, "We are quite impressed with the Kansas State program, and not only for the player's basketball skills, they give the appearance of outstanding young leaders. Plus, we were interested in inviting a team that utilizes all five players . . . the total team, or complete game concept.

"We believe the Japanese can learn a great deal from Kansas State basketball. Coach Hartman, of course — just the mention of his name and you don't need to explain anymore."

K-State's entourage was made up of 24 persons, including players from the team that made the final eight of the 1981 NCAA tournament and six cheerleaders from the squad that finished second in nationals.

However, special arrangements had to be made in order that one player could go. Since Rolando Blackman had already been drafted by pro-basketball's Dallas Mavericks, K-State had to pay a premium on an insurance policy that would insure both Blackman and the Mavericks against any loss of services from an injury that might have been sustained on the trip.

Blackman proved his worth in the Cats opening game, an 87-68 victory over Japan in Nobeoka. He scored 24 points and was named player of the game as the team struggled some to adjust to the open style

of International rules.

In game two, K-State faced the Czechs in Nagoya and won 88-70. Game three saw the team-oriented Cats put seven men in double figures in a 114-80 rout of China at Okayama City. The Wildcats only real test

---

**"We believe the Japanese can learn a great deal from Kansas State basketball. Coach Hartman, of course, just the mention of his name and you don't need to explain anymore."**

---

came in game four at Matsue as they pulled out a 79-73 come-from-behind win over Czechoslovakia. In Tokyo, they closed with wins over Japan 99-64 and China 90-66. In the Japan game, Ed Nealy won MVP honors, but Greg Prudhoe had 16 points and 11 rebounds in what assistant coach Lon Kruger called, "the finest game he has ever played."

"There were a lot of players who would do well in American collegiate competition," Blackman said, referring to international opponents. "Overall the level of competition was not as strong as we played here. But the best players on those teams could play with the best players in the Big 8. The Czech team was especially good. They compared favorably with Missouri and Kansas."

Whereas in Ahearn the Cats might play before a packed house of 11,000, in Japan crowds were no more than 4,000 but the size of the audience wasn't the only difference according to Tim Jankovich.

"What amazed me with their fans was that they would mob us after each game, whereas here they would just clap for us. They would come up to us and touch us and shake our hands or get our auto-

graphs."

Basketball, however, wasn't the only interesting part of the trip for the team.

When traveling from Nagoya to Kyoto, the team rode on one of Japan's "bullet trains" that reach speeds of 120 m.p.h. Also, one night they used chopsticks when eating dinner with the Chinese team. Of course, they had samples of the Japanese cuisine. "We've tried about everything," said Dodds, "Some of the stuff we wouldn't have even known what it was, but we enjoyed it all."

Having played their games in five different cities gave the team a chance to meet a lot of people and do some sightseeing.

"Just being able to go over and see another country was the great part of the trip for me," center Greg Prudhoe said "I couldn't believe how crime free it was over there. They just leave their bikes unlocked and all of the shops' doors wide open. The police don't even carry guns."

Guard Tim Jankovich said, "The thing I liked best were the people. We were given first-class treatment by the Japanese. We got to stay in their best hotels and were able to see some great sights, such as the ancient shrines in Kyoto. The downtown area in Tokyo seemed like a giant Aggieville every night. It didn't seem like the city ever closed down. There were just mass amounts of people in the city at all times of the day."

Dodds said, "The Japanese people were wonderful to us, everywhere we went. And we were very, very impressed by the country. You don't see a dirty car. You don't even see a car with a dent in it. The U.S. could take some lessons from the Japanese."

"They're still behind the American game. But it was a great experience for the kids. I told them how proud I was. They were great ambassadors on the court and off the court. They set a good example for all of us," Dodds said.  by Tony Blake

Rolando Blackman's absence from the roster had many fans wondering what K-State men's basketball would do against the Minnesota's and Missouri's. They counted on the experience of seniors Ed Nealy, Randy Reed, Tim Jankovich and Tyrone Adams to pick up the void, along with juniors Les Craft and Ed Galvao. There was plenty of speculation about what role the "super-crop" of freshman would play in the season.

The answers came in an up and down — mainly up — season that saw the Wildcats end up 10-4 in the Big 8.

In the opening game the Wildcats trounced Northern Iowa 86-50 at Ahearn

Fieldhouse.

Nealy and Adams led the Wildcats in the assault with Nealy scoring his career high of 28 points and Adams led the Cats with seven steals.

K-State moved on to play South Dakota beating them 91-44. Hartman played 14 players with only two of them not scoring. Reed led K-State with 28 points.

In the game against Auburn-Montgomery, K-State improved its record with a 83-46 victory. In the second half, K-State shot 80 percent from the field, a new Big 8 record.

On the first road game of the season, K-State lost to Illinois 55-49. Illinois guard

Craig Tucker was high scorer with 14 points and Ed Nealy was high scorer for the Cats with 17 points. Thirteen turnovers cost the Wildcats the game.

Back at Ahearn the Cats were on a roll again, beating Arizona 63-55. Center Les Craft was high scorer for the game with 17 points. Chris Rorabaugh added to K-State's victory with a solid rebounding performance.

Game six of the season had K-State whipping Wisconsin-Parkside 83-63. Nealy had a 23-point night and the Wildcats shot 69.9 percent from the field.

In the second away game K-State fell to the hands of the Indiana Hoosiers, 58-49.

# Cats, 20 plus again

Hurriyet Aydogan

K-State's 20 turnovers were a major factor in the game, including a string of five in a row. K-State only had two players in double figures — Reed with 16 and Adams with 15.

Eighth-ranked Minnesota visited Ahearn and was handed a 62-52 loss against the Cats. Nealy scored 22 points and claimed 10 rebounds. Reed added 21 points in 35 minutes of playing time. K-State held Minnesota's Randy Breuer to only eight shots.

Freshman Lafayette Watkins scored 12 points in a mismatch against Southern Illinois. K-State won the game 82-53. Adams topped the scoring with 17. Adams also had eight assists and five steals in 33 minutes of action.

Nevada-Las Vegas came to K-State ready to battle the Wildcats but lost 82-65. K-State shot 63 percent from the field. Top scorers were Nealy with 20, Adams with 20 and Reed with 19.

K-State next battled Marquette and won 70-65.

"That was the best ballgame I've seen all year," Marquette's Hank Raymond, said.

The Warriors did not commit a turnover during the second half, but K-State still overpowered Marquette. Nealy and Adams were high scorers with 18 points and Reed followed with 14.

In the last game before the Big 8 season, K-State beat Western Illinois 67-57. The Cats led by five at the half. Reed was the leading scorer with 20 points. **[RP]**

**Overpowered** — Forward Tyrone Adams dribbles past a Marquette player. K-State won the game 70-65.

*Cats vs. Cats* — Freshmen Kenny Williams and Lafayette Watkins fight for the ball against Ed Galvao during the annual purple and white scrimmage. Purple won the scrimmage.

*Airborne* — Fighting for the rebound, Les Craft keeps the ball from the Nebraska player.

## Cats second in Big 8

A career high 25 points from Tyrone Adams shot the Cats past Iowa State 75-55 in the Big 8 opener in Ahearn Fieldhouse. The Cyclones never held the lead. K-State jumped out in front with a three point play by Tyrone Adams just after the tipoff.

"Tyrone had a heckuva game," Hartman said. "He's playing within himself, doing things he can do. That doesn't necessarily mean points, but everything."

The effort was more than enough from the Cats as the Cyclones were behind by as much as 19 points in the first half. Ed Nealy pulled down 15 rebounds for the game high.

Randy Reed took the spotlight in the Cat's game against Colorado with a career-high 32 points in the 78-68 win in Boulder. Reed was 14 of 15 from the field for the night. With K-State leading 7-6 in the first half, the Cats hit 10 straight shots over seven minutes to take a 27-17 lead. Reed hit 8 of the 10. When Colorado drew within two points, 53-51, in the second half Reed scored 13 of K-State's next 15 points to hold back the Buffaloes. K-State shot 67.3 percent from the field, compared to Colorado's 37 percent. Tyrone Adams had 20 points, followed by Nealy with 10. Nealy had the team-high rebounding with 11. The Cats had been ranked 20th going into the game. ▀

*Keep away* — Two Kansas players guard Tim Jankovich as he passes the ball

*Nabbing it* — Fighting for the rebound, Ed Nealy gets the ball during the game against Western Illinois.

Rob Clark

Rob Clark

## Second in Big 8

The first real test of the regular season came in a 47-42 victory over **Oklahoma**. Oklahoma lead by as much as five in the first half before the Cats regrouped and went into the half with a 34-31 lead. The Sooners worked back to within two points at 7:59 to go when a technical foul stalled their drive and the Cats sat on the ball until less than a minute in the game.

K-State did not wait until the final minutes to seal its next victory. The Cats won 70-53 over the **University of Kansas** in Ahearn Fieldhouse. Kansas maintained full-court pressure throughout the game but couldn't seem to rattle the Cats. Tyrone Adams lead the scoring for K-State with 17 points and eight assists. Nealy grabbed 10 rebounds.

The taste of victory was short-lived, for the Cats were upset in the next contest. **Oklahoma State** burned the 14th ranked Wildcats 56-53 in Stillwater. The Cats lead for most of a tightly-battled first half. The Cowboys went into halftime with a two point lead and never gave it up. The Cowboys survived a late run by the Cats to win.

Against **Missouri** the chance to knock off the number one ranked team in the nation slipped by the Cats. Losing 59-58 on national television, the Cats were unable to contain John Sundvold's 70 percent shooting during crucial periods of play. K-State also managed to put four of its starters in foul trouble in the first half. Although the fouls were a factor, Randy Reed said Missouri deserved its ranking.

K-State went back on the winning track, beating **Nebraska** 75-64 in Lincoln. Randy Reed scored K-State's first 12 points and ended up with 25 for the night. The Cats shot 75 percent from the field, just short of a Big 8 record. Tim Jankovich lead the rebounding with seven.

Tyrone Adams helped hold off an upset by **Colorado** by pumping in 20 points in the 65-58 victory. Colorado's tightly packed zone defense forced the Cats to shoot from the outside. K-State went cold 12 minutes into the second half and the Buffs pulled within four points. The Cats bounced back with two assists from Lafayette Watkins to regain control of the game. Nealy pulled down 16 rebounds during the game.

A fast paced running attack by the **Oklahoma Sooners** stunned the Wildcats 68-58 in Norman. Twenty points from Chuck Barnett and 20 from David Little of Oklahoma dropped K-State to 6-3 in the Big 8. "We didn't lose the game as much as Oklahoma just won it," Jack Hartman said. K-State never went to the free throw line and shot only 42 percent from the field during the contest.

The Wildcats were given a scare in the game against **Iowa State** but came away victorious, 58-49. The Cats were down by six with 10 minutes left in the game before popping in eight unanswered points to regain the lead. Hartman credited the turn-around to a change made in the offense to get more movement. Les Craft was high scorer for the Cats with 12.

**Oklahoma** continued its hex on K-State with a 72-62 win in Ahearn. The game put the Wildcats at 7-4 and second in the Big 8. Hartman blamed the offense for the loss, saying it lacked aggressiveness. Adams had 22 points. Les Craft was the only other Wildcat in double figures with 12. The Cowboys took the lead early in the second half for keeps with a three point play.

The Wildcats needed a confidence builder and found one with a solid thrashing of **Kansas**, 63-53. After being tied at 22, K-State grabbed a six point halftime lead. In the second half Kansas was better at collecting fouls than points and never challenged K-State. "We came out in both halves with a lot of enthusiasm but we really played well in the second half," Hartman said.

K-State found revenge against **Missouri** with two Nealy free throws that put the score at 57-56 in Columbia. The shots came

with five seconds left in the game and gave the Cats their first lead of the second half. The victory clinched a home court berth in the first round of the Big 8 tournament. Missouri had already clinched a home court berth. Nealy and Adams paced the Cats with 17 points apiece.

The Wildcats held **Nebraska** to 14 points in the first half and went on to win the final game of the regular season 67-50. Les Craft lead the scoring with 16 points. Hartman benched his five starters for the final five minutes of play, but Nebraska could only pull within twelve at the closest. The game left K-State at 10-4 and in second place of the Big 8. **RP**

## Post-season elusive; BC stops hopes

**I**t was another "almost" season for K-State as they fell to Oklahoma in the Post-season tournament and Boston College in the NCAA tournament.

Heading into the Big 8 Post-season tournament K-State played University of Kansas for the third time during the season at Ahearn Fieldhouse.

K-State won the game, to advance to the semi-finals against Oklahoma.

The game against the Sooners proved to be a disappointment as the 'Cats trailed at halftime and lost 62-68. Tyrone Adams was the top scorer for K-State in the game.

Missouri was the winner of the Big 8 Conference as well as the tournament in the game against Oklahoma.

K-State headed into the NCAA with a 21-7 record.

The Wildcats received a bid for the NCAA tournament and played their opening game against Northern Illinois whose previous record was 16-13. The 'Cats defeated the Huskies 77-68.

The second round of the tournament had

the Wildcats paired with the Arkansas Razorbacks. The Wildcats beat the Razorbacks 65-64. K-State shot 60 percent and Adams was high scorer with 21 points. Nealy and Craft also had an impressive game with scores of 11 and 13.

In the final sixteen teams of the NCAA K-State battled Boston College who had defeated DePaul to earn their place. The 'Cats were ahead at halftime 41-36 but Nealy and Reed were in foul trouble for the second half.

The Golden Eagles came back in the second half to defeat K-State 69-65. The leading scorers were Reed and Adams with 16 points. Nealy lead the team in rebounding with 10. Boston College's top scorers were John Garriss and Michael Adams with 20 points each.

K-State finished with a 23-8 record and ended the K-State basketball careers of Ed Nealy, Tim Jankovich, Randy Reed, Tyrone Adams, Chris Rorabaugh and Greg Prudhoe. **RP** by **Char Heinke**

17 wins in a row

# Attitudes reflect season

Rob Clark

The season was marked by speed, agility and dogged determination, as the 1981-82 Wildcats, led by third-year head coach Lynn Hickey, piled up 26 wins and only six losses. The impressive record peaked with 17 wins in a row dating from Jan. 7 to March 18, and included one of the proudest moments in K-State basketball history, a 76-67 victory over No. 1-seed Old Dominion in the NCAA playoffs.

The Wildcats more than made up for the off season of '80-81, when injuries were the primary factor for a disappointing record.

With the victory over the ranked Old Dominion in the NCAA post tournament, K-State women showed their prowess and power against a top-ranked team. According to Hickey this shattered the myth that Midwest schools have trouble playing top-ranked teams.

The Wildcats, who were without the services of star center Tammie Romstad for most of the '80-81 campaign, were paced by a team full of experienced seniors, which included Romstad.

Romstad, who sat out most of last season due to a third knee operation, was a vital contributor to the team's success this season. In 30 games, the 6'2" senior averaged 16.3 points per game with her highest total being against Oklahoma State. In that match, she popped in a game-high of 30 points in leading the 'Cats to a 71-63 victory.

Not only was she a vital factor in scoring, but she also was the teams' leading rebounder. In 30 games, she pulled down 8.1 rebounds a game with her highest being 15 against Stephen F. Austin University.

Besides Romstad, Hickey also had the services of three other seniors: 5'7" guard Jean Roise, 6'1" forward Shelly Hughes and 6'2" center Dee Weinreis. Roise averaged 7.3 points and 2.5 rebounds per game. Hughes averaged 4.8 points and 4.8 rebounds per game. while Weinreis poured in 3.5 points and 2.3 rebounds a game.

However, due to injuries, the 'Cats were without the services of seniors Kim Price and Jeanne Daniels. Price, who averaged 12 points and 6.1 rebounds per game in

*"Shooting Star"* — Tammie Romstad, senior in physical education, moves in with a close shot in first-half action against the Colorado Buffaloes during the women's Big Eight Tournament. Romstad scored 20 points and 10 rebounds to help lead the 'Cats to the championship over the Buffaloes, 76-71.

Jeff Taylor

Rob Clark

*Coaching* — Coach Lynn Hickey yells directions to her team. Hickey said the Lady Wildcats had more natural talent this year than they had in the past.

*Scrambling* — K-State's Barbara Gilmore, sophomore in psychology, and Minnesota's Marty Dahlen wrestle for possession of the ball during K-State's 77-68 triumph over Minnesota.

*Off-guard* — K-State guard, Betsy Sloan, junior in physical education, slaps at a pass by Wichita State's Kathy Garofalo. The Cats won 69-64.

1980-81, was redshirted this season. Daniels, who has struggled to overcome two knee operations in her career at K-State, played in only nine games this season. In those games, she averaged 4.1 points and 2.2 rebounds per game.

According to Coach Hickey, the 'Cats were optimistic about the season. "We started the season out with the attitude that this was the best team that K-State has had," she said. "And as you can see, our record has proven that."

Along with the experienced seniors, Hickey's team possessed strong depth.

The Wildcats had lost two key 1980-81 players in guards Gayle Williams and Taryn Bachis.

A good recruiting year, however, helped fill the gap with top-notch performers.

Gary, a junior college transfer from Shelby State Community College in Memphis, Tenn., was the leading scorer for the women. Gary, who averaged 24 points per game in her two years for the Salukis, contributed 18.1 points a game while a Wildcat. Not only was the 5'5" junior a scoring machine, but she also demonstrated her jumping ability by snatching 5.1 rebounds per game.

Other players who contributed to the team were guard Betsy Sloan, freshman center Angie Bonner, and sophomore transfers Erin Schreiber and Barbara Gilmore.

"This year we had better natural athletes than we have had in the past," Hickey said. "Our running game was one of the best that we have ever had."

The Cats managed to achieve a number of goals during the season. Probably the biggest one was winning the Big 8 Championship tournament in January. The Wildcats won by defeating Missouri, Nebraska and Colorado. In that tournament, Tammie Romstad and Priscilla Gary were chosen to the all-tournament team. Romstad, was also named as the tournament's Most Valuable Player.

After the tournament, K-State won 17 games in a row. During that surge, the 'Cats defeated Kansas, Wichita State, Minnesota, Creighton and Drake. Of those teams, only Kansas was rated in the polls, during the regular season.

Graduation will take its toll on the 'Cats next season. The Wildcats will lose five seniors: Romstad, Hughes, Roise, Weinreis and Daniels.

At least for one year, though, K-State had a full roster of talent. **RE** by Tracy Allen

*Out of reach* — K-State Angie Bonner and Drake's Amy McDermont chase a loose ball. The 'Cats won 82-74.

# Cats go past ODC to final eight

Overall, the Wildcats had an impressive record at the end of the 81-82 season but some of the most exciting moments as well as the most disappointing both occurred in the NCAA tournament.

In the first round of play, the Wildcats defeated Stephen F. Austin by a score of 78-75. They then went on to play the number three-ranked team in the country, Old Dominion. In her 100th appearance as coach of the Lady Wildcats, Lynn Hickey said she felt the 76-67 victory over Old Dominion was the biggest win for K-State in the women's basketball history.

Though Old Dominion had the height advantage, K-State held the Lady Monarchs to 12 points below their season average and out rebounded them.

The pressure was also put on the Lady Monarchs defensively. Foul trouble hurt Old Dominion and the 'Cats took advantage of it scoring 30 times in the 34 free-throw chances they received.

According to Hickey, speed was a big determinant in the victory. All totaled, the Monarchs were whistled for 25 fouls while K-State committed only 15. In the first half the Monarchs were

winning 31-28, but midway through the second half the 'Cats went to work scoring eight unanswered points, bringing the score to a 36-31 advantage.

The ultimate 76-67 upset of no. 1 seed Old Dominion was aided by veteran Romstad's 15 points and Priscilla Gary's 18 points. Angie Bonner, a freshman, also came off the bench to score 11 points.

The 'Cats then advanced to play no. 2 ranked Cheyney State but the Wolves outscored the 'Cats by 20 points to end their season. The Wolves shot 54 percent from the floor as compared with 45 percent for the 'Cats. Though Hickey was disappointed with the loss, she said she was pleased that the Wildcats finished in the top eight in the country.

In the game against Cheyney, K-State was led by Priscilla Gary and Angie Bonner with 22 points apiece. Also in double figures were Barbara Gilmore with 12 and Tammie Romstad with 11. **RE** by Sharon Riley.

# Track Teams get new coach, format

Can one man coach 33 percent of K-State's varsity sports without going crazy? The verdict isn't in but Steve Miller is going to find out.

Miller is K-State's new head coach for men's and women's cross country, indoor and outdoor track. The six teams account for one-third of K-State's varsity sports and involve 120 students.

Miller doesn't do it all himself. He has two assistants, Barry Anderson and Greg Kraft, along with help from three graduate students.

Having all six teams under one coach is new to K-State. The system improves the women's programs by giving them the same professional coaching received by the men, Miller said. And it seems to bring out the best in both teams when they practice together.

After coaching in Chicago, Europe, and Africa — where facilities were practically nonexistent — Miller went to California Polytechnic State University in San Luis

Obispo.

In his five years as head coach, Miller's teams won five national championships, three in track and field and two in cross country. He was named National Collegiate Coach of the Year six times, three times in each sport.

When the position at K-State was offered, Miller didn't want to come to Kansas. He thought the best thing to come out of Kansas was the "Wizard of Oz," Miller said. His attitude changed after arriving.

Kansas, from Manhattan on west, is "one of the more beautiful places in the country," Miller said.

He said K-Staters sometimes have the attitude of being second class citizens because positive aspects of sports and academics do not always take priority over negative aspects.

Miller's own track program is an example of the way he looks at the positive side of things. In the spring of 1981, the track program was under scrutiny for allegations

that athletes were allowed unauthorized use of Athletic Department telephone credit cards. Because of the previous problems, Miller believes the athletes have a genuine hunger for guidance and good coaching. The response to a new coach is even better because of this, Miller said.

Miller wants to avoid the "would've, could've and should've" and concentrate on what the teams can do in the future.

Track is a pure and measurable sport, Miller said. Because competition is on an individual basis, the athlete always knows when he or she is improving.

"As long as you're improving you are in fact successful," Miller said. "We don't challenge ourselves often enough, and it's my responsibility and the organization's responsibility to provide an environment that challenges the athlete to his fullest."

*Rounding the corner* — Deb Pihl sets the pace during the mile run at a dual meet in Lincoln, Neb. Pihl won the race with a personal best of 4:51.00. She also won the 880-yard run in 2:13.43.

The outdoor season was a disappointment as the men's track team finished in seventh place at the Big 8 Outdoor Championship while the women finished in fifth place.

According to women's coach and assistant men's coach Barry Anderson, the Wildcats were faced with injuries to key performers such as triple jumper Vince Parrette.

The men, who had finished third in the Big 8 indoor meet, were paced by All-American Doug Lytle, Parrette and shot putter Ray Bradley.

Lytle, from Merriam, was considered one of the top pole vaulters in the country. As a freshman Lytle set an Ahearn Fieldhouse record in the pole vault by vaulting 16 feet, 8½ inches in the K-State Quadrangular Meet. He also set a Big 8 record and school record in the Big 8 Indoor Championships in Lincoln by jumping 17-feet, 4¾ inches. With this jump, Lytle qualified for the NCAA meet in Detroit where he placed fifth in the pole vault with a jump of 17-feet.

Triple jumper Vince Parrette also had a good season. The senior from Overland Park finished first in the triple jump three times out of eight meets. The most exciting finish was in the TFA/USA Classic in Kansas City. His jump of 53-feet, 4-inches was good enough to qualify him for the NCAA meet. However, in National competition, Parrette finished in sixth place with a jump of 52-feet, 7¾-inches.

Shot putter Ray Bradley, who also participated in the NCAA meet, set an Ahearn Fieldhouse record by throwing the shot 62-feet 2¼ inches in the K-State Quadrangular. Bradley also established a school record in the shot at the Big 8 Indoor Meet with a toss of 65-feet, ½-inch.

The Kansas Dual Meet highlighted the season. The Cats had six first place finishes in the meet. They were Bradley, in the shot put (61-0), Steve Wright in the 300-meter dash (30.92), Dan Schleicher in the 2-mile run (9:08.63), Lytle in the pole vault (16-8), Parrette in the triple jump (51-7) and the mile relay team (3:22.25).

The Cats were not as fortunate in the outdoor season. The Big 8 Championships in Ames, Iowa, saw the Wildcats finish in

seventh place, but there were bright spots in the meet. Joe Bramlage set a Big 8 outdoor record in the javelin with a distance of 264-feet, 5-inches. Parrette, who had been out for a month due to injury finished second in the triple jump with a jump of 52-feet, 2¼ inches.

The season also had some bright spots. Probably the biggest highlight for the men was at the Drake Relays. Bramlage won the triple crown in the javelin with a toss of 232-feet, 3-inches. The triple crown includes the Texas, Kansas and Drake relay circuit. It was the first time since 1969 that a K-Stater had won the javelin at the relays and also the first time in 21 years that someone had won a triple crown.

K-State also had an impressive showing at the KSU Triangular where the Wildcats finished in first place with a total of 80 points, six points more than the second-place finisher, the University of Kansas. Doug Lytle set a school record and a track record in the pole vault with a jump of 17-feet, 5-inches. Other first place finishers were Bradley in the shot, Schleicher in the 5,000 meter run, Mark Smith in the triple jump and Brian Howie in the 110-meter high hurdles.

The women Wildcats finished fifth in both the indoor and outdoor Big 8 meets.

According to Coach Anderson, the Cats were faced with the situation of an average recruiting year. "Due to money, we were only able to give out 10 scholarships where as other schools were able to give out 20," he said.

While lacking in numbers, the Wildcats did manage to recruit Kim Hagggar. Hagggar, a freshman from Chigwell, Essex, lead the Wildcats in the pentathlon. The athletes points are then totaled for these events and that is his score. The individual with the most points is declared the winner.

In the Big 8 Indoor Championships, Hagggar, not only set a school record of 3,776 points but she also qualified for the national AIAW Championships in Pocatello, Idaho. In that meet, she placed sixth with a score of 3,786 points.

The Wildcats were also fortunate to have sprinter Wanda Trent. Trent, a senior who specialized in the 300, 440, and 600 meter runs was a vital factor for the Wild-

In the pack — Rick McKean tries to break away from the pack during an outdoor relay.

## Track Season

cats.

During the indoor season Trent recorded the fastest time in the United States in the 600 with a time of 1 minute-20 seconds at the Big 8 Championships. She also tied the school record in the 300-yard run at the Wichita State Dual with a time of 35.9 seconds and placed third in the 600 meter run at the National Championships.

In the outdoor season, Trent finished first in the 400-meter run at the Arkansas Relays, KSU Invitational, and the Big 8 Championships in Ames.

Other Wildcats who contributed greatly to the team were shot putter Janice

Stuckey, middle distance runners Janel LeValley and Deb Pihl, and high jumper Elizabeth Kolarik.

The women's season was highlighted by the K-State Outdoor Invitational and the K-State — Wichita State Indoor Dual. The Cats won by a margin of 79 and 67 points, respectively.

A new era for both track teams began in the fall with the appointment of Steve Miller as head coach of all track teams. Miller's teams at California Polytechnic State won the NCAA Division II Championship three years in a row. **EP** by Tracy Allen

# English athlete pleased with K-State

Despite being from a foreign country, leaving her husband behind, and returning to school after a four year absence, Kelly Wenlock was happy she enrolled at K-State.

A freshman on the track team, Wenlock came from London, England, where she was one of the top British track and field athletes. Wenlock placed 8th in the 1980 Olympic trials at Crystal Palace.

Wenlock had never heard of K-State until Kim Hagger, sophomore on the track team, told her about it.

"Kim told me how nice everyone was and how good the facilities for track were, so I decided to give some serious thought about attending school at K-State," Wen-

lock said.

Hagger contacted track coach Barry Anderson about Wenlock.

"I knew that Kelly would improve if she came to K-State and received the excellent training that America has to offer," Hagger said.

Anderson asked Wenlock to come to K-State as a student-athlete on a track scholarship.

"We needed a combination of a sprinter and long jumper, and we knew that Kelly could help us out," Anderson said.

Wenlock's decision to sign a letter of intent at K-State didn't come easy. Not only would she be leaving her parents and country, but she would also leave her hus-

band, Martin, behind.

"That's the hardest part of all," Wenlock said. "Leaving Martin behind was hard to do. But Martin supported the idea of coming to Kansas," she said.

"Martin said there would probably be only one opportunity like this, and I should take advantage of it."

Wenlock said the most important part of coming to K-State was to bring home a degree, but she added that she had other goals.

"Track is really important to me, and I have personal goals that I have set for myself, goals that I probably couldn't reach if I were in England," Wenlock said.

Wenlock said she couldn't reach her goals in England because of the weak emphasis on track and field there.

"Here in the U.S. they emphasize track and field at the college level, whereas in England they put more on track clubs," she said. "Clubs aren't as organized as college workouts. You practice on your own time."

The move to K-State began to pay off in the fall. Wenlock broke K-State's long jump record with a leap of 19-feet, 6-inches. Wenlock plans to get her degree in public relations and return to England.

"I'd also like to coach a track team in my spare time," she said. "Since only top level coaches in England get paid to coach, most coaches in England are part-time coaches devoting spare time to track."

Wenlock's ultimate goal is to make the British Olympic team.

"I've always wanted to compete in the Olympics. It would please me just to be able to say I represented England in the Games."

Wenlock said her time at K-State will help her in the 1984 Olympic trials.

"There will be a definite advantage for me, because most colleges have indoor facilities. There are no indoor training facilities in England," she said.

Wenlock plans to return to England but said that hospitality at K-State is "extra special."

"At first I felt like a stranger, out of place. But people here are so nice, it's hard not to fit in."

"I'm really glad I came here, the school is nice, the town is attractive. I don't regret leaving home, but as far as I'm concerned England is home, and I'm going back after I'm finished here," Wenlock said. **RP**

by Rodney Brogden

## Vaulter leaps to new heights

Pole vaulter Doug Lytle has done what few other K-State tracksters have been able to do — become a world class performer in his event.

Lytle set the Big 8 indoor record in spring 1981 by soaring 17'5" and was the Big 8 indoor champion.

During his freshman year at K-State, Lytle took fifth in the nation in indoor and third in the nation in outdoor. He was named all Big 8 and is an All-American in both indoor and outdoor.

Steve Miller, K-State track coach, said the Big 8 has three or four men that can vault 18 feet, Lytle is one of them.

Lytle started his pole vaulting career in the seventh grade.

"It looked interesting so I tried it," Lytle said. "I started in my back yard with a solid oak pole. It's a lot different from fiberglass poles I use now. I really didn't know the training aspects but it was still fun. I love to propel my body through the air."

Lytle still vaults because it's fun.

"I enjoy the feeling of jumping a new height. There's no glory, just that personal thrill. It's hard to explain."

Lytle also enjoys pole vaulting because he likes "that self improvement."

"When I first started it was easier because improvement came every day," Lytle said. Now improvement may not come for days or weeks or even years. The higher you go, the harder it is to improve."

Lytle is a self-trained pole vaulter.

Through junior high to his freshman year in college, he taught himself how to pole vault.

"I did everything on my own," said Lytle. "Sure I had help but none in a technical aspect." He added the coach he has now is knowledgeable in the area of pole vaulting.

"My coaches in junior high and high school didn't know much about pole vaulting," Lytle said. "Coach Miller is now giving me the technical training I need."

Lytle added, "I think anyone could do it if they put their mind to it. I just love the sport."

Lytle came to K-State because of his major, construction science. But because of his determination in track he may not continue in that same field, he said.

"I came here for my major, but because track takes up a lot of my time I might have to change it. There's another, or in fact a few reasons why I came here," he said. "I like K-State because it's close to home and people will know me. I have friends here, too."

"I'd like to repeat my past accomplishments and add a few," Lytle said. "I'm going to train harder than I have in the past. You have to have determination."

He also has his sights set high. In the upcoming year Lytle plans to clear the 18 foot mark. His personal goal is 18'5", but he would like to "get near that ever elusive world mark of 19'1-3/4" that all vaulters dream of." **RP** by Pat Redman.

*Miller adds enthusiasm*

## Cross country restructured

There is a new face among both men's and women's cross country teams; Steve Miller, who is now head coach of both squads.

"I came to K-State because it has had a good tradition in cross country," Miller said. "I also felt it was ready to make the administrative and financial commitment necessary."

Miller implemented a weight training program into the team's training. Both squads now also do drills before practice such as bounders, hurdler drills which build on coordination, agility and strength.

"I have made complete changes. There is an entire new system and a new staff. I brought better technical information to the teams and have elevated the intensity getting team members to work harder. The women's program has especially been changed. They now do the same training as the men," Miller said.

"I think this is one of the best things that's happened to K-State track in some time," said assistant coach Barry Anderson. "He's pumped some new life into us. His work habits are demanding, which carries over to the assistant coaches and athletes as well."

"The practices are more structured, Janel LeValley said. "We run on our own in the mornings and have an organized practice every afternoon."

LeValley's personal training program consists of running 85-90 miles per week to build on strength and endurance. As it gets closer to meets, she cuts back on the distance and concentrates on speed, a program typifying most long distance runners.

LeValley is a senior member on the squad. "Since I've been on the team the team has definitely improved, especially in mentality and attitude. They are much more success-oriented and enthusiastic."

"There must be a balance between mental attitude and training," LeValley said, ranking most important things in running. "You can be physically ready, but if you don't have a good mental attitude, you won't be at your top form."

LeValley will return for one more year of eligibility as a result of being red-shirted her sophomore year because of an injury.

The K-State women's squad began their season well with a 2nd place finish at the Wichita Gold Classic. Top placer for the Cats was Cathy Saxon with a time of

18:06.

Three women ran the Nebraska Invitational meet with times under 18:00, but were disqualified for running the course wrong.

"At the end of the race, we took a wrong turn, running only about 100 yards off course," Deb Pihl said.

Saxon, one of the runners running the course wrong, came back to place 2nd at the Iowa State Invitational with a time of 17:56.

The Cats grabbed the top four finishes at the K-State Triangular to place 1st on their home territory. Deb Pihl was the top finisher with a time of 17:32.7.

The year ended for the women at the NCAA Championships at Wichita. Cathy Saxon, K-State's only qualifier, placed 81st.

"The team has a more positive attitude. We've greatly improved," John Holliday, of the men's squad, said. "I run cross country to prepare for both indoor and outdoor track as do all cross country runners on the K-State squads."

The men's team started their season in the middle of the pack and proceeded further with a last place finish on home turf at the K-State Triangular. Two men placed in the top 10 finishers: John Holliday with a 7th place finish and Monty Johnson, 9th.

Three teams failed to appear at the Kansas Invitational.

"I heard the tournament was not big enough that they felt it necessitated them to come," Rick McKean said. "We ran on roads which made things even more unusual."

Rick McKean was the top finisher with an 11th place finish at the NCAA District men's championships in Wichita. No men qualified for the cross country championships.

"Understanding what the new coach was all about was the main goal achieved this year," LeValley said.

"My initial reaction was not a super happy one because of last year's performance" Miller said. "Since I arrived in August, I couldn't redo any recruiting. However, my initial concern that the season would be mediocre and my low expectations turned to pleasure. I'm quite happy with our season," Miller said. **ED by Susan Somora**

*Best since 1976*

# Pitching helps set record

The 1981 season proved to be productive for the baseball team. They chalked up a 34-21 record. It was the best record since 1976. The team went eight and 12 in Big 8 competition. The record improved over last year's record of 15-29. Baseball coach Dave Baker attributes the improvement to several things.

"Our pitching improved 100 percent and we have a new pitching coach, Bill Hickey," Baker said. Another important element in the success of the team was the lack of injuries. "We were very fortunate that we did not have any serious injuries,"

Baker said.

"All of our players did a fine job," Baker said. "Louie Trujillo and Antonio Triplett had a lot to do with our success. Mike Johnson and Glynn Perry both had a good season. Joe Goedert made honorable mention in the Big 8."

The outlook for the team looks good according to Baker.

"The team will be better than last year," he said. Baker believes the baseball program is on the right track although lack of money for the program has slowed the rate of improvement. **RP** by Michael Meysing

# Most wins ever for women softballers

A longer playing season and an improved team helped set a new record for most games won in a season.

Charlotte Michal, in her first and last year of coaching Wildcat softball, led the team to a record of 22 wins and 27 losses. Michal resigned in November to go into private business.

Ralph Currie was named to replace her.

The spring season started out slowly with the Wildcats suffering four losses at the Sooner Invitational in Norman, Okla. Although pitcher Janel Anderson pitched a four-hitter against Texas A&M, a run in the fifth inning won it for A&M, 1-0.

The Cats improved their record at the Emporia State Invitational. The team placed second in the tournament. They lost their first game to Benedictine but then went all the way through the loser's bracket, to play for first, but lost to champion Creighton team.

The Cats next split doubleheaders with Wichita State University and Cloud County Community College. Poor fielding by both CCC and K-State were the cause of both team's losses. Coach Michal recognized the Cats' mistakes.

"We did pretty well. (However) we would have won both games if we hadn't made those errors in the seventh inning of the first game. It was as simple as that."

The Southwest Missouri State Invitational proved to be tough for the Cats. They lost four and won one in the 17-team tournament of mostly Division II schools.

K-State then won both ends of a doubleheader with Missouri Western. In the first game Lisa Packard hit an in-the-park home run with pinch runner Gail Seiler on first

base in the seventh inning to win 3-2.

The Wildcats easily won the second game 7-0. Coach Michal was pleased with the performance.

"Things are beginning to click for us. The girls are learning more about each other and feeling better about things too," she said.

The Wildcat softball team went on to place second in the Washburn Tournament by winning three out of four games, losing only to the tournament champs Southwest Baptist College, 5-1.

Sweeping their next doubleheader against Washburn gave the Cats a 16-13 record, tying the school record for most wins in a season set in 1976 — the year when women's varsity softball started at K-State.

Nebraska then denied the Cats 6-2, and then 2-1 in a ten inning game.

The record finally fell with a 6-3 win over Washburn in the first game of a doubleheader. The Cats completed the sweep with a 20-0 thrashing of the Ichabods in the second game.

Errors in the tenth inning of the first game against Emporia gave ESU a 1-0 win over the Wildcats. Janel Anderson hit Emporia's Laurie Hill with a pitch with bases loaded, forcing in a run. Emporia also won the second game 12-1.

K-State was eliminated in the first two rounds of the Big 8 Championships at Stillwater, Okla., losing by one to both Iowa State and Missouri.

"The girls really played well," Michal said. "I think they were at their top potential playing but we just got some bad breaks. We played a very even game against Iowa State. They just got one of those hits that you can't do anything about."

K-State split a doubleheader with Cloud County Community College and took two easy wins from Wichita State to put its record at 21-20 to stay above the .500 mark.

However, the Cats slumped in the last part of the season, losing seven more and winning only one to bring their final record to 22-27.

Ralph Currie was named as the new head coach. Currie began his career as a player in 1939 and coached and played softball for the last 43 years. **RE** by Susan Arnoldy

# Spikers place third

The volleyball squad ended the season with a 16-23-1 record and placed third in the Big 8 Championships. Head coach Scott Nelson, in his second year of coaching, was disappointed with the team record but was pleased with the progress of K-State volleyball.

"The program goals are to become a regionally powerful team," Coach Nelson said. The team had a losing record but twelve of its losses were to teams ranked in the Top 20.

Individual Honors were earned by certain team members. These honors were tournament as well as K-State awards.

Jenny Koehn was K-State's Most Valuable Player, Best Senior and Best Forearm Passer. "Jenny is very positive toward the program," Nelson said about the All-Tournament player at the Texas Longhorn Classic. Many of the Top 20 teams were invited to the tournament.

Sharon Ridley was named Most Improved Player and K-State's Best Attacker.

Senior Susan Drews, who had an injured ankle late in the year, had an excellent

season despite the injury. She played well in the Big 8 Tournament, according to Nelson, and was named Co-Best Blocker. She shared the honor with Carla Diemer.

"Carla is coming around and has good court concentration," Nelson said.

K-State's Rita Harrington was named unanimous All-Tournament at the Big 8 Championships and K-State's Best Defensive Player. She setted every minute of every game for K-State.

"All of our players improved skill-wise," Nelson said, "but now we need to work on the team concepts."

Volleyball is one of K-State's largest women-participant sports. They hold tryouts and recruit throughout the year. They qualified for Division I and have a recruiting budget.

Nelson is the first full-time coach for the volleyball squad. The addition of an assistant coach came with the hiring of Bill Fritsch. Fritsch coordinates the training and conditioning for the team. **RP** by Char Heinke

*Without University support*

## K-State soccer surprises the Big 8

A sport with one of the best records at K-State didn't receive a dime of support from the athletic department or Student Senate. The men's soccer team compiled a 20-8-3 record.

"We have an impressive record; especially when you consider that we aren't varsity," Reid Nelson, player-coach, said.

Along with other minor sports clubs, the soccer team was turned down by Student Senate for funding through student fees.

"It's a shame we aren't formally recognized," Nelson said. "It's not so much the money that we need; it's the recognition."

Aside from the University of Nebraska team, K-State soccer is the only Big 8 team not funded by their school. Despite the lack of funds, K-State ranked second in Big 8 play.

Part of the team's expenses are covered by Budweiser, but players must cover travel expenses. Costs amount to around \$40 per tournament to pay for gas, lodging food, and beer, according to Nelson.

The roster included thirty players, mostly with Kansas City backgrounds. There are several players from St. Louis and a

few from foreign countries. The team also boasts the Big 8 leading scorer, Kurt Krusin, and the Big 8 Most Valuable Player, Akrum Al-Ani, the team's goal keeper.

Nelson said the team was a close-knit group. "I guess the thing that unifies this team is our love for the game. We go out to win games, but we sure have a good time doing it."

Soccer games last for an hour and one half, including the half time. Play is continuous and fatigue leads to many of the injuries that occur, according to Nelson. The most common injuries are ankle and knee sprains.

The spring semester season consists mainly of tournaments while the fall season is made up of more single game schedules. The team upset number one ranked Missouri in the spring 1981 Big 8 tournament.

"I don't think they were expecting us to play so well," Nelson said. "We really surprised them."

One tournament that does occur in the fall is the Ed Chartrand Memorial Tournament at K-State. Dedicated to the memory

of a former K-State soccer player, the tournament was won by K-State making the team two-time champions of the event.

Much of the fun in soccer takes place after the games. "It's really nice for the two teams to get to know each other over a beer," said Nelson, adding, "Sometimes we bring a video tape of the game and joke about the errors we made."

As with most K-State sports, K-State soccer's big rival is the University of Kansas. They beat K-State two of the three matches last semester. "We usually alternate winning semesters," Nelson said. "I have a feeling we'll get the better of them this semester."

Although the rivalry is intense, the two teams have a friendly disposition towards one another. "On the field we'll do anything to win, but off the field we get along really well," Nelson said. "After all, Peter, my brother, coaches the KU team." **REP** by Reid Nelson and Anton Arnoldy.

*Stop that ball* — Akram Al-Ani, freshman in engineering, leaps to stop the ball during a soccer club practice.

# Interest in women's soccer increases

The Women's Soccer Club has been in existence for two years and acted like it intends to stay. The club finished with a 3-2 record in the spring and in the fall season, it finished 4-4.

"There is a growing interest," said Vivian Bliss, head coach of the team.

"There are more women coming out each semester and we are always recruiting," Bliss said.

The women's team is sponsored by Busch. The money Busch donates is used to pay tournament fees, referees, buy uniforms and warmups and soccer balls, according to Bliss.

"It would be very difficult to have a women's soccer team if it were not for Busch," Bliss said.

One of the team's major concerns, according to Jan Rutter, assistant coach, is in letting the students know that K-State has a women's soccer team.

"I think once people find out about us, we will get more support from the students," Rutter said.

"I feel we deserve more recognition since we represent the University," Rutter said.

The women's team plays both semesters, according to Bliss, with the fall semes-

ter being the busiest of the two.

"We try to work out a schedule," Rutter said, "with the men's schedule in mind. This way we can cut down on travel expenses and both teams can support each other."

The women's team traveled to Topeka, Wichita, Lawrence and Kansas City, according to Rutter.

Four teams in the Big 8 have women's soccer teams. They are University of Kansas, University of Missouri, Oklahoma State University and K-State.

"I think that the other Big 8 schools will start teams but the thing holding them back is the money situation," Rutter said. "I think there are enough women interested in playing the game."

"Playing soccer," Bliss said, "is a good way to go out and exercise and stay in shape."

"Anyone is welcome to come out and play," Rutter said, "if the person wants to put the effort into learning how to play."

"The hardest thing is probably learning the rules," she added.

Practice for the women was held Monday through Thursday throughout most of the year, Rutter said.

"Playing soccer is a chance to socialize and meet new people," Bliss concluded. **RP** by Joe Sassenick

*Surrounded* — Judy Bogusch, junior in fisheries and wildlife biology, is surrounded by three University of Kansas players in Memorial Stadium. K-State lost 5-2.

ble 3rd place finish for the spring 1982 season. But the team lost two of its best players for academic reasons. Steve Snodgrass was coach of both the men's and women's tennis team.

"We were looking to improve our record from 8th to 3rd, but it could be a long season," Snodgrass said, "However, the team is competitive and we are not giving the season up."

The fall season included an impressive 15-2 record by Tim Downey. The sophomore from Saddleback Community College in San Clemente, Calif., had wins over Southwest Baptist, the University of Kansas, Nebraska and Iowa State. Downey encouraged his former doubles partner, Blaine Patton, to come to K-State. Patton was to play for K-State during the 1982 season, but grade transfer problems made him ineligible. Downey later was declared ineligible for the 1982 season because of grades.

That left the men's team with only five players. Snodgrass was forced to recruit two additional players from the intramural tennis program.

Mark Westfall, Steve Webb and Gary Hassenflu planned to return for the 1982 season.

Mark Westfall, who is recovering from a 1978 accident in which he broke both legs, progressed considerably.

"Mark is by no means 100 percent, but he compensates in other areas to improve his game, including key volleying," Snodgrass said. He finished 5-3 in the fall season with wins over Southwest Baptist, and 2nd in the K-State Invitational and at the University of Kansas.

Steve Webb had wins over Southwest Baptist and KU.

The women's tennis team also finished

8th in the 1980-81 spring season. Coach Snodgrass inherited the women's coaching position and started the spring season with Brenda Bennett, junior from Sterling, and Tamie Peugh, freshman from Dodge City, as the top players.

Tamie Peugh held the No. 1 position during the spring and fall seasons. Peugh finished the fall season with wins over Stephens, Oklahoma City and Iowa State. Christel Felder, from California, joined K-State tennis in the fall season. From Saddleback Community College, "she is a solid player," Snodgrass said.

According to Snodgrass, a lack of recruiting in the women's team would make the spring season a long one. He said that recruits would help improve the fall season.

The University helped K-State tennis by resurfacing the Washburn Complex courts and adding windscreens to the facility. The improvements will help the team as well as the intramural program, according to Snodgrass.

Snodgrass, who is also the manager and part owner of a local racquet club, helps provide facilities for winter practicing of the teams. The investors in the club provide the facility free of charge to the team with a walk-on basis clause.

K-State tennis was able to give out eight scholarships for the first time since the 1960s. K-State and KU are the only tennis teams who weren't giving out scholarships in the Big 8.

"There are many good players who are all worthy of full scholarships but that just isn't possible," Snodgrass said.

Even though the 1982 team was put together in a short time, the team is looking for big improvements. **RP by Char Heinke**

# Crew wins Big 8 Regatta at Tuttle

The Kansas State Rowing Association spent time raising money as well as training for competition.

The rowing team started the fall program in late August and rowed until about Thanksgiving, according to Pete Hamma, head coach of the club.

Joel Anderson, junior in education, was the vice-president of the club and also team captain for the men.

"We would lift weights three times a week and run every day," Anderson said. "It's a necessity to get your legs strengthened and your body in top physical shape so that you can compete at an intense level."

In the fall season the club travelled to Creighton, Neb., for a regatta.

"We helped the novice team learn technique at the Creighton Regatta," Anderson said. "Basically, this gave the novice team some racing experience."

The president of crew is Allison McKim, junior in psychology. She is also captain of the women's team.

"In the fall semester there was not much competition," McKim said. "But during the spring season it was really time con-

suming. From March 27 to May 1, we had a meet every weekend."

There were about 25 women involved in crew, according to McKim. "First year members were on an equal level. It was a new experience for them."

"I learned a lot of self-discipline and got a lot of satisfaction being a member of crew this past year," McKim said.

"It takes a lot of strength," McKim added. "Rowing is really good for the body. You use all the muscles in your body. It's like swimming. You do not have a bunch of strength in one area."

There were about 18 men on the varsity, Hamma said, and 12 on the novice team.

The crew raised money all sorts of different ways, Hamma said. "We worked football games and basketball games parking cars. We worked a Royals play-off game also."

"We went to Esbon, Kan., for its Oktoberfest to show the people what we are doing and to get some donations," Hamma added.

There were also a couple of benefits at local bars to raise money, he said.

Over spring break the team went to Aus-

tin, Texas, to practice, Hamma said. "We wanted to get some water time plus give the guys a break."

"The novice team spent more time in the water to learn how to work together in unison," he said.

The crew went to Austin to practice due to ice on Tuttle Lake. After Austin the season had a hectic schedule, Anderson said.

"We traveled to Nebraska for the Big 8 Championships," Anderson said. The following week was the state championship in Topeka. After that was the University of Kansas — K-State match and finally the Midwest Rowing Championship in Madison, Wis.

"The minute I touched the water in a boat, I fell in love with the sport," Anderson said. "We worked at 5:30 in the morning (men's varsity). The combination of physical exertion and the serenity of the nature around us, proves to be a great natural high. **RP** by Joe Sassenick

Both teams place 8th

# Golf seeks players, improvement

The women's golf team was a young club which finished 8th place in the Big 8 championships. The men's golf team also placed 8th in the Big 8 championships.

"The women made considerable progress," Coach Ray Wauthier said, "but they still had a way to go when the season ended."

Wauthier was looking forward to having five girls back for the 1982 spring season but only two returned.

Rose Atkins, sophomore in retail floriculture, and Becky Stromgren, sophomore in physical education, were the only returning players.

Atkins had an average of 91.9 for seven rounds and Stromgren finished with a 103.9 average.

"Our problem is that we have no one with much golfing experience," Wauthier said.

There was a lack of interest in the women's golf team. The team must have five players in order to compete in intercollegiate competition.

All of the Big 8 universities have competitive women's and men's golf.

George Furney and Jon Carlson were seniors on the men's golf team in the spring. "George Furney was our most consistent player," Wauthier said. Furney ended with an average of 79.7.

Coach Wauthier was disappointed in the men's season because they had difficulty playing consistently as a team. A couple of players would shoot well while the others would shoot high, according to Wauthier.

Brad Johnson, who is returning in 1982, had a bad leg in the 1981 season but played well the last half of the season. Johnson shot the low for the team with 79.1.

The men could not put it all together at one time and there wasn't a tournament they played where each player was playing at his capacity, according to Wauthier.

Potential low scorers for the 1982 season will be Kevin Crow and Greg Higgins. **RF** by Char Heinke

## Coach to step down

# Rugby places fourth in Nationals

"The Rugby Club's goals for the coming year are to get back into the same competition, and to go as far as the club did last season," Coach Greg Young, said.

This goal, however, may be difficult to accomplish.

There is no intercollegiate league for Rugby teams. Each team is a member of a "union" and play different unions in their respective territories. The nation is divided into four territories. The Rugby Club at K-State is a member of the Western Territory.

The season began with a championship win at the 1981 Heart of America Collegiate, a Union game played in Lawrence. K-State beat Missouri 13-0, Pittsburg 21-4, and University of Kansas 7-4. The Heart of America championship qualified the team for the finals in the Eastern Zone of the Western Territory. The team went on to beat Principia of Kansas City, 9-4, Oklahoma, 26-3, and New Mexico State, 13-11, to take the Western Territory Championship in Denver. The National Championship was played at Dayton, Ohio, where K-State lost to California-Berkley, the eventual Champion and then lost again to Miami to take 4th place.

"It's marvelous. We deserve it because we worked hard. The team just clicked," Young said, when commenting on the 4th

place finish.

There is, however, a tournament played in the spring that is intercollegiate.

"The intercollegiate tournament is now an annual event in the spring," Scott Skahan, team captain, said. "The K-State Rugby Club focuses its spring season on bettering last year's finish."

"We love to stress winning fourth in the tournament," Skahan said.

"In terms of available talent and on paper we should go as far as we did last season," Young said of the spring 1982 season. "You never know what can happen since there are so many other things to consider, such as traveling."

The cost of travel is paid for by the individual team members. The team usually consists of a squad of 30. If the team reaches the final four, the team is sponsored and given travel cost and accommodations.

"There's not that much difference between performance in home and away games," Young said. "It is easier to organize the team if the game is played at home, but last season we played so many away games and did really well."

Bill Knopick was named Rookie of the Year for the squad.

"Not only is Rugby a team sport, but it's a social sport as well," Knopick said. "It's

not like football where team members never really get to know the opposing team. I play Rugby because I thought it would be fun to get to know a bunch of guys. After the games, we all go out for a beer. I also play for the physical activity."

"I'd like for the team to go as far as they did last season," Knopick said. "My personal goals are I'd like to do my best for the club, help out the team as much as I can and influence everybody."

Besides Knopick receiving the Rookie of the Year Award at the club's fall banquet, Most Outstanding Back was awarded to Pete Lewis, Outstanding Forward to John Ford and Most Outstanding Player to Don Harris.

The team did not fare as well in the fall as it did in the spring.

"The fall was a disappointment after last spring as we lost a few key players last year," Skahan said.

The team lost to KU for the First Lady's Cup and to Kansas City Rugby Club in the consolation finals of the Heart of America Rugby Tour. The scores were 7-3 and 12-0.

The fall was Young's last year as head coach. According to Skahan, Young spent a lot of time and dedication toward the club. Team coaches are not paid for their time with salaries. **RP** by Susan Somora.

# The t-shirt turn on Intramural participation on the increase

It can be tiring to look at the same old books day after day. Sometimes it seems as if college is just a series of exams.

Well, for some K-State students intramurals prove to be the answer as students shun the pains of classroom work and headed out into the world of athletics.

According to assistant intramural director Steve Martini, intramurals give students the opportunity to get away from the frustrations of college life and into something which students could feel more at ease.

"There are a thousand reasons why students participate in intramurals," Martini said. "For some, it's an opportunity to meet people. It allows them to compete with friends on various levels of competition," he said.

"For others, it's a part of their life and therefore, competing is just a natural thing for them."

At K-State, organized living groups and independent teams are eligible to participate in the intramural program. There are 15 sports from football to badminton offered to students. Competition takes the form of men's, women's, and co-rec Greek, faculty, and independent leagues.

In each division, teams battled for the right to wear a T-shirt proclaiming their all-university championship in a particular sport.

According to intramural director Ray Robel, the T-shirt is an ego booster for many students. "These T-shirts are a popular outgoing sign for students," Robel said. "It is an ego booster. It shows that you are a champion."

Martini agrees. "The T-shirt is something that you can use," he said. "Not only that, but it gives the Rec Center a little bit of recognition as well. It (T-shirt) lets people across town know that you are a divisional champion."

Besides the T-shirt, teams also compete for points in each sport. Points are figured on the basis of the number of games won and lost; as well as whether or not a team won a particular sport, say for instance basketball. At the end of the school year, the team with the most points is declared the overall intramural champion.

"Not many schools use the point system anymore," Martini said. "Many of the schools just award the winners with a trophy rather than go through all the hassle of

Allen Eyestone

## Intramurals

figuring out points."

According to Martini, K-State has one of the finest intramural programs in the country. With the completion of the Washburn Recreational Complex, he sees intramurals on an upswing for many students.

"Since having the complex, the opportunities for students to participate in free time recreation has increased," he said. "At first, when we were only able to use Ahearn, it was a disadvantage because the facilities were not as good as they are now."

"With the Complex, I felt that we have attempted to meet the needs of everyone that we are responsible to cater to whether they are students, faculty or Manhattan residents," he said.

For students, the intramural program gives them the chance to meet new people. "It's a different kind of atmosphere," John Preut, junior in elementary education, said. "It gives you the chance for fellowship with a group of guys, both those you do know and those you don't know."

"It's a neat opportunity to build character in your life such as unity and patience," Preut said.

For some, intramurals allows them to carry on athletic competition from high school. According to John Wolters, "intramurals allows me to carry on the athletic competition that I was involved in when I was in high school."

"It's a good break from school," he said. "It gives me the opportunity to relax and play with people I like." **RP** by Tracy Allen

# Sports

Rob Clark

K-State sports had its share of accomplishments during the year including impressive record-breaking and awards gained by some of K-State's best athletes ever. The awards mentioned are only a few of the highlights of honors given to K-State players.

## Tammie Romstad

As one of the K-State women's basketball players, Romstad, a senior in health, physical education and recreation, was nominated for the Wade Trophy. The Wade Trophy is given to the top woman athlete of the year in the country. A committee of

coaches from around the nation choose the winner of the award.

## K-State vs. University of Kansas

The men's basketball team placed second in the Big 8 Conference, causing an opportunity to play KU for the third time in the season during the first round of the post-season tournament. K-State beat KU for the third time this season with a win of 74-62. This meeting marked the first time since the 1976-77 season that K-State came up the winner for all three games.

## Willie the Wildcat

Willie the Wildcat added another perfo

# News

mance to his act during a football game. Being passed up is a ritual at K-State which usually held for the women, but at the South Dakota game, Willie had the opportunity to be lifted over student's heads, in his free ride to the top of the stadium.

## Ed Nealy

Senior Ed Nealy improved his career college rebounds to over 1,000. This put Nealy in third place in the Big 8 Conference for all-time rebounds in a college career. He also landed first place of K-State's rebound kings. He replaced Jack Parr whose career rebounds totaled 889. Nealy was also named to the honorable mention team in college basketball.

## Academic All-Americans

Several K-State athletes disproved the old saying that athletes are all brawn and no brain.

Football player Darren Gale, strong safety, was named captain for the All-American football squad. Gale, a junior, earned a 3.91 grade point average in nuclear engineering.

Forward Ed Nealy and guard Tim Jankovich, men's basketball players, were elected to the Academic All-American team for basketball.

Nealy had a 3.09 average in engineering technology and business. Jankovich had a 3.7 average in economics and finance.

In the previous year Nealy and Jankovich were also second team All-Brain honorees and are two-time Academic All-Big 8 members. They were eligible for the national All-American team in March.

## Reggie Singletary

As a sophomore, Reggie Singletary played his first year of K-State football. As a defensive tackle Singletary was named Defensive Newcomer of the Year in the Big 8 Conference. **RP** by Char Heinke

Jeff Taylor

When students talk to friends and younger brothers or sisters about college life, it's a safe bet that academics is only a portion of the conversation.

The answer to the question "What's college like?" sometimes depends more on where the student lives rather than who his or her teachers are. The answers are as varied as the types of housing at K-State.

The 26 fraternities, 11 sororities, nine residence halls and two cooperative houses, are complemented by off-campus living — a diverse living group in itself.

However, choice of traditional Greek life may give students a different outlook than perhaps apartment or residence hall life but there are similarities between the choices.

Whether they are a racquetball partner or a shoulder to cry on, roommates, fraternity brothers or sorority sisters all form a large part of the memories and friendships that last a lifetime.

In any case, traditional college living was stronger than ever at K-State. **RP**

# Changes in attitudes contribute to

Which came first: the alligator or the Greek?

According to Richard P. Coleman, associate professor in marketing at K-State, "The preppy look is almost a trend of the times, not narrowly confined to one sub-culture (the Greeks)."

Through informal surveys in his marketing classes Coleman found that the resurgence in the popularity of Greek life did not directly contribute to the popularity of the preppy look in fashion.

Coleman asked for comments from his students to help define collegiate sub-cultures and how they influence consumption patterns.

The same attitude that phased out tiedies, worn blue jeans patched with American flags and political protests, paved the way for Izods, monogrammed shetland sweaters and oxford cloth button-down shirts.

Unity that sprang from a crisis in Iran and Reaganomics extended into a willingness to be indentified with a group. On campus this pull-together sentiment contributed to a continued rise in the popularity of Greek life.

At K-State fraternity and sorority life

has always been a viable option, even a decade ago when disfavor closed many houses nationally. At K-State, 1982 saw a continued gain in popularity and acceptance of Greek living.

"The unhappiest are those with no clear-cut self-identity and affiliation," Coleman said, adding that comments showed "Greeks like to fancy themselves not wholly and narrowly responsive to only one subculture group."

Probably the most graphic illustration of the growing popularity of Greek life was the formation of Sigma Sigma Sigma, the first sorority to be organized at K-State in 20 years. Tri-sig was begun in the fall of 1981 with 120 women pledging the new sorority.

The measurable decline in Greek membership between 1961 and 1971 is even more dramatic when compared with the rise in K-State enrollment during the same 10-year period. In 1961 enrollment was 7,244. In the next 10 years, a 104 percent increase brought the number of students to 14,789 in 1971.

Changes in student attitudes are just one factor contributing to the rising

*Let's get tanked* — Members of Sigma Alpha Epsilon ice down kegs for their annual fall welcome back party.

Scott Williams

# Greek resurgence

popularity of Greek life. Sororities and fraternities at K-State have also changed with the times, according to Barb Robel, adviser for Greek Affairs at K-State.

"There is an increased emphasis on the individual and they're working on eliminating those things negatively associated with Greek life. For example, hazing, the practice of physically or mentally dangerous or demeaning acts involving pledges is now prohibited," Robel said.

Although there are still standards to be upheld, there are more allowances for freedom, according to Robel. Houses no longer have closing times; instead each member has a key or combination.

She said that some long-standing stereotypical views of Greeks are ill-founded. Seventy-five percent are working to help with college expenses. Pledges are judged on "self" — not what "Daddy" does. This information is not even made available.

Emphasis is still placed on scholarship in houses. Greek grade point averages are consistently higher than those of university students at large.

"Another example of changing attitudes in Greek houses is the role of housemother," she said. Ten years ago she was a chaperone, locking doors, shooing out visitors of the opposite sex. Her function now is closely related to that of a hostess and meal planner. She no longer represents a mother figure in terms of enforcing rules and regulations, Robel said.

Today's student seems more willing to express his or her individualism within the confines of a group. During the Vietnam era, students rejected sororities and fraternities as part of the distrusted "establishment."

"Students 10 years ago seemed more interested in the 'me'," Robel said. "I think we're seeing more of a 'we' attitude now, a willingness to go beyond self and take on responsibilities of service and leadership. Students are also more receptive to identifying with a group, being a member."

While members of fraternities and sororities are more accepted by non-Greeks in 1982 than they were by independents a decade ago, many house members observe that animosity among their independent peers is not dead.

"I know when people find out I'm in a sorority they form definite opinions,"

Rob Clark

said Lyndee Santero, sophomore in community services and social work and member of Chi Omega. "It's mainly based on their overall attitudes toward Greeks. I would prefer people didn't know and would take me for who I am."

Fred Pruitt, senior in sociology said, "I have a lot of Greek friends but I wouldn't want to be one. They're interested in things that I'm not — like social competition."

"The antagonism felt by some students toward the Greek system has prevailed since the 1930's," Coleman said. "They're part of a 50-year tradition." **RE** by Donna Osborn

*Tradition survives* — Gamma Phi Beta sorority members Susan Sears, junior in pre-nursing, Francie Bailey, sophomore in pre-nursing and Marsia Green, sophomore in interior design, are served by houseboy Don Deshazer, junior in veterinary medicine. Although many aspects of Greek life are changing with the times, formal weekly dinners are one of many remaining traditions.

*Hello down there* — Housemothers look out over the Alpha Tau Omega annual block party. The party was Sept. 11 and lasted most of the afternoon. Ten fraternities and 10 sororities were invited, and about 1,500 people turned out for the Friday event. Two houses from the University of Kansas were also invited, Delta Gamma and Alpha Tau Omega. The Clocks, a popular area band, provided the entertainment and 45 kegs of beer made up the refreshments. All of the invited houses paid an equal amount to help defray expenses.

Jeff Taylor

**Pyramid power** — Kappa Alpha Theta and Kappa Sigma members perform during the finals of the Body Building contest in the Union Courtyard. The event was part of Greek Week activities and pitted pairs of Greek houses against each other in displays of Greek spirit. This group was named the winner of the contest for its efforts.

# Sigma Sigma Sigma

## Tri-Sigs' first year organization difficult without house

For Sally Hanna, gaining 115 sisters at one time can be a little overwhelming, and while it certainly isn't the most conservative of family planning practices, she believes the formula is working well for K-State's newest sorority.

"I've met a lot of new people and gotten involved in some interesting activities," Hanna said. "It was a little difficult at the beginning because we're starting out new but things are really coming together now."

Hanna is just one of the members of K-State's Sigma Sigma Sigma sorority. This is the first year for the Tri-Sigs at K-State and its organization took large doses of hard work and dedication according to Suze Brink, graduate student in counseling and colony president.

Brink said that together with the lighter side of sorority life, such as functions with fraternities and Homecoming week activities there is also a good deal of pressing business in colonizing a sorority.

"The organizing end of it takes a tremendous amount of time and effort, but I feel it's all worth it," she said.

Brink and other officers of Tri-Sig were chosen for their positions by field representatives, house alumni, and national officers. In addition to choosing officers by informal interviews, the house representatives also help with any colonization efforts.

"I was thrilled when I was asked to be president and I certainly didn't hesitate to accept," laughed Brink. While she said she feels confident of her abilities she acknowledges that at times the responsibilities can mean pressure.

"You always have to be thinking ahead. Our biggest goal this year is to be installed as a chapter." As Brink explains, the group is only a colony at the time of formation. A colony is not actually considered a sorority until they complete a variety of projects necessary for installation as a chapter.

"We have a lot of work to do, but all

the girls have been very supportive of each other and things are moving more smoothly," she said. The Tri-Sigs must complete a rush, a fundraiser and two philanthropy projects to meet installation requirements.

The colony must also have adequate membership, an alumni chapter to support and advise and all members must have a general knowledge of Tri-Sig history and philosophy.

"There's more work for us to do since we're not an established sorority," Lisa Lutz, Tri-Sig treasurer said. As treasurer, Lutz takes care of the girls' financial records which include monthly dues, pledging dues and initiation fees. She also helps to advise fundraising activities.

"Our financial stability is important at this point," she said. "Ultimately the national representatives and the Panhellenic Council at K-State will decide if we have met all the criteria for installation."

The biggest hindrance for the colony is caused by lack of central living quarters. Communication on short notice is often difficult and as Brink laments, "We don't have a foyer or main lobby where we can put up signs to get everybody together."

To alleviate the problem, members have established a phone tree whereby officers are asked to call two members, those two members are asked to call four members and so on until everyone is reached.

"It's the best we can do for short notice and it usually works pretty well if everyone is faithful in calling," Brink said.

To keep members aware of ongoing activities and policies, weekly meetings are also held in the Big Eight room of the Union.

"At times it may be difficult for members because they don't get to see all the 'behind the scenes goings on,'" Brink said. "Obviously we can't bring all the questions and concerns before the entire body or we would spend all our

time in meetings. As officers we have to be willing to make some decisions on our own."

Brink's only fear is that in her attempt to balance the business end of running the sorority with the many other activities, members may feel she is not as active socially as she should be.

"Being president of a new sorority isn't easy. Unless someone actually lived around me then they couldn't understand the time and work that goes with the job."

She said she believes a common residence should give members a better understanding of the workings of the sorority while at the same time allowing her to keep in better contact with them on business matters. She added that after installation as a chapter the Tri-Sigs can begin plans for building a house.

"We hope to have the plans for the house done by rush of next year," Brink said. She explained that while the Tri-Sigs have purchased a lot next to the Alpha Tau Omega house they cannot actually begin with any plans until after installation as a chapter.

In the meantime the sorority plans to fill an apartment complex being built on College Heights Road. According to owner, Emery Riffle, the apartments had been planned and upon hearing that the sorority was interested in renting the Tri-Sigs were given the first chance at it provided they had enough girls to fill it. Space is also being made available for a meeting room, he said.

While the housing situation has been the biggest obstacle for the colony, Brink feels that what may first appear as a drawback may in fact turn out to be an advantage by building a sense of camaraderie between the girls.

"We've had to work harder to become unified and everyone realizes that they have to put out a little extra effort to get things worked out," Brink said. "I think in the long run it will prove to be a positive thing." **By Sharon Riley**

# It's a matter of Opinion

There are many different advantages and disadvantages to living in a residence hall. Everyone has a different opinion of "dorm life." For some, their dorm room was "a cell away from home."

"You have to be in by a certain time or the doors are locked and you have to ring to get in. I hate to have to do that," Gina Doyle, sophomore in graphic design, said. Not all of the halls locked the front door, though. However, there were other disadvantages.

"You don't have any privacy," Edggy Gonzalez, senior in biology, said. "Besides that, you can't study. Your neighbors are often noisy, and people are always coming by and asking you to go somewhere."

Cafeteria schedules also inconvenienced some people.

"I wanted to be able to eat whenever I wanted to," Ron Metzinger, senior in agricultural journalism, said. Meals in the residence halls are available at set times only.

But for some, there are also positive aspects of living in a residence hall. "I met most of my best friends there," Karen Cocking, sophomore in elementary education, said.

"I think that makes it a great place to live when you're a freshman," agreed Laura Unrein, sophomore in elementary education.

According to Edggy Gonzalez, "You get into the social scene early, and there is always someone older there to help you if you need it."

There are advantages for more than just freshmen.

"I liked the convenience," Jeff Scott, junior in computer science, said. "You don't have to cook your own meals, and there are vending machines right there if you get hungry."

Living in the halls isn't all good or all bad. It depends on the viewpoint. For instance, you either have 600 noisy neighbors or 600 possible friends. **by Teryl Scott**

*Holler loud* — Signs like the one on 2nd floor are found throughout Ford Hall to protect residents from getting caught in various undressed states by male visitors.

Jeff Tay

## A "hall" of a place to live.

Russell Shortt

*Bunkin' it* — Rod Hostetler, sophomore in graphic design, and Mike Ward, freshman in journalism, built up their room at 445 Marlatt. Many residents build up their rooms to add more space or to make them more livable.

*Rest stop* — Mark Flagler and Shawn Gideon, both freshmen in engineering, fiddle with the carburetor of a car stalled at the intersection of Denison and Poyntz. The car is owned by Kathy Taylor, junior in sociology. Many off-campus students find it necessary to drive to campus.

## Talking to himself

# A different kind of editor's note

**W**hile this space is normally reserved for the editor's note, this year's editor refused to follow the tradition of the ordinary obligatory thank you's and sentimental goodbyes. He requested — make that demanded — to be interviewed. Since no one had the foggiest idea of what in the world he was getting at, the job of interviewing Anton Arnoldy fell to the one who knew him best: himself. So here it is, an exclusive interview with the editor, by the editor.

**RP:** Isn't this whole idea of interviewing yourself kind of conceited?

**ARNOLDY:** Yes, but that's not the reason I did it. I did it because I wanted to talk about the Royal Purple in a different light than a normal editor's note. To do that, I had to ask the right questions. So let's get started; ask me something general to get this thing going.

**RP:** O.K. Let's talk about this year's Royal Purple. Is it a good one in your judgment?

**ARNOLDY:** That's one of those questions which really doesn't have an answer. It's totally relative. If I compare it to a lot of college yearbooks, the Royal Purple is outstanding. If I compare it to others, the book leaves a lot to be desired. On the bottom line, though, I'm damn proud of this year's book. We accomplished some really great things in certain areas, and we failed in others. For the most part, though, my judgment doesn't matter.

**RP:** Then whose judgment does matter?

**ARNOLDY:** There are essentially three judges of a yearbook: the students who buy the book, the contest judges who rate it and the staff.

**RP:** O.K., how do each of them rate the Royal Purple?

**ARNOLDY:** Well, the students seem to rate it fairly high. Our sales are at 8,000 books and the number of people who put their mug shot in the book is just over 7,400. In a school of nearly 20,000 students that may not sound like much to a non-yearbook person, but I believe it would be impressive to most yearbook business managers or advisers. And yearbook judges have given us a pretty fair shake also. The 1981 Royal Purple was named Five-Star All-American and the 1980 book was given the Pacemaker Award. Both of these awards are national awards. There was a period of time during the years before 1980 where the RP did not receive the same amount of recognition, but there is a long tradition of awards for the book. Finally, the staff looks at the book like no other group of people. It is just impossible to work for an entire school year and not have your yearbook draw up many different emotions. The job has to be almost a labor of love or a staff member will just never make it through the year without quitting or being fired for not doing his or her share. I think that this year's staff is also very pleased with the book. Of course, there are always pages that they wish could be done over again, but that's in retrospect. Overall, they can be very proud.

**RP:** Pardon me, but you sure sound like you are bragging instead of just answering the question. Aren't you getting a little carried away with what a "wonderful" thing the Royal Purple is? After all, it is just a yearbook, right?

**ARNOLDY:** Of course I'm bragging. But I think it's about time that somebody does let people know that the Royal Purple just doesn't magically appear at the end of the year. If it takes a little bragging to get the point across, I'm agreeable. All I'm trying to do is to have people sit up and take notice that there

is a solid foundation here to make one hell of a yearbook. And that it's up to the students to keep building on that foundation.

**RP:** Wait a moment. I understand that you want people to know a lot of work goes into the Royal Purple, but what is this "up to the student" business. Short of joining the staff, what do you expect an average student to do for the Royal Purple?

**ARNOLDY:** The most obvious answer is to buy a yearbook, but I'm not going to make a sales pitch for that. Personally, I think that everyone will someday regret not having a yearbook on their shelf at some point in their lives. I know that sounds corny, but I really believe it. The second most obvious answer is to put their picture in the book whether they buy one or not. One of the most important keys to the success of the Royal Purple is the number of people who put their picture in the book. The yearbook is a record book. And the more complete we can make the housing section, the better record it becomes. The last but most often overlooked way of helping the Royal Purple is to let the staff know what is going on around campus. Let's face it, it would be impossible to cover every detail of every event but the staff always tries to be as complete as possible. However, if the staff does not have enough warning about an event, it's almost a sure bet that we can't have a writer or a photographer there.

**RP:** But what about the people who do that each year already? You don't even put all of their events in the yearbook, why do you want more information from others?

**ARNOLDY:** You are missing the point. Just because the staff has prior warning doesn't mean that the event is newsworthy or that it would be of interest in a yearbook. But keeping track of those events that are newsworthy or do make good feature stories is a huge job and generally any help offered is appreciated.

**RP:** That all sounds very honorable but the fact remains that there are errors and downright screw-ups in the book that make some people disillusioned with the yearbook. What do you do about that?

**ARNOLDY:** I know from experience that sometimes errors sneak into a book but I think that is a overblown myth about student publications in general — that they have a lot of errors. Whenever someone points an error out to me in the yearbook, I am reminded of an interview I did during my first year on staff. The director of admissions was talking about registration. He said that it was hard to tell a student "I am sorry that it happened to you but there were 13,000 others who went through (registration) with no problem." I think the same thought applies to problems in the Royal Purple. It's hard to explain to someone that "I'm sorry we misspelled your name but we did spell more than 7,000 other names right." To them it does matter — and understandably so. But the fact is that we also do a lot of things right. I just can't give up on the whole system because there are some flaws still in it. One has to remember that the staff often has a large turnover each year and must be retrained.

**RP:** You had only one returning staff member from last year. Was that a major problem?

**ARNOLDY:** There is always a period of adjustment for a new staff. There is also a period of adjustment for a new editor. I'm afraid that the beginning of this year was a little like blindfolding a company of soldiers and then yelling "Charge!" There was not enough time helping the staff learn their jobs. ♦

Allen Eystone

*By the time deadlines rolled around, however, they had a baptism of fire and they came through. Sometimes one person would stand out by doing an extremely good job or devoting an extreme amount of time and sometimes another person would take the spotlight. And there were more than one who I could count on almost every time I needed them.*

**RP:** I understand that not all of them worked out though. What about those people?

**ARNOLDY:** Yes, there were some that started with us but didn't finish with us. But I think we had a pretty good success rate with our staff. If this interview had occurred during some of our more tense deadlines, I might have named names or said other things to regret. Time has a way of smoothing our problems. Besides, it is extremely hard to predict who is cut out for a yearbook staff and who is not. There is bound to be some turnover in any staff.

**RP:** Don't you want to say anything about particular staff members?

**ARNOLDY:** I've already said that I won't get sentimental or just hand out the obligatory thank-you's. Each staff member gave what they thought was their share toward the Royal Purple. I hope they know I appreciate that effort. For me to name particular staff members over others is the equivalent of a rating game. As editor I may rate performances but not so they can be published in the back of the book.

**RP:** So what can you say to the staff?

**ARNOLDY:** How about "Thanks?"

*Towering heights* — Banister shafts vaulting towards the heights of Farrell Library guide the way for Carol Sobba, senior in agricultural journalism, as she climbs the main stairway of Farrell.

Scott Williams

# A taste for tradition

Even though they act as individuals with their own dynamic outlooks, K-Staters all hold some level of allegiance to their alma mater. Their lives center around private motivations, be they career or social, but that Purple Pride refuses to give way. Whether they remember countless study trips to the library or the thrill of Wildcat basketball or quiet times strolling across campus, each student holds images of traditional college life.

Tradition can sometimes be a dirty word, though. To some people it connotes close-minded

conservatism, or even open backwardness. K-State has never been known as the "Berkeley of the Midwest" and probably never will. By clinging to traditional values of social life, academia, and even politics, K-State opens itself to charges of being conservative and reactionary. But should the campus question its traditional basis of life simply because of a fear of labels? Is there room for new ideas in a place where the past is not out of fashion? ♦

Jeff Taylor

*Mirrored* — Craig Delano, freshman in pre-design professions, and Robyn Redman, junior in elementary education, wade through a puddle in the Quinlan Natural Area near the Strong Complex residence halls.

*Homework* — Sue Bullock, freshman in elementary education, studies for a biology class.

Jennifer Zang

## *A taste for tradition*

How much tradition is too much?

For K-State, the question doesn't seem to be a problem. While it adheres to traditions almost everywhere on campus, there is still room for the new, along with the old. There is still room for change in the midst of stability. The campus is dynamic, inside and outside of the classroom. There is still room for the individual.

And there is still room for tradition. 

*Old and new* — With Dickens Hall, Holton Hall, and the Art Building in the background, University workers tear down old greenhouses to make room for future construction of a biochemistry laboratory building on the site.
